

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

## ACKNOWLEDGMENTS

The Statistical Abstract of the United States has been published annually for the past 69 years, and its present content and form are the result of the work of many persons during that period. Revisions are made each year to adapt it to meet current needs and uses, and to bring the various statistical series up to date. The present volume has been compiled under the supervision of Morris H. Hansen, Statistical Assistant to the Director, and Morris B. Ullman, Chief, Statistical Reports Section. Bruce L. Jenkinson is Chief, Statistical Abstract Unit. Kathleen H. Dugan is Editor, and Elma D. Beynon is editorial supervisor, of the annual volume.

The cooperation of many persons acting in either their official positions or as individuals, who contributed to the preparation of this volume, is gratefully acknowledged. The list of tables by source (pages 984-987), as well as the source note following each table, indicates the various government and private agencies cooperating in furnishing information, assisting in the selection and preparation of the material, or otherwise contributing to the preparation of the Statistical Abstract.

JUNE 1948.

## SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, *Statistical Abstract of the United States: 1948*. (Sixty-ninth edition.) Washington, D. C., 1948.

## PREFACE

**Use of the Statistical Abstract.**—The Statistical Abstract of the United States presents in a single annual volume important summary statistics on the industrial, social, political, and economic organization of the United States, and includes a representative selection from most of the important statistical publications. It is, of necessity, limited primarily to national data and to limited summaries by States. It does not attempt to present the great wealth of local data available from many sources.

This book is designed to serve a twofold purpose: *First*, to serve as a convenient reference volume for quantitative summary information; and *second*, to serve as a guide to various important sources of statistical data. If the user finds that the information given here on a particular subject is not sufficiently detailed for his purpose, it is suggested that he refer to the publication or the agency from which the statistics were obtained for publication in the Statistical Abstract. The source of each table is given at the foot of the table. The original source usually contains additional statistical detail, and a more complete discussion of the definitions and concepts involved, than can be presented in the Statistical Abstract; also, it may supply data for small areas. Further, the agency initially responsible for the statistics occasionally can supply still more detailed information on the basis of their unpublished tabulations or records.

**1948 Edition.**—This edition, the 69th annual issue of the Statistical Abstract of the United States, is designated by the year of publication. The statistics shown are the latest available in the early part of the calendar year. The time periods or dates covered by the information in the tables vary according to the practices followed by the various agencies responsible for their preparation.

The presentation of graphic material, begun in the 1947 edition, has been continued. Eighteen pages are now devoted to this type of presentation in comparison with 12 pages in the 1947 edition.

This edition includes 1,070 tables in comparison with 1,059 in the previous edition. General notes have been added for Section 21, Waterways, Water Traffic, and Shipping, and Section 28, Construction and Housing.

Additional or new subject material is presented on population forecasts, employment in the executive branch of the Federal Government, consumer income, motor fuel consumption, national forests, current industrial production, and size of establishments in the distribution and service industries. The listing of tables by source now follows the tabular material (see pages 984–987).

A review of the materials presented in the field of insurance is in process and it is planned to incorporate the results in the next issue. Comments and suggestions relating to improvement of the current presentation of insurance data will be appreciated.

**Supplements to the Abstract.**—The Statistical Abstract, as an annual one-volume publication, is of necessity limited in amount of detail shown. Businessmen, teachers, librarians, public officials, professional workers, and others often require data for individual cities, counties, metropolitan areas, and other small areas as well as for States. Economists, teachers, students, and others frequently need more historical information. To meet such requests for more detail, a series of supplements to the Abstract has been initiated.

The first of these supplements, *Cities Supplement—Statistical Abstract of the United States*, provides 79 different items of information concerning the population, education, housing, labor force, business establishments, government finance, and climate of each of the 397 cities of the United States with 25,000 or more inhabitants in 1940. This supplement is on sale by the Superintendent of Documents, Washington 25, D. C., for 15 cents.

The *County Data Book*, a supplement to the Statistical Abstract of the United States, is the second in this series. This publication brings together 91 different items of information for each of the 3,099 counties of the United States, with summaries for 188 metropolitan areas defined along county lines. Broad subject headings covered are population, labor force, housing, agriculture, industry, trade, and other economic data (including bank deposits, E Bond sales, war supply contracts, and wartime facilities projects). This publication is on sale by the Superintendent of Documents, Washington 25, D. C., for \$2.75.

*Historical Statistics of the United States*, a third supplement, is now in press. This volume brings together 3,000 statistical series which extend back through time. Data are shown for each year back to 1789 or to the earliest data available for the series. In the preparation of this supplement the Bureau had the cooperation of a special committee of the Social Science Research Council set up to advise the Director of the Census on a source book of historical statistics and of the Committee on Research in Economic History under the auspices of the Social Science Research Council.

These supplements to the Statistical Abstract have been prepared to extend the usefulness of the basic annual volume by assembling specialized material in separate books. As these supplements develop it will be possible to edit the material shown in the basic volume to emphasize recent data, while supplements will serve the more specialized needs.

**Responsibility.**—As implied in the title, the contents of this volume are taken from a large number of sources, as indicated in the list of agencies furnishing material. (See pages 984–987.) The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. However, the responsibility for selection of the material for the general user and for proper presentation rests with the Bureau, even though carried out with the cooperation of many technicians who have given unselfishly of their time and knowledge in order to assist the Bureau's staff in making the presentation as meaningful and useful as possible.

The cooperation of the users must also be acknowledged. Many persons have written offering suggestions for improving the presentation of the material. These letters have been most helpful and users are urged to continue to make their needs known. All suggestions will be carefully considered in planning future editions.

#### FOR ADDITIONAL INFORMATION ON DATA PRESENTED

write to the agency indicated in the source note to the table which covers the desired subject.

#### SUGGESTIONS AND COMMENTS

should be sent to:

The Director  
Bureau of the Census  
Washington 25, D. C.

STATISTICAL ABSTRACT SUPPLEMENTS

*Cities Supplement—Statistical Abstract of the United States.*  
Selected data (79 items) for 397 cities having 25,000 inhabitants or more in 1940. Washington, D. C., September 1944. 47 p. Price \$0.15 (Paper).

*County Data Book.* Contains 91 items of statistical data for each county and metropolitan area in the United States. Washington, D. C., 1947. 431 p., maps. Price \$2.75 (Buckram).

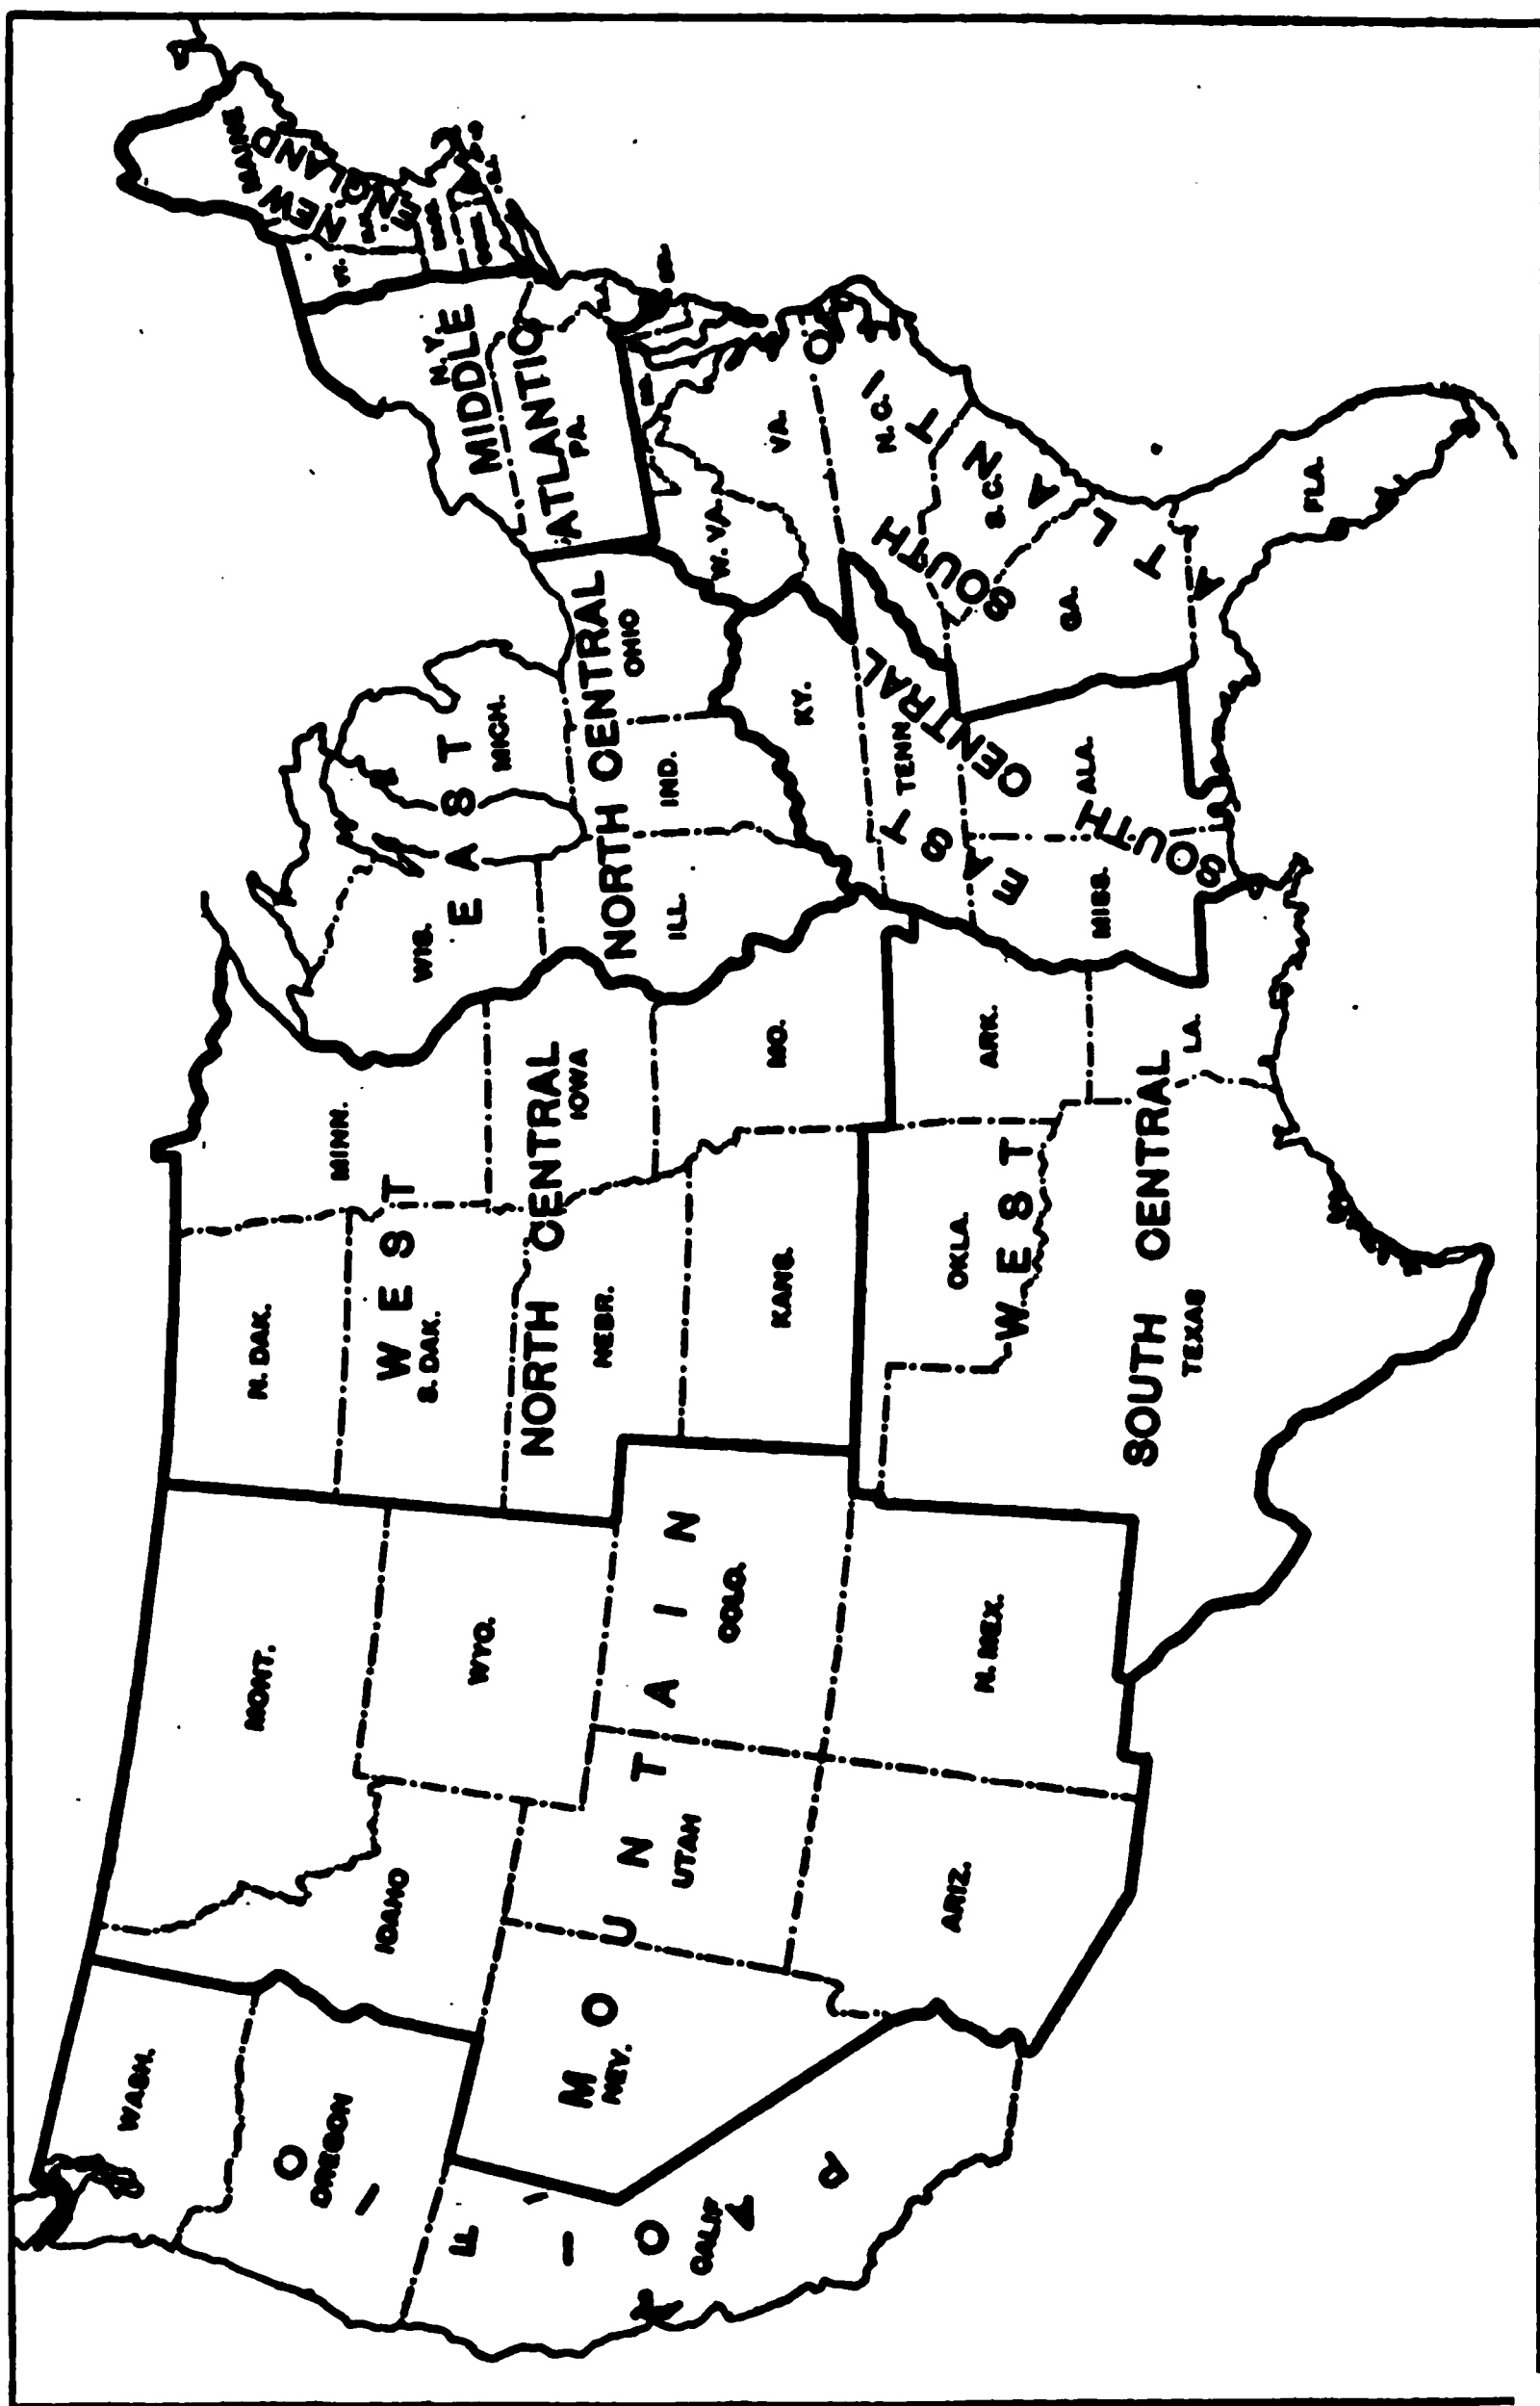

*Historical Statistics of the United States.* Contains 3,000 statistical time series, largely annual, extending back through time—to 1789 where possible. (In press.)

Purchase orders should be addressed to the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

## MAP

**FIGURE A.—MAP OF THE UNITED STATES, SHOWING CENSUS DIVISIONS**

# Statistical Department of Commerce. Bureau of the Census.

## 1. Area and Population

This section relates to the population of the United States, its distribution, and its characteristics. The principal source of these data is the Decennial Census of Population, a house-to-house enumeration made once every ten years beginning with 1790. The data shown here were selected chiefly from the Sixteenth Census (1940), and from special census releases and reports, with the object of giving as complete a description of the population of the United States as space permits. Whenever practicable, a historical series is given in order to show changes that have occurred over periods of time. Most of the data presented apply to continental United States, but some figures for Territories and possessions are included.

Related materials are presented in other sections of this volume. Data on household composition are included in this section, but statistics of marriage and divorce are presented in section 2, Vital Statistics; statistics on family income are given in section 11, Income and Expenditures; and Census data on employment and occupations are given in section 8, Labor Force. Data on the population in institutions as enumerated in 1940 are given in this section, but additional data on persons in mental institutions are given in section 2 and on prisoners in section 3, Crime and Criminals. Tables on nativity and citizenship are included in this section, but related data are included in section 4, Immigration, Emigration, and Naturalization.

**Population samples.**—The use of sampling methods in the Sixteenth Census permitted the collection of statistics on a larger number of inquiries than has heretofore been possible, the release of preliminary population statistics at an early date, and the tabulation of a great many social and economic characteristics of the population at a relatively low cost.

Certain tables in this section and in the related sections mentioned above are based on tabulations of samples of the population. Several samples were drawn and the figures shown were obtained by multiplying the sample results by a factor dependent on the sample size in each case. Sample B is a sample of all individuals from the 1940 Population Schedule; Sample C and Sample W are samples of individual women 15 years old and over from the 1940 and 1910 Population Schedules, respectively; Sample D, a sample of households from the 1940 Population Schedule; and Sample F, a sample of households based for some subjects on 1940 Population Schedule entries, and for other subjects on 1940 Housing Schedule entries. For Sample B, the sample size is 5 percent. Samples C, D, and F are 5 percent in most areas, but they include 2½ percent samples in the most populous areas. Sample W is an 8-percent sample for the North and the South, and about 12 percent for the West.

Exact agreement is not to be expected among the various samples, nor between them and the complete count, but the sample data may be used with confidence when large numbers are involved, and may be assumed to indicate patterns and relationships where small numbers are involved. Specifically, any number of the size of a million or over may be assumed to agree with a complete count within 1½ percent, though most numbers of this size will agree within ¾ of 1 percent. Any number of the size of 100,000 may be assumed to agree with a complete count within 4 percent, though most numbers of this size will agree within 2 percent. Most numbers as small as 10,000 will agree within 10 percent. The sampling errors in subtotals formed by addition of classes are covered by the same statements. More detailed statements regarding the sampling errors are given in the original sources.

For years since 1940, several of the tables present statistics that are based on the Current Population Survey, conducted monthly by the Bureau of the Census. This survey covers a representative sample of about 25,000 households taken in selected areas throughout the United States. A statement indicating the sampling reliability of estimates based on this sample is given in the Sampling Note, p. 175.

**Urban and rural areas.**—In the course of its history the Census has employed several definitions of urban population. The current definition was adopted in substantially its present form at the time of the 1910 census and was slightly modified at later censuses. In this edition, the urban-rural classification for all years is in accordance with the 1940 definition, as follows:

The *urban area* is made up for the most part of cities and other incorporated places having 2,500 inhabitants or more. In addition, it includes unincorporated political subdivisions with a population of 10,000 or more and a population density of 1,000 or more per square mile; and in the States of Massachusetts, Rhode Island, and New Hampshire, those towns (townships) which contain a village of 2,500 or more, comprising either by itself or when combined with other villages within the same town, more than 50 percent of the total population of the town.

The remainder of the population is classified as *rural* and is subdivided into the *rural-farm population*, which comprises all rural residents living on farms, without regard to occupation, and the *rural-nonfarm population*, which comprises the remaining rural population.

For the years after 1940, the urban-rural population figures reflect the classification of areas as urban and rural in 1940. Thus, the urban total for 1946 represents the population living, in 1946, in areas which were classified as urban in 1940; it does not represent the total which would have been classified as urban in 1946 if all areas had then been reclassified as urban or rural on the basis of their 1946 population.

**Households.**—A "household," according to present usage of the Census Bureau, comprises all persons who occupy a dwelling unit, that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the "related persons" (the head of the household and others in the dwelling unit who are related to the head) and also the lodgers, servants, or hired hands, if any, who regularly live in the house. The number of "households," thus defined, is the same as the number of "private households" or "families" as the latter two terms were used in the 1940 census reports.

The term "household," as used here, excludes the small number (about 80,000 in 1940) of institutions, hotels, large lodging houses, and other quasi households which are included as households in the census reports (and in figures shown in this edition for 1920, 1910, 1890, and earlier years. The figures for 1900 and for 1930 and subsequent years, shown in this edition, are in conformance with the present usage of the term "household" as defined above.

# **No. 1.—TERRITORIAL EXPANSION OF CONTINENTAL UNITED STATES AND ACQUISITIONS OF TERRITORIES AND POSSESSIONS**

[Boundaries of all territories listed under "Continental United States" were indefinite, at least in part, at time of acquisition. Area figures shown here represent precise determinations of specific territories which have been marked upon maps, based upon interpretations of the several treaties of cession which are necessarily debatable. These determinations were made by a committee consisting of representatives of various governmental agencies in 1912. Adjustments have been made in the areas as remeasured in 1940.]

ACQUISITION	Date	Gross area (land and water) sq. mi.	ACQUISITION	Date	Gross area (land and water) sq. mi.
<b>Total (excludes P. I.)</b>		<b>3,319,444</b>	<b>Territories and possessions<sup>2</sup></b>		<b>597,257</b>
Continental United States		3,022,387	Alaska	1867	586,400
Territory in 1790 <sup>1</sup>		898,811	Hawaii <sup>3</sup>	1898	6,454
Louisiana Purchase	1803	827,192	Puerto Rico	1898	3,435
By treaty with Spain:			Guam	1898	206

<sup>1</sup> Dry land and land temporarily or partially covered by water, such as marshland, swamps, and river flood plains, streams, sloughs, estuaries, and canals less than one-eighth of a statute mile in width, and lakes, reservoirs, and ponds less than 40 acres of area.

<sup>2</sup> Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area, streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water; and islands having less than 40 acres of area. Does not include water surface of the oceans, bays, the Gulf of Mexico, the Great Lakes, Long Island Sound, Puget Sound, and the Straits of Juan de Fuca and Georgia, lying within the jurisdiction of the United States but not defined as inland water.

<sup>1</sup> Includes persons (5,318 in 1830 and 6,100 in 1840) on public ships in service of the United States, not credited any division or State.

<sup>2</sup> Revised; unrevised figure is 33,538,371. Census of Southern States considered incomplete but there has been no revision of State figures, hence State figures do not add to total shown here.

<sup>3</sup> Includes 225,464, population of Indian Territory and Indian reservations, specially enumerated.

\* Figure for 1880 for South Dakota represents entire Dakota Territory. Figures for 1870 and 1880 for North Dakota and South Dakota are for the parts of Dakota Territory which later constituted the respective States.

\* Area now constituting West Virginia formed part of Virginia in 1860 and prior years.

\* Includes population of Indian Territory, as follows: 1880, 180,182; 1900, 392,060.

## No. 6.—POPULATION PER SQUARE MILE, BY STATES: 1800 TO 1940

[For United States, population of continental U. S. has been divided by total land area. For each State or Territory, population at given census has been divided by land area as then constituted. However, 1930 figures are based on revised land areas used for 1940. Areas of Indian reservations, outside Indian Territory, are included in areas of States and Territories for all years; however, populations of reservations were not ascertained and therefore were not taken into account in computing densities prior to 1890]

<sup>1</sup> Based on 1940 land-area measurement.

<sup>2</sup> Revised. Census of Southern States considered incomplete, but there has been no revision of State figures.

<sup>3</sup> Less than one-tenth of 1 person per square mile.

<sup>4</sup> Dakota Territory: Less than one-tenth of 1 person per square mile in 1800, 0.1 in 1870, and 0.9 in 1880.

<sup>5</sup> Oklahoma and Indian Territory combined. Separate data are as follows: Indian Territory 5.9 in 1890 and 12.7 in 1900; Oklahoma, 2.0 in 1890 and 10.3 in 1900.

No. 7.—ESTIMATED POPULATION ON JULY 1, FOR CONTINENTAL UNITED STATES, 1850 TO 1947, AND FOR ALASKA, HAWAII, AND PUERTO RICO, 1916 TO 1945

[Estimates, except those for continental United States, 1900 to 1947, for Hawaii, 1930 to 1945, and for Puerto Rico, 1940 to 1945, are based on interpolation or extrapolation of census figures. Estimates for continental United States, 1900 to 1999, are sums of State estimates based on available local data indicative of population change. Estimates for continental United States, 1910 to 1947, for Hawaii, 1930 to 1945, and for Puerto Rico, 1940 to 1945, are based on births, deaths, emigration, and immigration. Figures for 1917 to 1919 and 1940 to 1947 include residents of the areas serving in the armed forces]

## No. 9.—ESTIMATED POPULATION ON JULY 1, BY STATES: 1937 TO 1946

(Excludes members of armed forces overseas. Based on data from 1930 and 1940 Federal censuses, State censuses, school statistics, vital statistics, registrations for war ration books, immigration statistics, and data on armed forces. 1940 to 1946 data revised. For enumerated population, 1790 to 1940, see table 5, p. 6)

[In thousands]

**No. 23.—MEDIAN AGE OF URBAN AND RURAL POPULATION, BY RACE AND SEX: 1930 AND 1940**

[DEFINITION OF MEDIAN.—The median may be defined as that item which is in the middle of a series arranged according to size. Thus, the median age is that age which divides a population group into two equal parts, one half being older, and one half younger, than the median. For definition of urban and rural population, see p. 2]

## No. 27.—ENUMERATED POPULATION, 1940, AND FORECASTS, 1955 TO 2000, BY AGE AND SEX

[Forecasts are comparable with census figures for 1940 and earlier years, no adjustment having been made for census underenumeration of children under 5 years of age. These figures constitute 2 of 6 series of forecasts published by Bureau of the Census, each based on different set of assumptions as to fertility, mortality, and immigration after July 1, 1945. Published totals obtained by rounding computed totals and hence not always exactly equal to sum of figures shown by age and sex]

[In thousands]

Source: Department of Commerce, Bureau of the Census; special report of Sixteenth Census, Internal Migration, 1935 to 1940—Color and Sex of Migrants.

No. 33.—MIGRATION STATUS OF THE POPULATION AND TYPE OF MIGRATION, BY SEX, FOR SELECTED PERIODS: 1935 TO 1947

[Migrants defined: In 1940—Persons 5 years old and over who lived in different counties (or quasi counties) in 1940 and 1935. A city of 100,000 inhabitants or more treated as one quasi county and remainder of county as another. In 1947—Persons who lived in different counties in 1947 and 1940. For children under 7 years of age, residence of mother when child was born was used in determining migration status. 1947 figures based on Current Population Survey, see Sampling Note, p. 175.]

# **No. 40.—FOREIGN-BORN WHITE POPULATION, 1910 TO 1940, AND TOTAL FOREIGN-BORN, 1900, BY COUNTRY OF BIRTH**

[All classifications of 1940 population according to country of birth based on political boundaries of Jan. 1, 1937. Classification of population at earlier censuses based for most part on political boundaries of those years. For most countries of Europe, total foreign-born population given for 1900 is almost entirely white]

<sup>1</sup> Less than one-tenth of 1 percent.

<sup>2</sup> Listed as Holland prior to 1910.

<sup>3</sup> Persons reported in 1910 as of Polish mother tongue born in Austria, Germany, and Russia have been deducted from their respective countries and combined as Poland.

<sup>4</sup> Turkey in Asia included with Turkey in Europe prior to 1910.

<sup>5</sup> Includes 4,635 persons born in Serbia and 5,363 persons born in Montenegro, which became part of Yugoslavia in 1918.

<sup>6</sup> Turkey in Asia included Armenia, Palestine, and Syria in 1910. Subsequent to 1910 Armenia included with "Other Asia."

<sup>7</sup> Newfoundland included with Canada in 1900.

### No. 46.—HOUSEHOLDS, BY COLOR OF HEAD, WITH POPULATION PER HOUSEHOLD: 1890 TO 1960

[Figures for 1890 to 1940 based on complete census. Figures for 1941 to 1945 estimated on basis of number of marriages and divorces and allowances for wartime effects on household formation. Figures for 1946 and 1947 based on Current Population Survey, see Sampling Note, p. 175. Figures for 1955 and 1960 based on "medium" projections of previous trends. Statistics for 1900, 1930, and subsequent years represent (private) households only; those for 1890, 1910, and 1920 include the small number of hotels, institutions, and other quasi households. For definition of households, see p. 2]

DATE	HOUSEHOLDS			COLOR OF HEAD			
	Number	Annual increase over preceding date		White		Nonwhite <sup>1</sup>	
		Number	Percent	Number	Percent	Number	Percent
1890 (June 1)	12,690,152		4.93	11,255,169	88.7	1,434,983	11.3
1900 (June 1)	15,963,965	327,361	2.32	14,063,791	88.1	1,900,174	11.9
1910 (Apr. 15)	20,255,555	434,871	2.44				
1920 (Jan. 1)	24,351,876	418,398	1.80	21,826,654	89.6	2,526,022	10.4
1930 (Apr. 1)	29,904,663	541,756	2.02	26,982,994	90.2	2,921,669	9.8
1940 (Apr. 1)	34,948,666	504,400	1.55	31,679,766	90.6	3,268,900	9.4
1941 (July 1)	35,850,000	721,000	2.06				
1942 (July 1)	36,450,000	600,000	1.67				
1943 (July 1)	36,876,000	425,000	1.17				
1944 (July 1)	37,100,000	225,000	.67				
1945 (July 1)	37,500,000	400,000	1.06				
1946 (June 15)	38,183,000	711,000	1.90				
1947 (Apr. 15)	39,138,000	1,151,000	3.02	35,593,000	90.9	3,545,000	9.1
1955 (July 1)	42,925,000	461,000	1.13				
1960 (July 1)	44,775,000	370,000	.85				

<sup>1</sup> Obtained by dividing total population by number of households (members of armed forces excluded 1941 to 1947); hence not strictly average size of household because about 2.5 percent of total population are members of quasi households.

<sup>2</sup> The number of households with a Negro as head was 1,410,769 in 1890; 1,833,759 in 1900; 2,173,018 in 1910; 2,430,825 in 1920; 2,803,756 in 1930; and 3,141,883 in 1940.

Obtained by dividing total population by number of households; hence not strictly average size of household, because about 2.5 per cent of total population are members of quasi households.

<sup>1</sup> Less than 0.1 percent.

No. 56.—GROSS AND NET REPRODUCTION RATES, BY COLOR, URBAN AND RURAL RESIDENCE, AND REGIONS: 1905 TO 1910, 1930 TO 1935, 1935 TO 1940, AND 1942 TO 1947

[Statistics for 1905 to 1910 based on Sample W, and those for 1930 to 1935 and 1935 to 1940 based on Sample O (see p. 1); statistics for 1942 to 1947 based on Current Population Survey made in April 1947, see Sampling Note, p. 175. Urban-rural classification is in accordance with 1940 definitions; see p. 2. A net reproduction rate of 1,000 means that each generation would just replace itself, if birth and death rates of a specified period were to continue indefinitely, in the absence of net immigration. A rate above 1,000 implies a potentially gaining population, and a rate below 1,000, a potentially declining population. A gross reproduction rate of 1,000 means that if all women born at the beginning of a generation were to live through their reproductive period and continue birth rates existing at the time of their birth, they would barely reproduce themselves, assuming no migration from outside the area. Where gross reproduction rate is less than 1,000, no improvement in mortality alone would prevent a potential decline in population]

# No. 58.—INSTITUTIONAL POPULATION 14 YEARS OLD AND OVER—SUMMARY FOR THE UNITED STATES: 1940

[Figures cover persons who were reported in the 1940 census as inmates of public or private institutions of specified types. Officials and attendants were excluded, as were patients in general hospitals and tuberculosis sanitariums. Persons in religious institutions and Veterans' Administration facilities were included only if the establishment had a majority of delinquents, mental patients, aged, or incurables]

## **2. Vital Statistics**

### **(Including health and medical care)**

Vital statistics, including statistics of births, deaths, and marriages and divorces are compiled on a national basis by the National Office of Vital Statistics, U. S. Public Health Service. Prior to the transfer of the vital statistics functions of the Federal Government on July 16, 1946, from the Department of Commerce to the Federal Security Agency, this activity was carried on in the Bureau of the Census.

**Births and deaths.**—The national collection of mortality statistics on an annual basis was begun in 1900. The national death-registration area for 1900 consisted of 10 States, the District of Columbia, and a number of cities in non-registration States. The area gradually expanded in succeeding years until in 1933 it comprised the entire United States.

The national collection of birth statistics was begun in 1915 with 10 States and the District of Columbia. The registration of births in 1940 was estimated to be 92.3 percent complete and to have increased to 94.1 percent by 1944.

In the following tables, births and deaths for 1940 and subsequent years are shown by place of residence <sup>1</sup> of the mother or of the decedent; those for earlier years by place of occurrence of the birth or death. Statistics by place of occurrence for the entire United States do not differ from those tabulated by place of residence. Those for geographic subdivisions differ largely because of the movement of patients or prospective mothers from their homes to areas where hospital facilities are available. See table 64 for a comparison of the numbers of births and deaths tabulated by place of occurrence and by place of residence for States and table 65 for a similar comparison for cities.

Death statistics include only deaths occurring in the continental United States and exclude deaths of military personnel overseas. Stillbirths are excluded from both birth and death statistics.

**Marriage and divorce.**—Collections of statistics on the numbers of marriages and divorces in the United States were made for the years, 1867–1906, 1916, 1922–32, and 1937–46, except that no national collections on statistics of marriage were made in 1941–43. Estimates have been made for the intervening years as well as for years in which returns were not complete. Statistics on marriage have been estimated from partial returns for the years 1867–1906, whereas those for 1922–32 are based on reports for all counties. For the remaining years in which statistics were collected, more than 90 percent of all counties were covered. Returns on divorces were considered practically complete for all collection years prior to 1941.

In addition to statistics on the numbers of marriages and divorces, more extensive and detailed information on both marriage and divorce was collected for 1939–40 from those States having central systems of registration. At the present time, records of marriage are collected centrally in almost three-fourths of the States, and records of divorces, in about one-half of the States.

---

<sup>1</sup> For a discussion of methods of residence allocation and of significance of residence figures, see *Vital Statistics of the United States*, 1945, Part II, pp. V–X.

**Birth and death rates.**—Birth and death rates are based upon estimates of the midyear population. For 1940 and subsequent years, use is made of several types of population bases. Thus, birth rates for the United States are based on estimates of the total population including members of the armed forces overseas; those for States on estimates of the civilian population in the States. Death rates for the United States for these years are based on estimates of the population excluding members of the armed forces overseas; those for States on estimates of the total population, both civilian and military in the State.

Because of the unprecedented movement of the population during the war and immediate postwar period, the changes in the birth and death rates for these years need to be interpreted with care.<sup>2</sup> Part of the increase or decrease in the rates may be accounted for by the changes in the age, race, and sex composition of the population in the area. Of particular significance in this connection were the concentration of military forces in certain areas, the movement to overseas duty of a large number of men in the armed forces, and their subsequent return.

In addition to the birth and death statistics, published by the National Office of Vital Statistics, there are reports for the States issued by the individual State bureaus of vital statistics. Ordinarily these publications contain more details relating to the geographic and political subdivisions of the States.

**Morbidity.**—Statistics on morbidity are compiled and published by the U. S. Public Health Service. Each State health officer reports all diseases that are required by law or regulation to be reported in his State. The lists of diseases required to be reported are not the same for each State, although the most common communicable diseases are notifiable in all the States. Tables 88 and 89 show data on these notifiable diseases. Although it is recognized that morbidity reports vary in degree of completeness of reporting of cases, these data indicate a trend by providing a comparison with similar figures for prior time periods.

In addition, data on illnesses are obtained by special surveys. The most comprehensive survey in this field is the National Health Survey made in 1935–36. A number of reports based on this survey have been published by the U. S. Public Health Service and a few by other agencies. Reprint No. 2384 from the Public Health Reports for May 29, 1942, gives a rather complete list of publications based on the National Health Survey.

**Medical care.**—Annual statistics of medical care on a Nation-wide basis are limited to data on hospital facilities obtained from the annual census of hospitals and institutions conducted by the American Medical Association. Such censuses include only hospitals, sanatoriums, and related institutions registered by that organization. Therefore, a relatively large number of institutions are not included in the survey. However, practically all of the large institutions in the country are canvassed with the result that most of the hospital bed facilities are usually included.

An index to one aspect of medical care is also provided by the numbers of births and deaths occurring in hospitals and institutions. These data may be found in the U. S. Public Health Service publications on vital statistics. Another aspect of medical care is provided by statistics on patients in hospitals for mental disease, and in institutions for mental defectives and epileptics. During the period, 1926–1946, the Bureau of the Census collected each year data on the admissions, discharges, and deaths in these institutions, as well as those on the characteristics of the patient population. Beginning with the report for 1947, this activity will be carried on by the Mental Hygiene Division, U. S. Public Health Service, Federal Security Agency.

---

<sup>1</sup> Results of a field investigation in Jefferson County, received too late for inclusion, change the percentage completeness from 85.0 to 85.2.

<sup>2</sup> Percentage is based on fewer than 100 records.

<sup>3</sup> Results of a field investigation in New York State (exclusive of New York City), received too late for inclusion, raise the percentage completeness from 98.7 to 98.9 percent.

### **3. Crime and Criminals**

Criminal justice is administered in the United States for the most part by State and local officers and agencies. The United States Constitution reserves to the States the general police powers and only offenses against the United States Government or those which involve the crossing of State lines or an interference with interstate commerce can be made Federal offenses by act of Congress. Consequently, unless they occur in Federal territories or reservations, or on the high seas, or are committed by members of the armed forces, the usual criminal offenses such as murder, robbery, burglary, theft, assault, and rape are violations of State laws. There are fifty separate and distinct criminal law jurisdictions in the United States, one in each of the forty-eight States, one in the District of Columbia set up by act of Congress, and the Federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. Yet the general system of law enforcement is quite similar from State to State. Of course, there are among the States differences in detail and often substantial differences in the penalties provided for like offenses.

The administration of criminal justice can be divided into three parts. The first covers the activities of the police agencies, namely the investigation of crimes and the apprehension of persons suspected of committing them. This function involves agencies such as municipal police, county police, State police, sheriffs, constables, marshals, Federal agents, and many kinds of special officers. The second phase of the administration of criminal justice is the prosecution of those charged with criminal offenses to determine whether they are in fact guilty. The agencies concerned include the courts, justices of the peace, municipal, State and Federal grand juries, and prosecuting court officers. The third division of criminal administration is concerned with the punishment or treatment of those convicted of crime. While the courts usually determine the sentence after conviction, the administration of the penalty is carried out by prison, reformatory, jail, probation and parole officials.

Nearly all statistical data on crime and criminals are derived from the records and reports of the various agencies engaged in the administration of criminal law. Police statistics present the number of offenses reported, the number of persons arrested, and the offenses cleared by arrest. Arrest records provide data concerning sex, age, race, and other characteristics of the persons arrested and charged with crime. As the police agencies are largely local, a real problem is involved in collecting statistical data from the large number of such agencies. The Federal Bureau of Investigation obtains reports from police agencies and publishes information for the country as a whole in its semi-annual bulletin, Uniform Crime Reports. The great majority of urban communities are now reporting to the Federal Bureau and the reports received cover more than half of the population of the United States. Information concerning offenses known to the police and the sex and age of persons arrested are shown by offense. Tables 101-105 are taken from Uniform Crime Reports. No centralized information is available on the police activities of the Federal agencies. Some information concerning the work of each Federal agency will be found in its respective annual report.

Court statistics for the country as a whole showing the number of persons prosecuted for criminal offenses and the outcome of the prosecutions are quite incomplete. In many States, an annual or biennial publication presents data on the criminal cases disposed of in the trial courts. This information may be published by the State Judicial Council or the Attorney General or some other State agency. The only national compilation of such information was that made by the Bureau of the Census which annually

published statistical data on criminal cases disposed of in the general trial courts of from sixteen to thirty States including the District of Columbia. No national collection is now made. Comprehensive information is collected on the work of the Federal courts by the Administrative Office of the United States Courts. Tables 106 and 108 are prepared from the data published by that office.

Statistics of prisoners committed to penal institutions have been collected and published for a longer period of time than have other criminal statistics. Nearly every State publishes annual data either for the whole prison system or for each separate State institution. A national compilation of data on prisoners in Federal and State prisons and reformatories is made annually by the Bureau of the Census. Statistical information covering persons received and discharged from State prisons and reformatories in forty-six of the forty-eight States and from the District of Columbia and Federal prison systems is published annually in a comprehensive report. Tables 110-114 present data from these reports. The Federal Bureau of Prisons, in its annual report, Federal Prisons, provides as complete statistical information on prisoners as has been issued in this country. Tables 107 and 109 are from this source.

Information concerning juvenile delinquents and juvenile delinquency and the operation of many juvenile courts is collected and published by the United States Children's Bureau, Department of Labor.

Information on the prosecution and disposition of persons charged with misdemeanors and other minor offenses in the justice of the peace and municipal courts of the country is not compiled at the present time. Statistical data on such prosecutions may be found for some of the larger cities in the annual reports of the municipal court or of the municipal government. Likewise, there is no general compilation of statistical data on persons confined to county jails and local workhouses. The Bureau of the Census made a survey of jail prisoners for the calendar year 1933 and some information on incarcerated prisoners was published in connection with the 1940 decennial census but there is at present no regular compilation covering this field.

No. 105.—ARRESTS BY AGE GROUPS: 1946

[Data from arrest records, evidenced by fingerprint cards received at F. B. I. during year, are limited to instances of arrests for violations of State laws and municipal ordinances. Excludes fingerprint cards representing arrests for violations of Federal laws or representing commitments to any type of penal institution. Data do not represent all persons arrested, as fingerprint cards are not forwarded to Washington for every individual taken into custody. Arrest records in lower age groups probably incomplete because of practice of some jurisdictions not to fingerprint youthful offenders.]

## 4. Immigration, Emigration, and Naturalization

Aliens or citizens arriving or departing by vessel or airplane at ports other than land border ports of the United States are recorded on passenger and crew lists or manifests by officials of the transportation companies, these lists or manifests being delivered to the Immigration and Naturalization Service of the Department of Justice. Persons going by land or air between Mexico or Canada and the United States are required to enter or depart at land border stations where they are registered by officers of the Immigration and Naturalization Service. Statistics of immigration and emigration are prepared from these and other records by the Immigration and Naturalization Service.

**Immigration.**—Although the reporting of alien arrivals was required at an early date in certain of the colonies and original States, the continuous record of immigration to the United States begins with the fiscal year ending September 30, 1820. Under the Act of March 2, 1819, passenger lists for all vessels arriving from foreign places were to be delivered to the local collector of customs, copies transmitted to the Secretary of State, and the information reported to Congress. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Bureau of Statistics of the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Annual reports were issued by this bureau from 1892 to 1932. From 1933 to 1940, a summary of the work of the Immigration and Naturalization Service was given in the Annual Reports of the Secretary of Labor. For 1941, the Annual Report of the Attorney General contained a report on immigration and naturalization. No report was published for 1942. For subsequent fiscal years, Annual Reports of the Immigration and Naturalization Service (submitted by the Commissioner to the Attorney General) were published in mimeographed form.

Since 1820 the official immigration statistics (see table 116) have changed considerably in completeness and in the basis of reporting. The early figures were for arrivals at Atlantic and Gulf coast seaports of the United States. Pacific coast arrivals were first reported in 1850. Aliens arriving at Canadian seaports en route to the United States were included after 1893. The reporting of arrivals over the land borders began in 1904 and was gradually extended up to 1908. Hawaii, Puerto Rico, and Alaska were treated as integral parts of the United States for purposes of immigration and emigration statistics beginning in 1901, 1902, and 1904 respectively. Travel between the Philippine Islands and the United States was not treated as immigration or emigration between July 1, 1898 and May 1, 1934.

Prior to 1868 arriving alien passengers were recorded, thereafter immigrant arrivals (i. e., omitting aliens coming for temporary stay). Subsequent to the passage of the Act of 1891 which increased the number of excludable classes, the basis of reporting was changed from arrivals to admissions (i. e., omitting aliens not permitted to enter the United States), except for the period 1895 to 1897, inclusive, when the reporting of arrivals was resumed.

Two classes of alien admissions are now reported, immigrant and nonimmigrant (see table 117). Included in the nonimmigrant class are aliens admitted under section 3 of the Immigration Act of 1924 (see table 125), returning resident aliens, students, and others. An immigrant alien is defined as an alien, other than a returning resident, admitted for permanent residence, under either quota or nonquota status. Nonquota immigrants admitted comprise immigrants born in Canada, Newfoundland, Mexico, Cuba, Haiti, the Dominican Republic, the Canal Zone, and independent countries of Central and South America, and their wives and unmarried children under age 18 if accompanying or following to join such immigrants; relatives of citizens of the United

States (wives, husbands, unmarried children under age 21); ministers and professors who enter solely for the purpose of carrying on their vocations, and their wives and unmarried children under age 18, if accompanying or following to join such ministers and professors; and others. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included either in the immigrant or nonimmigrant totals.

**Emigration.**—No official record of emigration was kept prior to July 1, 1907. Alien departures are classified as emigrant and nonemigrant (see table 117). For statistical purposes an alien emigrant is an alien resident of the United States departing with the declared intention of residing permanently in a foreign country. The nonemigrant category includes both alien residents of the United States departing for a temporary sojourn abroad, and aliens leaving the United States after a temporary stay.

**Naturalization.**—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of naturalization issued. Naturalization statistics were originally compiled by the Bureau of Immigration and Naturalization of the Department of Commerce and Labor, now the Immigration and Naturalization Service of the Department of Justice.

**Alien registration.**—The Act of June 28, 1940, required the registration of all aliens remaining in the United States (including Alaska, Hawaii, Puerto Rico, and the Virgin Islands) for a period of thirty days or longer. Aliens resident in the United States on August 27, 1940, were required to register on or before December 26, 1940. Aliens arriving subsequent to August 27, 1940, and not registered by the consul granting visas were required to register within thirty days of arrival. Aliens having their first or second naturalization papers were not exempt from the registration requirements, but those whose petitions for naturalization were pending and who expected to be naturalized prior to December 26, 1940, were instructed not to register. Registration was not required of officials of foreign governments and members of their families. Persons whose citizenship status was not clearly defined were advised to register.

The reported total of alien registrations includes registrations during the period August 27 to December 26, 1940, together with subsequent registrations of aliens who entered the United States prior to January 1, 1941. The total does not include seaman registrations.

**No. 115.—ESTIMATED RESIDENT ALIENS IN CONTINENTAL UNITED STATES, FOR SELECTED DATES: 1941 TO 1945**

DATE	Number of aliens <sup>1</sup>	CHANGE IN PRECEDING PERIOD

## No. 120.—IMMIGRATION, BY COUNTRY OF ORIGIN, BY DECADES: 1851 TO 1940

[Data are totals, not annual averages, and are for periods ending June 30, except as noted. From 1851 to 1897 figures represent alien passengers arriving; for 1898 to 1899 inclusive and 1896 to 1897 inclusive, immigrant alien arrivals; for 1892 to 1894 and for 1898 to the present time, immigrant aliens admitted. Data prior to 1906 refer to country whence aliens came; thereafter, country of last permanent residence. Because of boundary changes and changes in list of countries separately reported, data for certain countries not comparable throughout.]

<sup>1</sup> Jan. 1, 1851 to Dec. 31, 1860; and Jan. 1, 1861 to June 30, 1870.

<sup>2</sup> Includes Serbia and Montenegro prior to 1920.

<sup>3</sup> Known as Irish Free State, 1922-1927.

<sup>4</sup> Austria included with Germany 1938-40.

<sup>5</sup> From 1899 to 1919 Poland is included with Austria-Hungary, Germany, and Russia.

<sup>6</sup> Included in "All other countries" in 1892.

<sup>7</sup> Included in "All other countries" in 1892; in "Other Asia" in 1893 and 1894.

<sup>8</sup> Immigrants from Canada, Newfoundland, and Mexico not reported from 1886 to 1893, inclusive.

<sup>9</sup> Included in "All other countries" in 1892 and 1893.

<sup>10</sup> Includes 32,897 persons returning to their homes in the United States. After 1906 such aliens have been included in immigration statistics as nonimmigrants; prior to that year, aliens were recorded by countries whence they came (see headnote).

**No. 124.—ANNUAL QUOTAS ALLOTTED AND QUOTA IMMIGRANTS ADMITTED, BY  
QUOTA COUNTRY OR REGION: YEARS ENDING JUNE 30, 1925 TO 1947**

[Number of aliens admitted annually of any nationality subject to the quota law was limited by Immigration Act of 1921 to 3 percent of number of foreign-born of such nationality resident in continental United States as determined by 1910 census; and by population plan of act of 1924, to 2 percent according to 1890 census. National origins clause of 1924 act, effective July 1, 1929, provided that quota of any nationality be computed by applying to 150,000 the ratio between calculated number of inhabitants in continental United States in 1920 owing their origin to nationality concerned and the total inhabitants in the United States of all nationalities subject to quota law. (For estimates of white population by countries of origin, calculated as a basis for immigration quotas, see table 97, Statistical Abstract, 1932.) Under 1924 act, minimum quota is 100; for nonquota classes, see general note, p. 102]

<sup>1</sup> Persons born in colonies, dependencies, or protectorates, or portions thereof within barred zone, of European countries, who are admissible under immigration laws of United States as quota immigrants, are charged to quota of country to which such colony or dependency belongs or by which it is administered as a protectorate. Aliens who obtain visas during latter part of fiscal year may be admitted in following year since visas are valid for period of 4 months. Nationality for quota purposes does not always coincide with actual nationality (Sec. 12, Immigration Act of 1924).

<sup>2</sup> Quota was 153,774 from 1934 to February 8, 1944, when quota of 105 Chinese, authorized by act of December 17, 1943 increased the maximum quota to 153,879. On July 4, 1946, quota for Philippine Islands was increased from 50 to 100, thereby raising total quota to 153,929. Total quota for 1930 and 1931 was 153,714; for 1932 and 1933, 153,831; the Soviet Union's quota was 2,784 for 1930 and 1931, and 2,701 for 1932 and 1933; Rumania's, 295 prior to 1934. There were also changes in 1932 and 1933 for certain countries included in "Other Europe," Asia, and Pacific islands.

<sup>3</sup> Eire known as Irish Free State, 1922 to 1927.

<sup>4</sup> For 1938 to 1945, Austrian quota included with German.

## 5. Education

Data on school attendance and on highest grade of school completed were obtained for each person in the United States as part of the 1940 Census of Population (see tables 134-143). Annually, beginning in 1945, the Bureau of the Census has reported on school enrollment (and in 1947 on educational attainment) of the population, based on sample data obtained in the Current Population Survey (see tables 136, 137, and 141). The Biennial Survey of Education, conducted by the U. S. Office of Education, covers enrollment and attendance, teaching staff, finances, and other information on public education facilities at all levels, with less complete information for private schools (see tables 144-165). Other statistical studies of the U. S. Office of Education, publications of the National Education Association, Annual or Biennial Reports of the State Departments of Education, and educational journals are the other chief regular sources of statistical materials in the field of education. Many special studies are made by research divisions of city school systems, by schools of education in colleges and universities, and by educational foundations.

**Educational statistics for individuals.**—The school attendance statistics compiled from the 1940 Population Census are based on the replies to the enumerator's inquiry as to whether the person had attended, or had been enrolled in, any regular school or college between March 1 and April 1, 1940. Night schools, extension schools, or vocational schools are not included unless they are a part of the regular school system; and no correspondence schools are included.

The same census, for the first time, included a question on the formal educational attainment of each person, that is, the last full grade that the person had completed in the regular school system—public, private, or parochial school, college, or university. This question replaced the inquiry on illiteracy included in previous censuses.

The *median* year of school completed may be defined as the year which divides the population group into equal parts—one-half having completed more schooling and one-half having completed less schooling than the median. In the presentation of median year of school completed, the completion of the first year of high school is uniformly indicated by 9 and of the last year of college by 16, although there are some areas with only 7 years of elementary school.

**Statistics for schools.**—Working through national committees since 1910, the U. S. Office of Education, in cooperation with the State departments of education, has brought about a considerable degree of uniformity in recording and reporting educational statistics. Since about 1930, a similar movement has been in progress with institutions of higher education, the U. S. Office of Education serving as a clearing house for uniform procedures in records and reports.

The statistics presented in the Abstract from the Biennial Survey of Education include current national totals and summaries for a period of years. The national totals are reasonably complete for the types of education covered but data are not included for private schools of art, music, drama, etc., for private trade and vocational schools, or private correspondence schools. The introduction of the junior high school, which includes the 7th and 8th grades from the traditional elementary school and the 9th grade from the regular high school, has made it impossible to compare elementary school or high school data over a period of years except on the basis of grade enrollment, 8 grades as elementary and 4 grades as secondary. Similarly the change in status of a large number of normal schools and teachers' colleges to State colleges and universities makes comparison of normal schools and teachers' colleges over a period of years nonrepresentative of the complete teacher training field. Detailed statistics on the major fields of education are published in the reports of the Biennial Survey of Education. Information on vocational education is compiled by the U. S. Office of Education (see tables 166-168). Data on vocational rehabilitation are compiled by the Office of Vocational Rehabilitation (see table 169).

Data in this section relate to continental United States except as noted.

**No. 134.—PERSONS ATTENDING SCHOOL BY SINGLE YEARS OF AGE FROM 5 TO 20,  
BY SEX: 1910 TO 1940**

[Statistics for 1940 are based on attendance at or enrollment in any regular school or college, including night schools, extension schools, or vocational schools, if part of regular school system. Excludes correspondence schools. In the 3 prior censuses, school attendance question not restricted as to type of school or college. In 1940, question referred to period between Mar. 1, and Apr. 1, 1940; in 1930, to period between Sept. 1, 1929, and Apr. 1, 1930; and in 1920 and 1910, to period between preceding Sept. 1 and census date (Jan. 1)]

<sup>1</sup> Census enumeration as of June 1, 1870 to 1900; Apr. 15, 1910; Jan. 1, 1920; Apr. 1, 1930 and 1940.  
<sup>2</sup> Excluding population of Indian Territory which is not covered by public-school statistics, and also, for 1890, population of Indian reservations. These were not enumerated at censuses prior to 1890.  
<sup>3</sup> Current expense, capital outlays, and interest.  
<sup>4</sup> Census estimates for July 1.  
<sup>5</sup> Beginning 1920, based on total number of teachers, supervisors, and principals.  
<sup>6</sup> Beginning 1920, excludes data for night, summer, part-time, and continuation schools separately reported.

Source (except for population statistics and estimates): Federal Security Agency, Office of Education; Biennial Survey of Education, chapter on Statistical Summary of Education and chapter on Statistics of State School Systems. 1945 data from statistical circular, February 1947, Statistics of State School Systems, 1944-45.

**No. 145.—PUBLIC ELEMENTARY AND SECONDARY SCHOOLS—NUMBER, 1944,  
ENROLLMENT AND ATTENDANCE, 1945, BY STATES AND OUTLYING AREAS**

(Includes data for kindergartens. Excludes data for residential schools for exceptional children, observation and practice schools, and preparatory departments of colleges and universities)

**No. 166.—VOCATIONAL SCHOOLS AND VOCATIONAL TEACHER-TRAINING COURSES, FEDERALLY AIDED—NUMBER OF TEACHERS AND STUDENTS, BY CLASS OF SCHOOL OR COURSE AND BY SEX: YEARS ENDING JUNE 30, 1920 TO 1946**

(Institutions Federally aided are reimbursed from Federal funds provided under act known as "The Smith-Hughes Act," or the "National Vocational Education Act of 1917," and subsequent acts extending benefits of vocational education to Alaska, Hawaii, and Puerto Rico, and providing for further development of vocational education. These acts, administered by Office of Education provide appropriations for reimbursement in part from Federal funds for expenditures by States and local communities for vocational education. Includes data for Hawaii beginning 1930, for Puerto Rico beginning 1938, and for Alaska beginning 1937)

**No. 169.—VOCATIONAL REHABILITATION OF DISABLED PERSONS, BY NUMBER REHABILITATED AND IN PROCESS OF REHABILITATION, BY STATES, AND FOR DISTRICT OF COLUMBIA, HAWAII, AND PUERTO RICO: 1930 TO 1947**

[The Vocational Rehabilitation Amendments of 1943 (Public Law 113) expanded Federal-State program for vocational rehabilitation of civilians injured in industry or by accident or illness, or impaired by congenital defect. Scope of services now includes any services necessary to render disabled persons employable or to become more advantageously employable. Program is in operation in the 48 States, the District of Columbia, Hawaii, and Puerto Rico. Figures given relate to cases aided by Federal and State funds. Total expenditures in 1947 (fiscal year) comprised: Federal funds \$14,188,933; State funds \$5,124,411 (subject to final audit)]

## 6. Climate

Climatological data are gathered by the United States Weather Bureau at about 5,500 stations, of which number about 500 have automatic or hourly readings and the remainder one observation a day. There are few records in existence for stations before 1871, although some earlier and less detailed records began in the 18th century. Data shown in these tables include long-time averages and extremes of the several elements for the vicinities indicated. Where the station has moved, but not out of the general vicinity, the data represent combined values for both the previous and the new locations.

The following tables contain data from a list of cities selected to give a general representation of the climate over the United States. The average mean-temperature values have been adjusted occasionally to those of other long-record stations in the vicinity, in order that they might be representative of conditions in the local area. In all other tables the averages represent the arithmetic means of the period of record at the present station location within each city. Relative humidity averages are based on 3 to 4 daily observations.

The number of degree-days as used in table 182 is the average monthly sum of the positive differences between 65° and the daily mean temperatures. Experience has shown that, in order to heat buildings to a temperature of approximately 70°, the amount of fuel or heat used per day is proportional to the number of degrees the average outside temperature falls, below 65°. The degree-day value is based on this assumption.

## 7. Public Lands and National Park System

The term "public lands," as used here, includes only those Federally owned lands to which the general body of public land laws apply. (See title 43 of the Code of Federal Regulations.) In general, it includes the lands acquired by the United States through cession and treaty and certain other lands declared by the Congress specifically to be "public lands," that is, subject to the public land laws. As a general rule, it excludes lands acquired by the United States from private owners and from State and local governments by purchase, donation, condemnation, etc. The term "Indian lands," used here to differentiate such lands from other public lands, refers to lands ceded to the United States by Indian tribes and held in trust for the Indians by the Government.

An entry or selection is a claim to a given tract of public land. An original entry or selection is a claim allowed under the law but subject to certain conditions before title can pass. A perfected entry is a claim finally approved after required lapse of time and compliance with other conditions. A patent or certification is an instrument of conveyance or grant to a claimant whose entry or selection has been finally approved.

For table on trend in land utilization, see p. 601.

### No. 188.—PUBLIC AND INDIAN LAND, ENTRIES UNDER ALL ACTS—ACREAGE, BY STATES: YEARS ENDING JUNE 30, 1931 TO 1947

## 8. Labor Force, Employment, and Pay Rolls

The various series of labor statistics covered in this section may be classified as of one of two types and these types differ somewhat in concept and purpose. One type of labor statistics is obtained by the "population approach," and includes data from the Census of Population and the Current Population Survey of the Bureau of the Census. These surveys involve an enumeration of individual persons and obtain information on employment activity from workers or members of their households. Each employed worker is counted only once, even though he may have held two or more jobs during a given period. The population approach permits a direct enumeration not only of employed persons but also of unemployed workers, the self-employed, domestic servants, service trade workers, and others who are not found on the pay rolls of any establishment.

The second type of labor statistics is obtained by the "establishment approach," and includes data from the monthly series of the Bureau of Agricultural Economics of the Department of Agriculture and of the Bureau of Labor Statistics. These data are similar to those provided by the Census of Manufactures and other industrial censuses in that they are based on reports from employers; i. e., farms, businesses, or industrial establishments. In adding together reports of different employers the establishment approach counts twice or more any worker who works for two or more employers during a given pay-roll period, but permits a better analysis of such data as wages, hours, labor turn-over, and industry affiliation which can be more accurately obtained from employers' records than by inquiries directed to a worker or a member of his household. Because the coverage of all employees of an establishment in a single report provides information on a large number of workers in a specific industry, the establishment approach is particularly adapted to the measurement of short-term changes in employment for many important industries. However, the methods usually used in the collection of statistics from establishments do not provide for adequate representation of new establishments coming into business and thus may yield estimates of employment that are subject to a cumulative bias which becomes more serious in the measurement of long term changes. It has been the practice to correct for this bias by periodic adjustment to "benchmark" data from industrial censuses, tabulations of employer reports obtained in connection with Social Security programs, and other sources. In manufacturing, this bias is anticipated by correcting the current figures on the basis of past experience.

The labor force as now commonly defined in surveys utilizing the population approach includes persons 14 years old and over who had a job or were seeking one during a specified week. (For detailed definitions of various work status classes, see footnotes to table 195.) Population censuses earlier than 1940 used instead a concept of "gainful workers." This differed from the labor force concept in that it included all persons 10 years old and over who reported a gainful occupation, regardless of whether or not they were working or seeking work at the time of the census, and excluded in general new job seekers without previous experience in a gainful occupation.<sup>1</sup> The Decennial Census of Population provides detailed data for the United States as a whole and for each State, city, and other area, including personal characteristics (sex, age, color, etc.) of the labor force, the numbers employed and unemployed, the number

---

<sup>1</sup> See Estimates of Labor Force, Employment, and Unemployment in the United States, 1940 and 1930, Sixteenth Census of Population. Table 196 in the Abstract presents 1940 and 1930 data adjusted insofar as possible to a comparable basis.

reporting themselves in each occupation and in each industry, and other items. The data presented from the Monthly Report on the Labor Force include national totals, by sex and age, of the number of persons in the civilian labor force, the number employed in nonagricultural industry, the number employed in agriculture, the number unemployed, and the number of nonworkers. Data on hours of work are also provided. The report is based on the Census Bureau's Current Population Survey, a monthly enumeration of approximately 25,000 households throughout the United States.

The establishment-type series are available for both agricultural and nonagricultural employment. Agricultural employment estimates have been issued since 1909 by the Department of Agriculture. These estimates are obtained by means of monthly mail returns from crop reporters.

The monthly estimates of employment in nonagricultural establishments prepared by the Bureau of Labor Statistics are based on voluntary reports from about 150,000 establishments in 154 manufacturing industries and in selected nonmanufacturing industries, supplemented by data from other government agencies and adjusted at intervals to data from tabulations of reports under Social Security programs. These estimates exclude proprietors of unincorporated businesses, self-employed persons, domestic servants, and unpaid family workers, most of whom cannot be easily covered by the establishment approach. Persons in the armed forces are also excluded. Estimates are available for total employment for the major industry divisions, for 20 manufacturing groups, and for selected nonmanufacturing industries. Employment data as well as indexes of employment and pay rolls, average weekly hours, and average weekly and hourly earnings are available in greater detail for production and related workers in manufacturing, mining, power laundries, and cleaning and dyeing industries, and for non-supervisory employees and working supervisors in other nonmanufacturing industries.

For government and certain other segments of employment, the employment reports of the Bureau of Labor Statistics are supplemented by data from the Interstate Commerce Commission, the Maritime Commission, the Civil Service Commission, the Bureau of the Census, and other agencies.

Labor turn-over estimates are published monthly by the Bureau of Labor Statistics for 64 industries in 19 major divisions in manufacturing, and for selected nonmanufacturing industries, on the basis of voluntary reports from 9,000 firms. There are a number of significant differences between the turn-over data and the Bureau of Labor Statistics employment and pay-roll reports. The turn-over data now relate to all employees whereas the employment and pay-roll estimates for detailed industries refer generally to production and related workers only. The turn-over series are based on data covering the entire month rather than the pay-roll period ending nearest the middle of the month. Further, in the turn-over series the establishments are now classified according to current industry, while the prewar industrial classification has been maintained in the employment and pay-roll statistics.

Statistical data on work stoppages due to labor-management disputes cannot be collected in the same fashion as other labor information since such stoppages are sporadic and cannot be covered by a routine periodic reporting service. The basic measures in strike statistics as now compiled by the Bureau of Labor Statistics are the number of stoppages, the number of persons on strike, and the number of man-days of idleness involved. Questionnaires are sent to all parties concerned in each strike (employers, unions, and any interested outside agent, such as a conciliator) to obtain detailed and authentic information. From the data given on the schedules, the Bureau prepares annual reports (published in the May Monthly Labor Review and later in bulletin form) which give not only the complete and verified total figures for each month of the year but also analyses on strikes by industry, State, city, and by causes, results, labor organizations involved, and other pertinent classifications.

[illegible]

Incidents & persons at work—persons who worked for pay or profit or were employed to work in the U.S. in 1940 in private work or emergency Federal, State, or local government work or engaged in their own or a family farm or in a family business; and persons with a job but not a wage or salary who actually at work and not seeking work during the week of Mar. 24-30, 1940, but with jobs, no income, or personal or household work which they were temporarily absent because of vacation, illness, industrial dispute, that exceeded 1 week with definite instructions to return to work on a specified date. The category "unemployed persons on public emergency work" includes not only employees but also proprietors, partners, other self-employed persons, and unpaid family workers.

<sup>1</sup> Includes persons who, during the week of Mar. 24-30, 1940, were at work out of season for public emergency work projects conducted by the Work Projects Administration (WPA), the National Youth Administration (NYA), the Civilian Conservation Corps (CCC), or State or local work relief agencies. In the interpretation of the data for persons on public emergency work, allowance must be made for the undercounting in the census returns of considerable numbers of public emergency workers. The number of persons reported in the census as on public emergency work in the United States was 2,39,044, whereas the number recorded on the pay rolls of the Federal emergency work agencies at about the time of the census was 2,444,140 including the NYA Student Work Program, and 3,377,978 including that program. The most common type of misclassification was the reporting of the emergency workers as *At work*. Persons on the NYA Student Work Program were very frequently reported as in school and not in the labor force. There is also evidence that a considerable number of emergency workers were classified as *Seeking work*.

<sup>1</sup> Includes persons without work of any sort in the week of Mar. 24-30, 1944, who were working week starting that week. This category is composed of both experienced and new workers, the latter being persons who had not previously worked full time for 1 month or more.

**No. 196.—ESTIMATED NUMBER OF PERSONS IN THE LABOR FORCE, 1930, AND ADJUSTED NUMBER IN THE LABOR FORCE, 1940, BY EMPLOYMENT STATUS, BY AGE AND SEX**

[Figures in thousands. Figures for 1930 in this table are estimates according to the 1940 employment status classification. An allowance was made in each age group for persons whose age was not reported in the 1930 census. Figures for 1940 in this table show data adjusted to take account of the misclassification of public emergency workers in the census returns (see note 2, table 195) and of persons whose employment status was not reported in the census. Since the data in this table are not available by occupation, industry, race, or other characteristics, or for areas other than the United States as a whole, it is necessary to use unadjusted figures for the labor force in 1940 and for gainful workers in 1930 and earlier years, as shown in tables 195, 197-199, 203-209.]

<sup>1</sup> Figures for 1900 to 1930 represent gainful workers, that is, persons reported as having a gainful occupation in which they earned money or a money equivalent, or in which they assisted in the production of marketable goods, regardless of whether they were working or seeking work at the time of the census. Figures are, therefore, not strictly comparable with those in the labor force for 1940, shown in table 196 and in following tables.

<sup>2</sup> Including data for age unknown.

# No. 200.—EMPLOYMENT STATUS OF THE NONINSTITUTIONAL POPULATION, BY SEX: 1940 TO 1947

[Thousands of persons 14 years old and over. Figures exclude inmates of specified institutions (see footnote, table 199). Unemployed persons include persons looking for work and persons on public emergency work projects. Data in tables 200-202, based on Current Population Survey (see Sampling Note p. 175), are not entirely comparable with those presented in tables 195-197, 199 and 203-209, which are based on reports of the 1940 census. For an explanation of differences, see Department of Commerce, Bureau of the Census; Current Population Reports—Labor Force Bulletin (Series P-60, No. 2)

## Sampling Note

The sample used for the Current Population Survey (Monthly Report on the Labor Force) consists of approximately 25,000 households living in 125 counties and independent cities grouped in 68 areas. The chances are about 19 in 20 that the relative sampling variability of the estimated totals presented from the labor force survey are less than the following:

SEX	CIVILIAN LABOR FORCE			Not in the labor force
	Total	Employed	Unemployed	
	Percent	Percent	Percent	Percent
Both sexes.....	2	2	18	4
Male.....	2	2	18	4
Female.....	5	5	20	2

The percentages shown in this table represent the maximum differences to be expected between totals estimated from the sample and those that would have been obtained by a complete census following the same procedures. These percentages are themselves subject to variation in different time periods, particularly as the magnitudes being estimated change in level. Estimates of change from one month to the next are subject to somewhat smaller sampling variability for some of the items.

The sampling variability indicated above is illustrative of the variability that is to be expected for other subjects, such as urban-rural distributions, migration, occupation, education, marital status, race, family relationships, income, etc. For specific evaluation of the sampling variability relating to these subjects, see the original releases of the Bureau of the Census.

**No. 202.—PERSONS EMPLOYED IN AGRICULTURE AND IN NONAGRICULTURAL INDUSTRIES, BY HOURS WORKED DURING THE SURVEY WEEK: 1940 TO 1947**

[Thousands of persons 14 years old and over. Figures for employment in agriculture and in nonagricultural industries are not entirely comparable with figures shown in tables 208 and 209. See headnote, table 200]

ANNUAL AVERAGE OR MONTHLY ESTIMATE	Total	Worked 35 hours or more	Worked 15 to 34 hours	Worked 1 to 14 hours	With a job but not at work <sup>1</sup>

**No. 205.—DETAILED OCCUPATION OF PERSONS IN THE EXPERIENCED LABOR FORCE AND OF EMPLOYED PERSONS (EXCEPT ON PUBLIC EMERGENCY WORK), BY SEX: 1940**

["N. e. c." means not elsewhere classified. Persons in the experienced labor force comprise employed persons (except on public emergency work), persons on public emergency work, and workers seeking work who had formerly worked full time for 1 month or more, see footnotes on table 195. Occupation figures shown below for employed (except on public emergency work) refer to the occupation in which engaged during census week, and are based on complete census returns. Occupation figures for remaining experienced labor force groups, not shown separately in this table, refer to the occupation which the person regarded as his usual occupation and at which he was still physically able to work, and are based on Sample B, see p. 1. Figures for "Experienced labor force," therefore, represent a summation of figures for current and usual occupation based on complete census returns and Sample B, respectively.]

<sup>1</sup> Comprises a summation of the complete count of present occupations for employed persons (except on emergency work) and of the tabulations from Sample B (see p. 1) of usual occupations for persons on emergency work and for experienced workers seeking work as shown in table 205. For definitions of these labor force groups, see footnotes on table 195.

<sup>2</sup> Comparable figures not available.

**No. 208.—DETAILED INDUSTRY OF PERSONS IN THE EXPERIENCED LABOR FORCE, AND OF EMPLOYED PERSONS (EXCEPT ON PUBLIC EMERGENCY WORK), BY SEX: 1940**

[Persons in the experienced labor force comprise employed persons (except on public emergency work), persons on public emergency work, and workers seeking work who had formerly worked full time for 1 month or more; see footnotes on table 195. Industry figures shown below for employed (except on public emergency work) refer to the industry in which engaged during census week, and are based on complete census returns. Industry figures for remaining experienced labor force groups, not shown separately in this table, refer to the industry in which the person was engaged when employed at his usual occupation and at which occupation he was still physically able to work, and are based on Sample B, see p. 1. Figures for "Experienced labor force," therefore, represent a summation of figures for current industry and usual industry which in turn are based on complete census returns and Sample B, respectively]

No. 224.—MONTHLY ACCESSIONS TO AND SEPARATIONS FROM PAID CIVILIAN FULL-TIME EMPLOYMENT IN THE EXECUTIVE BRANCH OF THE FEDERAL GOVERNMENT: JUNE 1945 TO DECEMBER 1947

[Accessions include inter-agency transfers, reemployment after and return from military service, original appointments, and other types of accessions. Separations include transfers to other Federal agencies, resignations, abandonment of position, reduction in force, discharges, termination of appointments, and other types of separations. Turn-over rates are computed by dividing total number of accessions to full-time employment (or separation) during the month by the average number of full-time employees reported as of the beginning and as of the end of the month; the resulting ratios, when expressed in terms of percentages, therefore represent the number of accessions or separations per 100 employees]

**No. 229.—PAID CIVILIAN EMPLOYMENT IN THE EXECUTIVE BRANCH OF THE FEDERAL GOVERNMENT BY ANNUAL EQUIVALENT PAY GROUPS AND COMPENSATION AUTHORITY: 1946 AND 1947**

[Covers all civil employees in continental United States. 1947 survey covered 1,660,109 or 91 percent of 1,817,143 employees reported as of July 31, 1947, on Civil Service Commission's monthly employment report; 1946 survey covered 2,176,228 or 95 percent of 2,299,007 employees as of June 30, 1946. Pay data were not reported by Board of Governors of Federal Reserve System, for substitute employees in Post Office Department, and for relatively small number of part-time, fee-basis and other employees in a few agencies. A few agencies reported as of dates other than specified]

**No. 230.—INJURIES TO CIVIL EMPLOYEES OF THE UNITED STATES AND CLAIMS  
RECEIVED UNDER U. S. EMPLOYEES' ACT: SEPT. 7, 1916, TO JUNE 30, 1947**

The U. S. Employees' Compensation Commission, created by act of Sept. 7, 1916, and now known as the Bureau of Employees' Compensation is charged with the duty of administering the law providing compensation for civil employees of the United States who suffer personal injury while in the performance of official duties. This table does not include data for Civilian Conservation Corps enrollees or for persons employed as civil employees of the United States on work relief projects financed through funds provided by the several Federal emergency relief appropriations, excepting those administrative employees who are eligible for benefits under the act of 1916.

### No. 283.—AVERAGE HOURS AND EARNINGS IN 25 MANUFACTURING INDUSTRIES: 1925 TO 1946

[Data cover a representative number of plants which employed 2,100,000 workers during 1946. Earnings computed by weighting average earnings in each industry according to relative importance of the industry as shown by the Federal Biennial Census of Manufactures for 1923. In addition, each labor group is weighted according to its relative importance in each industry during the 3-year period 1927-29, as indicated by the Conference Board's studies. Pay roll data are based upon the week ending nearest the 15th of each month, or, if a generally recognized holiday falls in that week, upon the preceding week. Hourly earnings are not wage rates, because they include overtime and other monetary compensation]

**No. 236.—PERCENT OF INCREASE IN URBAN WAGE RATES, BY INDUSTRY GROUP: APRIL 1943 TO APRIL 1947**

[Intended to measure changes in basic rates of pay. Based on changes in hourly wage rates (average hourly earnings in case of incentive workers) exclusive of all premium payments for overtime and for work on second or third shifts. Information collected through semiannual field visits to about 6,600 representative establishments, located in 69 wage areas centering in cities of 25,000 or more population. Data refer to important manufacturing industries in each area and to a standard group of nonmanufacturing industries in all areas. Minus sign denotes decrease]

# No. 239.—INDEXES OF UNION WAGE RATES AND WEEKLY HOURS IN SELECTED TRADES: 1915 TO 1947

[Data for earlier years cover 39 cities. Coverage gradually extended until 75 cities were included. Prior to 1938 figures based upon scale prevailing May 15 each year. From 1938 to 1942 study made as of June 1, except for building trades rates in 1942, made as of July 1. Since 1943 data collected as of July 1 for all trades. Relative wages are percentages which indicate change in basic wage rates per hour. Relative hours are percentages showing change in regular full-time hours per week, account not being taken of loss of time from slack work or other causes, nor of overtime work]

[Rates and hours for 1939=100]

<sup>1</sup> Data on hours and earnings on Federal projects reported by accounting months rather than calendar months, and since pay periods are not uniform in any given month, some contractors report data for 4 weeks and others for 5. Consequently, average hours and earnings cannot be accurately computed by weeks and figures for average monthly hours and earnings tend to show certain irregularities reflecting this method of reporting.

Source: Department of Labor, Bureau of Labor Statistics; data on Federal projects published currently in Construction Bulletin, private projects in Monthly Labor Review.

### No. 241.—MONTHLY LABOR TURN-OVER RATES (PER 100 EMPLOYEES) IN MANUFACTURING INDUSTRIES: 1939 TO 1947

[Month-to-month employment changes as indicated by labor turn-over rates are not precisely comparable to those in tables 215-217, as the former are based on data for entire month while the latter refer to a one-week period ending nearest middle of month. In addition, labor turn-over data, beginning in Jan. 1943, refer to all employees, whereas employment and pay-roll data relate only to production workers. The turn-over sample is not so extensive as that of the employment and pay-roll survey—proportionately fewer small plants are included; printing and publishing, and certain seasonal industries, such as canning and preserving, are not covered]

CLASS OF TURN-OVER AND YEAR	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
<b>Accession</b>												
1939.....	4.1	3.1	3.3	2.9	3.3	3.9	4.2	5.1	6.2	5.9	4.1	2.8

<sup>1</sup> Number of workers involved in some work stoppages which occurred between 1916 and 1926 is not known. Missing information is for smaller disputes and totals here given are fairly accurate.

<sup>2</sup> "Total employed workers" includes all workers except those in occupations and professions where strikes rarely if ever occur. In general, "total employed workers" includes all employees except following groups: Government workers, agricultural wage earners on farms employing less than 6 workers, managerial and supervisory employees, and certain groups which because of nature of work cannot or do not strike (such as college professors, clergymen, and domestic servants). Self-employed and unemployed persons are excluded.

<sup>3</sup> Obtained by multiplying average number of employed workers each year by number of days worked by most employees during year.

<sup>4</sup> Not available.

## 9. Military Services and Veterans' Affairs

This section includes data on the Army, the Navy, other branches of the military service and on the various aspects of government programs for veterans.

**Military services.**—Data are compiled from the various branches as indicated in the source notes. A summary table prepared by the Bureau of Labor Statistics, similar to their tables on employment in the section on Labor Force, is also included.

**Veterans' Administration.**—The Veterans' Administration was created under authorization of the act of Congress approved July 3, 1930 (46 Stat. 1016: 38 U. S. C. 11), to consolidate and coordinate under a single control all Federal agencies dealing with veterans' affairs.

The Veterans' Administration administers laws relating to the relief of, and other benefits provided by law for, former members of the military and naval forces. It is responsible for extending relief to veterans and to dependents of deceased veterans of all wars, and to veterans and to dependents of deceased veterans who served in the Government military and naval establishments during time of peace, as provided for by various acts of Congress. These benefits include, in addition to compensation, pensions, vocational rehabilitation, and education, the guarantee or insurance of loans for purchase or construction of homes, farms, and business property, readjustment allowance for unemployed or self-employed veterans, Government life insurance, death benefits, adjusted compensation, emergency and other officers' retirement pay, physical examinations, hospital and out-patient treatment, and domiciliary care. The Veterans' Administration also administers the insurance section of the Soldiers' and Sailors' Civil Relief Act for persons in the active military service.

<sup>1</sup> Excludes pay of retired and inactive reserve personnel.  
<sup>2</sup> Prior to March 1944, includes persons on induction furlough; prior to June 1942 and after April 1945, includes Philippine Scouts.  
<sup>3</sup> Covers Navy, Marine Corps, and Coast Guard. Includes missing personnel and personnel in hands of enemy.  
<sup>4</sup> For war period, represents obligations for pay of Army personnel.  
<sup>5</sup> Covers Navy, Marine Corps, and Coast Guard. For Navy proper and Coast Guard, includes cash payments for clothing allowance balances.  
<sup>6</sup> Includes men's share of family allowances but excludes Government's contribution.  
<sup>7</sup> Represents Government's contribution. Excludes men's share.  
<sup>8</sup> Includes leave payments of \$716,313,000 in 1946 and \$1,528,227,000 in 1947 (representing face value of bonds and cash payments) to enlisted personnel discharged prior to Sept. 1, 1946, for accrued and unused leave, and to officers and enlisted personnel then on active duty for leave accrued in excess of 60 days.

Source: Department of Labor, Bureau of Labor Statistics. Current data published in Monthly Labor Review.

# No. 247.—ARMY OF THE UNITED STATES—STRENGTH OF COMPONENT PARTS: 1890 TO 1941

[For period prior to 1914, table covers quinquennial years and years of considerable changes in Regular Army. Includes personnel not on active duty. Figures for Reserve officers include data for Regular Army enlisted men, and also, for years prior to 1924, for National Guard officers holding commissions in Reserve. Hence, grand totals include a relatively small amount of duplication]

<sup>1</sup> Includes Philippine Scouts beginning with 1902. Figures for 1919 to 1926, inclusive, include in most cases World War I emergency personnel still in service. Demobilization of World War I Army completed Nov. 11, 1926 with discharge of last emergency officer; last emergency enlisted man discharged on July 2, 1921. Excludes retired personnel on active duty; on June 30, 1941, 495 retired officers and 13 retired enlisted men had returned to active duty. Includes warrant officers, beginning with 1919; these numbered 731 on June 30, 1941.

<sup>2</sup> State militia prior to act of June 3, 1916. Includes warrant officers beginning with 1924, numbering 200 on June 30, 1941.

<sup>3</sup> U. S. Volunteers.

<sup>4</sup> Not available.

<sup>5</sup> Regular Army Reserve.

<sup>6</sup> Includes National Guard personnel in Federal service.

<sup>7</sup> Estimated.

<sup>8</sup> Officers' Reserve Corps. Beginning with 1924, excludes persons holding commissions also in National Guard. Figure for 1941 includes 57,309 officers on extended active duty.

<sup>9</sup> Regular Army Reserve, 8,382; Enlisted Reserve Corps, 35,000 (estimated).

<sup>10</sup> Officers' Reserve Corps, 86,262; National Army, 49,118 (estimated).

<sup>11</sup> Estimated enlisted strength of National Army. Practically all members of Regular Army Reserve and Enlisted Reserve Corps had, by this date, been assigned to duty with Regular Army, National Guard, and National Army organizations.

<sup>12</sup> Estimates only. Under orders of Secretary of War all components had been merged into one army known as "The United States Army."

<sup>13</sup> Enlisted Reserve Corps.

<sup>14</sup> Enlisted Reserve Corps, 1939, 3,054; 1940, 3,233; Regular Army Reserve, 1939, 19,301; 1940, 28,020. All enlistments in Regular Army Reserve suspended as of Dec. 31, 1940, and members called to active duty on or before Feb. 15, 1941, except those deferred until July 1, 1941, to complete college or university courses.

<sup>15</sup> Includes 74,602 unassigned selectees.

<sup>16</sup> Enlisted men, 491,777 (including 10,919 Regular Army Reserve and 1,470 Army of United States with Regular Army); selectees, 363,459.

<sup>17</sup> Enlisted men, 262,722 (including 20,590, Army of United States with National Guard); selectees, 168,854.

<sup>18</sup> Enlisted Reserve Corps. Includes 35 enlisted Reserve Corps men on active duty.

<sup>1</sup> Includes disbursements to participants in yellow-fever experiments as follows: 1932, \$24,000; 1933, \$26,000; 1934, \$18,000; 1935, \$18,000; 1936, \$17,000; 1937, \$16,000; 1938-42, \$15,000 yearly; 1943, \$14,000; 1944, \$11,000; 1945, \$9,000; 1946, \$8,000; 1947, \$6,000; total to June 30, 1947, \$241,000.

<sup>2</sup> Includes disbursements for increased payments on account of vocational training (Pub. 16) as follows: 1944, \$567,000; 1945, \$7,046,000; and 1946, \$37,993,000. This item included with all other in 1947.

<sup>3</sup> War of the Revolution, \$70,000,000; War of 1812, \$46,218,000; Indian Wars, \$99,719,000; War with Mexico, \$61,687,000; unclassified, \$16,513,000.

<sup>4</sup> Represents payments made on adjusted-service certificates and amounts reimbursed to U. S. Government life-insurance fund on account of loans made from that fund on certificates under provisions of World War Adjusted Compensation Act as amended, and of Adjusted Compensation Payment Act, 1936.

<sup>5</sup> Disbursements for medical aid and hospital services, maintenance, and expenses for pensions, Veterans' Administration homes, State and Territorial homes, salaries, printing and binding, and all other administrative expenses, except disbursements for civil-service and Canal Zone retirement funds.

<sup>6</sup> Includes disbursements from funds allotted under National Recovery Act of 1933, 1934 through 1939; includes also funds allotted under P. W. A. Act of 1938 for 1938-43. <sup>7</sup> Credit. <sup>8</sup> Less than \$500, credit.

<sup>9</sup> Includes \$4,988,109,000 expenditures from readjustment benefits appropriation in fiscal years 1946 (\$1,351,525,000) and 1947 (\$3,636,584,000); \$46,496,000 for readjustment benefits paid from army and navy pension appropriations in fiscal years 1946 (\$32,206,000), 1946 (\$6,173,000), and 1947 (\$8,117,000); and \$190,941,000 for subsistence allowances under Public Law 16 in fiscal year 1947. Also includes \$644,866,000 expenditures for vocational rehabilitation; \$47,130,000 for personal funds of patients; \$35,078,000 for marine and seamen's insurance; and \$21,798,000 for automobiles and other conveyances for disabled veterans.

No. 263.—VETERANS RECEIVING HOSPITAL OR DOMICILIARY CARE AUTHORIZED BY VETERANS' ADMINISTRATION: 1932 TO 1947

[During fiscal year 1947, 5,220,336 out-patient treatments were given and 6,290,212 out-patient examinations were made. On June 30, 1947, 5,626 veterans were domiciled in State and Territorial homes. For each person, Federal Government reimbursed these States at rate of \$120 per year through August 1939, \$240 per year through December 17, 1943, and \$300 per year thereafter]

THEY ARE: "BIB" : RECOVERED WITH VERY SLIGHT, ON HAND, AND  
2. THE.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the situation.

2. Once the problem is identified, the next step is to define the objectives and goals of the project. This helps to clarify what needs to be achieved and provides a clear direction for the team.

3. The third step is to develop a plan or strategy to address the problem. This involves breaking down the problem into smaller, manageable tasks and determining the resources needed to complete them.

4. The fourth step is to implement the plan. This involves putting the strategy into action and monitoring progress to ensure that the project is on track.

5. The final step is to evaluate the results of the project. This involves assessing the outcomes against the objectives and goals and identifying any areas for improvement.

6. Throughout the process, it is important to communicate effectively with the team and stakeholders. This ensures that everyone is aware of the progress and can provide input and feedback as needed.

7. Finally, it is important to document the process and results of the project. This provides a record of what was done and can be used to inform future projects.

8. The process of project management is a continuous cycle that evolves over time. As new challenges arise, the team must be able to adapt and adjust the plan accordingly.

9. In conclusion, project management is a critical skill for any organization. It provides a structured approach to achieving goals and ensures that resources are used effectively.

10. By following these steps, a team can successfully manage a project and achieve the desired outcomes.

1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is responsible for the study. The next step is to collect data. This is done by the investigator who is responsible for the study. The next step is to analyze the data. This is done by the investigator who is responsible for the study. The next step is to interpret the results. This is done by the investigator who is responsible for the study. The next step is to draw conclusions. This is done by the investigator who is responsible for the study. The next step is to report the findings. This is done by the investigator who is responsible for the study. The next step is to discuss the implications. This is done by the investigator who is responsible for the study. The next step is to recommend further research. This is done by the investigator who is responsible for the study. The next step is to conclude the study. This is done by the investigator who is responsible for the study.

## SOCIAL INSTITUTE FOR INDUSTRY AND COMMUNITY DEVELOPMENT

[illegible][illegible]

month in which the wage earner dies, a lump sum is paid to the spouse who was living with the worker at the time of death or, if there is no such spouse, as reimbursement for burial expenses to a person or persons equitably entitled to such payment. Survivor benefits were also established in 1946 for survivors of World War II veterans who die within 3 years of their discharge from military service, if pension or compensation is not payable by the Veterans' Administration with respect to the death of the veteran.

A worker is fully insured if, when he files his claim for retirement benefits, he has received at least \$50 in wages from covered employment in a minimum of 6 quarters and in 1 quarter of every 2 that have elapsed since the end of 1936—or since attainment of age 21 if later—and his attainment of age 65 or death, or if he has had at least 40 quarters of coverage. A worker is currently insured if he has had wages of \$50 or more from covered employment in at least 6 of the last 13 quarters, including the quarter in which he dies.

Monthly benefits and lump-sum payments are based on the worker's average wage as legally defined. Benefits are suspended for any month in which the beneficiary, or the person on whose wage record benefits are based, earned more than \$14.99 in covered employment. Covered workers and their employers each pay contributions of 1 percent on the worker's wages, not counting amounts above the first \$3,000 in a year. The rate is scheduled to rise to 1.5 percent in 1950 and to 2 percent in 1952. An amount equal to the contributions collected is appropriated for deposit in the old-age and survivors insurance trust fund, from which benefits and administrative costs are paid. The wage credits of a worker—the amounts of wages up to a maximum of \$3,000 a year—are recorded in individual employee accounts maintained by the Bureau of Old-Age and Survivors Insurance.

State unemployment insurance laws (tables 277–281) pay benefits to unemployed covered workers who meet the qualifying conditions specified in the State law. In general, a waiting period of 1 or 2 weeks must be served before payments begin. Benefits are payable for a maximum number of weeks, amounting to 20 in 22 States at the end of 1947 but ranging from 12 to 26 weeks among the others. In theory, weekly benefit amounts represent about 50 percent of wages, but the maximum limits on individual payments, which range from \$15 to \$25 under the several State laws, cut down the proportion for many workers in many States. Five States take account of the unemployed worker's dependents in determining the amount of benefits payable to him. Two States pay benefits to claimants whose unemployment is caused by temporary sickness.

In all States but one the standard rate of contributions payable by employers is 2.7 percent of wages paid, not counting amounts above the first \$3,000 a year paid to an employee. In a very few States, employees also contribute. All but one State adjusted employer contribution rates in 1947 in accordance with "experience rating," which is based in general on the extent to which their employees have drawn benefits. The Federal Government imposes a Federal unemployment tax on substantially all employers of 8 or more in industry or commerce; against this Federal tax, employers credit, up to 90 percent of their Federal liability, contributions they have paid under the State law or would have paid if they had been assessed at the standard rate. Contributions collected by States are deposited to State accounts in the Federal unemployment trust fund, from which States withdraw amounts needed for benefit payments. States that have collected employee contributions may use that money to finance cash sickness benefits. The Federal Government makes grants to States to cover the necessary administrative costs of State systems that meet statutory Federal requirements.

#### **SOCIAL INSURANCE FOR RAILROAD WORKERS**

The programs established under the Railroad Retirement Act and the Railroad Unemployment Insurance Act cover social insurance for employees of railroads

(including the Railway Express Agency and the Pullman Company) subject to part I of the Interstate Commerce Act, affiliated companies such as refrigerator-car loan companies which perform services in connection with railroad transportation, organizations such as railroad and traffic associations maintained by two or more covered employers, and standard railway-labor organizations which are national in scope. Both programs are administered by the Railroad Retirement Board, which publishes detailed data on operations in its Monthly Review and Annual Report.

**Railroad retirement (tables 287-292).**—The Railroad Retirement Act provides retirement annuities for aged or disabled workers and monthly and lump-sum survivor benefits for the families of deceased railroad workers. Old-age annuities are payable at age 65 or over, or at reduced rates (full rates for women employees) at ages 60 to 64 after 30 years of service. Disability annuities are payable (1) at age 60 or after 10 years of service, in case of total and permanent disability, and (2) at age 60 or after 20 years of service, in case of permanent disability for employment in the worker's regular occupation, provided he is currently connected with the railroad industry.

Retirement annuity payments are made monthly and are equal to 2 percent of the first \$50 of the worker's average monthly earnings, 1½ percent of the next \$100, and 1 percent of the next \$150, the sum multiplied by the number of his years of service (up to a maximum of 30, if service before 1937 is included). Under certain conditions, military service is also creditable toward an annuity. Retirement is not compulsory at any age.

At present, the maximum annuity is \$120 a month. Workers who have at least 5 years of service and are connected with the railroad industry receive a minimum monthly benefit of at least \$3 multiplied by the number of years of service, or \$50, or the actual average monthly compensation, whichever is least.

Pensions are paid to retired workers who were on the private pension rolls of the carriers on July 1, 1937, and who were not eligible for annuities.

Survivor benefits consist of four types of monthly annuities and a lump-sum death benefit to certain dependents of "completely insured" workers who die either before or after retirement as follows: (1) widows at age 65, if they do not remarry; (2) dependent, unmarried children under 16 (18, if attending school); (3) widows with dependent, unmarried children under 18 in their care; and (4) dependent parents aged 65, when the worker is not survived by a widow or eligible children. If the deceased worker leaves no survivor entitled to immediate monthly benefits, a lump-sum death benefit is payable to the widow, widower, children (including persons entitled to share with children under State intestacy laws), parents, or persons who paid the funeral expenses. If a worker dies "partially insured," all of the benefits listed above except those to widows at age 65 and to parents are payable.

A worker is "completely insured" at death if he has been receiving a retirement annuity or a pension under the Railroad Retirement Act (if receiving an annuity, it must have begun before 1948 and have been based on at least 10 years of service); or he must have had a specified amount of service after 1936. In general, he must have worked under the Railroad Retirement Act or the Social Security Act, or both, for a period equal to approximately one-half the time from 1937 (or age 21, if later) until he dies, retires, or becomes 65. A worker is "partially insured" if he worked in the railroad industry approximately 1½ years in the period beginning with the third year before his death.

The funds for the retirement system come from a tax on compensation (exclusive of earnings over \$300 a month) and are collected under the Railroad Retirement Tax Act. The total tax rate, divided equally between the employer and the employee, is 11½ percent for the years 1947 and 1948 and is scheduled to rise to 12 percent in 1949 and to a maximum of 12½ percent in 1952. Appropriations for benefit payments and administration and for establishing a reserve in the railroad retirement account are made by Congress annually on the basis of anticipated tax collections.

**Railroad unemployment insurance (tables 293, 294).**—The Railroad Unemployment Insurance Act provides unemployment and sickness benefits (including maternity benefits) payable during a “benefit year” to railroad workers who earned at least \$150 in compensation from a covered employer in the “base year,” which is the calendar year preceding the beginning of the benefit year. A benefit year begins on July 1 of each year and ends on June 30 of the following year. Benefits, ranging from \$1.75 to \$5.00, are payable for each day of unemployment or sickness (other than maternity) over 7 in the first 14-day registration period and for each day over 4 in subsequent registration periods up to a maximum of 130 days in the benefit year.

Maternity benefits are payable to women workers for a maximum period of 116 days beginning 57 days before the date of childbirth at the same daily benefit rate as for unemployment and sickness. Benefits, however, are paid for every day in a registration period; in addition, the first 14 days of the maternity period and the first 14 days following childbirth are compensated at 50 percent above the regular daily rate.

The railroad unemployment insurance program is financed entirely by contributions paid directly to the Railroad Retirement Board by covered employers; the contribution rate is 3 percent of pay rolls (exclusive of individual earnings in excess of \$300 a month).

The Board also operates a free employment service for railroad employees under this act.

#### RETIREMENT SYSTEMS FOR GOVERNMENT EMPLOYEES

**Federal systems.**—Three contributory retirement systems for Federal civilian employees (tables 298–300) and one noncontributory system are administered by the Civil Service Commission. In addition, there are other systems for Federal employees not otherwise covered (table 301).

The Civil Service Retirement Act, as passed in 1920 and amended subsequently, provides for age, optional, disability and discontinued service annuities for employees in the executive, judicial, and legislative branches of the United States Government not subject to another retirement system, except those employees excluded by executive order because the tenure of employment is intermittent or of uncertain duration. It also covers those employees in the municipal government of the District of Columbia not subject to special retirement systems for teachers, firemen, and policemen. Approximately 1,600,000 employees were subject to this act as of June 30, 1947. The employee contribution rate, computed on base pay, has been 5 percent since July 1942. The rate had been 3½ percent for July 1926–June 1942 and 2½ percent from August 1920–June 1926.

The Panama Canal Zone Retirement Act, passed in 1931, pertains to employees of the Panama Canal and Panama Railroad Company who work on the Isthmus of Panama and are citizens of the United States. Four thousand seven hundred and sixteen employees were covered by this act in June 1947. Employee contributions are 5 percent. Employees of the Alaska Railroad in Alaska who are citizens of the United States come under the Alaska Railroad Retirement Act, enacted in 1936. The coverage under this system was 1,678 persons in June 1947. The contribution rate is 5 percent.

These three acts do not require specific payments from the Government as employer, but each implies that the Government will furnish the amounts necessary to finance the fund and to continue the act in full force and effect. Appropriations have been made annually by the Congress to each fund after a short period of operation.

A special act was passed in 1944 to provide noncontributory annuities for citizens of the United States employed during the Panama Canal construction period and not receiving benefits under other Federal retirement acts. Separate retirement systems, some contributory and others noncontributory, are in operation for the armed forces and special classes of Federal employees.

**State and local systems (tables 302-305).—**Retirement systems administered by State or local governmental units are in effect for about three-fifths of the persons employed by State and local governments. The great majority of the systems are contributory. The benefits provided and conditions for receipt of benefits vary widely. The retirement benefit is usually weighted heavily by years of coverage. Most of the systems include provisions for retirement from disability as well as from age. In general, survivor protection under State and local systems is afforded only for survivors of annuitants who have elected a reduced benefit, or consists of a refund of contributions only.

#### PUBLIC ASSISTANCE

Public assistance (tables 295 and 296) is provided through four major programs, all administered by the States and localities. Payments to three groups of needy persons—the aged, the blind, and children whose need arises from certain causes—are financed in part from Federal funds granted to States under the Social Security Act. Aid to other needy persons is furnished for the most part through general assistance, toward which the Federal Government makes no contribution. In addition, one State aids dependent children, and three aid blind persons, without Federal funds.

To receive a Federal grant for assistance payments and administrative expenses under any of the three programs established by the Social Security Act, a State must have a plan approved as meeting the requirements of the Federal act. Each State establishes the conditions under which needy people may receive assistance and determines how much they shall get. For the period October 1946 through June 1950 the maximum amount in which the Federal Government will share is \$45 for old-age assistance and aid to the blind and, for aid to dependent children, \$24 for the first child and \$15 for each additional child in a family. The Federal Government pays two-thirds of the first \$15 of the average monthly assistance payment for aged and blind recipients and two-thirds of the first \$9 per dependent child, plus one-half the remainder of matchable expenditures. For all three programs the Federal share of the cost of State administration is one-half the sums expended.

#### HEALTH AND WELFARE SERVICES

Health and welfare services (tables 266, 267, 297) are provided through grants to States for maternal and child health services, services for crippled children, child-welfare services, vocational rehabilitation, and public health. The Children's Bureau, a part of the Social Security Administration, administers the first three of these programs (table 297); the other two are administered, respectively, by the Office of Vocational Rehabilitation (table 169) and the Public Health Service, both units of the Federal Security Agency.

FIGURE H.—SOCIAL SECURITY OPERATIONS: 1940 TO 1947

[Old-age and survivors insurance: Beneficiaries actually receiving monthly benefits (current payment status) and amount of their benefits during month. Unemployment insurance: Average weekly number of beneficiaries for the month and gross benefits paid during the month under all State laws. <sup>1</sup> Estimated by Social Security Administration.

<sup>2</sup> Includes noncontributory programs.

<sup>3</sup> Excludes administrative expenses.

<sup>4</sup> State unemployment insurance and U. S. Employment Service.

<sup>5</sup> Includes administration of employment services by Railroad Retirement Board.

<sup>6</sup> Excludes expenditures from Government life insurance fund.

<sup>7</sup> Liquidation expenses of WPA and NYA and expenditures for work relief in Puerto Rico and Virgin Islands; in 1945-46, expenditures under these programs were less than \$25,000.

<sup>8</sup> Excludes expenditures for medical services included under public aid programs above, and expenditures for health primarily incidental to performance of other functions, such as those in connection with Army, Navy, and education.

<sup>9</sup> Estimated.

<sup>10</sup> Only amounts expended for programs under Social Security Act.

<sup>11</sup> Includes expenditures by Food and Drug Administration and medical service to Indians and to natives of Alaska.

<sup>12</sup> Not available.

<sup>13</sup> American Printing House for the Blind, Columbia Institution for the Deaf, Naval Home, veterans' homes, and U. S. Soldiers' Home.

<sup>14</sup> Data not available; 1940-41 figure used.

<sup>15</sup> Federal Works Agency for child care programs.

<sup>1</sup> Data from Dept. of Commerce, Off. Bus. Econ. Total earnings include earnings of self-employed; all wage and salaries represent civilian wages and salaries in cash and in kind in continental U. S., and pay of Federal civilian and military personnel in all areas. Includes employee contributions under contributory systems.

<sup>2</sup> All programs except Federal civil-service retirement and State and local government include pay rolls in Alaska and Hawaii. Includes nontaxable wages for programs under which only part of wages in covered employment are taxable.

<sup>3</sup> Based on fiscal-year data. Includes wages and salaries of employees covered by Alaska Railroad and Panama Canal Zone Retirement Acts.

<sup>4</sup> Preliminary estimate.

Source: Federal Security Agency, Social Security Administration, Bureau of Research and Statistics. Data appear periodically in Social Security Bulletin.

**No. 266.—FEDERAL AID TO STATES FOR SOCIAL SECURITY AND OTHER PURPOSES: FISCAL YEARS 1939 TO 1946**

<sup>1</sup> For 1933-35 data see Statistical Abstract, 1944-45, table 205, p. 196.  
<sup>2</sup> Represents recipients of payments from Federal, State, and local funds for programs administered under State plans approved by Social Security Administration and from State and local funds for programs administered under State laws without Federal participation, and amount of such payments. Excludes cost of hospitalization and burial and, beginning September 1940, recipients and cost of medical care.  
<sup>3</sup> Excludes cost of hospitalization and burial and, beginning September 1940, recipients and cost of medical care. Data for 1936-March 1937 from WPA.  
<sup>4</sup> Cases receiving relief under emergency education, student aid, rural rehabilitation, and transient programs of emergency relief administration, largely financed from FERA funds, and amount of such relief.  
<sup>5</sup> Net number and net amount of emergency grant vouchers certified to cases and cases receiving only commodities purchased by FSA and distributed during period and value of such commodities. Dropped from series after June 1942 because appropriation was drastically reduced and payments limited to need occasioned by natural disasters. Data from FSA.  
<sup>6</sup> Excludes administrative employees and their earnings.  
<sup>7</sup> Enrolled persons only; represents averages computed from reports on number of persons enrolled on 10th, 20th, and last day of the month, except for Indian Division, for which averages were computed from daily reports. Earnings estimated by multiplying

average monthly number enrolled by average of \$70 through June 1939, \$67 for July-October 1939, \$66.25 for November 1939-June 1941, and \$67.20 subsequently for enrollees other than Indians, and \$60.50 for Indians. Average amount based on obligations incurred for cash allowances, clothing, shelter, subsistence, and medical care for persons enrolled, and for certain other items. Data from CCC.  
<sup>8</sup> Persons employed during month, except for out-of-school program after June 1941, which represents average of weekly employment counts. Data until July 1939 from WPA; subsequently, from NYA.  
<sup>9</sup> Average weekly number of persons employed on projects operated by WPA, and earnings covering all pay-roll periods ended during year. Beginning September 1938, for persons employed, and July 1938 for earnings, represents employment on Federal agency projects financed by transfer of WPA funds. Data from WPA.  
<sup>10</sup> A average weekly number of persons employed during monthly period ended on 15th on projects financed in whole or in part from emergency Federal funds other than those of CWA, CCC, NYA, and WPA; earnings covering all pay-roll periods ended during year. Beginning October 1941, employment and earnings on projects financed from PWA funds only; figures not available for other Federal agency projects financed under Emergency Relief Appropriation Acts. Data from Bureau of Labor Statistics.

Veterans' self-employment allowances <sup>16</sup>				102	11,675	252,424

<sup>1</sup> See table 301 for data relating to systems covering Federal employees other than systems administered by Civil Service Commission.

<sup>2</sup> Old-age retirement benefits under all acts, disability retirement benefits under Railroad Retirement and Civil Service Retirement Acts, and disability payments to veterans.

<sup>3</sup> Number of primary and supplementary (wife's and child's) benefits in current-payment status, and amounts certified. Partly estimated.

<sup>4</sup> Age and disability annuitants and pensioners. Payments represent amounts certified, minus cancellations.

<sup>5</sup> Includes survivor benefits under joint and survivor elections; not adjusted for suspension of annuities of persons reemployed under National Defense Acts of June 28, 1940, and January 24, 1942.

<sup>6</sup> Widow's, widow's current, parent's, and child's benefits in current-payment status and amounts certified. Partly estimated.

<sup>7</sup> Number of widows, parents, and children of deceased veterans, and amount of payments.

<sup>8</sup> Number of decedents on whose account lump-sum payments were certified, and amount of payments.

<sup>9</sup> Payments for burial of deceased veterans.

<sup>10</sup> Average weekly number. Amounts adjusted for voided benefit checks.

<sup>11</sup> Under Servicemen's Readjustment Act, effective September 1944. Beneficiaries of unemployment allowances represent average weekly number; of self-employment allowances, number during month.

<sup>12</sup> Average number of persons receiving benefits for unemployment in a 14-day registration period. Amounts adjusted for underpayments and recoveries of overpayments.

<sup>13</sup> Beneficiaries as of June. Payments include lump-sum survivor benefits and refunds. Data estimated; for 1946, preliminary.

<sup>14</sup> Includes refunds to civilian employees of War Department during July-December 1946; number and amount not available.

<sup>15</sup> Data represent payments to individuals and exclude cost of administration. Payments under Social Security and Railroad Retirement Acts (including retroactive payments) and payments under Railroad Retirement Unemployment Insurance Act are amounts certified; payments under Civil Service Commission and Veterans' Administration are disbursements minus cancellations; State sickness compensation and State unemployment insurance payments are adjusted for voided benefit checks.

<sup>16</sup> Data estimated; for 1946, preliminary. Includes payments for medical care.

<sup>1</sup> Exclude numbers under railroad-retirement program.  
<sup>2</sup> Partly estimated; adjusted for workers having more than 1 account. Quarterly data unadjusted for workers employed during quarter but not reported after quarter in which they received their first \$3,000 in year.  
<sup>3</sup> Unadjusted for nontaxable wages erroneously reported and wages excluded in benefit computations. Wages in excess of \$3,000 a year paid to worker by any 1 employer are not taxable. Beginning 1940, all wages in excess of \$3,000 a year received by a worker are excluded in benefit computations.  
<sup>4</sup> Partly estimated; adjusted for workers having more than 1 account. Quarterly data adjusted for workers employed during quarter but not reported after quarter in which they received their first \$3,000 in year.  
<sup>5</sup> Adjusted to include all wages in covered industries of workers earning over \$3,000 a year.  
<sup>6</sup> Includes 17,202,000 accounts established in 1936.  
<sup>7</sup> Preliminary estimate.

<sup>1</sup> Total benefits awarded after adjustment for terminations and subsequent changes in number and amount of benefits, cumulative beginning January 1940. Not adjusted for deductions.

<sup>2</sup> Benefit is subject to no deduction or any to deduction of fixed amount which is less than current month's benefit.

<sup>3</sup> Including net adjustments. Benefit is terminated when a beneficiary dies or loses entitlement to a benefit for some other reason. Adjustments result from operation of maximum and minimum provisions, recomputations, and from other administrative actions.

<sup>1</sup> Includes \$16,000 certified in lump-sum payments under 1935 act; distribution by State not available. See footnote 3, table 271.

<sup>2</sup> Includes retroactive payments. Distribution by type estimated. Supplementary benefits are paid to entitled wives and children of retired (primary) beneficiaries. Survivor benefits are paid to the following survivors of deceased insured workers—aged widows, children, and younger widows with child beneficiaries in their care—or to dependent aged parents.

<sup>3</sup> Payments under 1939 and 1946 amendments. See footnote 2, table 271.

**No. 276.—OLD-AGE AND SURVIVORS INSURANCE—SAMPLE (1 PERCENT) OF WORKERS WITH WAGE CREDITS AT SOME TIME IN 1937-45, BY CUMULATIVE WAGE CREDITS IN 1937-45, INSURANCE STATUS JANUARY 1, 1946, AND AGE GROUP**

[1-percent sample of all workers with wage credits identified for posting by July 23, 1946; only partly adjusted for duplication of workers with more than 1 account. Includes workers who died during period 1937-45 and workers who became entitled to primary insurance benefits before January 1, 1946. Age represents age at birthday in 1945. Since data are derived from a sample they are subject to a sampling variation which may be large where figures shown are small. Because of mechanical processes and extent of adjustments for delayed wage records, data may differ slightly from corresponding data in other published tables. Data corrected to October 15, 1947]

<sup>1</sup> A worker who is fully insured as of a given date (in this table, Jan. 1, 1946) is one who has had at least 6 calendar quarters of coverage and not less than 1 such quarter for each 2 calendar quarters elapsed after 1936 or after quarter in which he attained age 21, whichever is later, and up to but excluding quarter in which he died, attained age 65, or given date, whichever first occurred. A worker who is currently insured as of a given date is one who has had 6 quarters of coverage in the 12 quarters immediately preceding that date nor quarter in which he died. Uninsured workers are those who have some wage credits but are neither fully or currently insured as of given date. A quarter of coverage is a calendar quarter in which the worker has been paid not less than \$50 in taxable wages.

<sup>2</sup> Total includes 6,644 of unknown age not shown separately, of whom 200 were fully insured, 178 currently insured only, and 6,206 uninsured.

<sup>3</sup> No workers in sample cell.

<sup>4</sup> Inapplicable under provisions of the Social Security Act.

<sup>1</sup> Employer becomes subject to State unemployment insurance law when he has employed specified minimum number of workers on at least 1 day in each of specified number of weeks within current or preceding calendar year; coverage provisions shown are for 1946.

<sup>2</sup> Estimated number of different workers in each State who have earned wages in covered employment sometime during calendar year. Totals adjusted to eliminate duplication due to shifting of workers between States during year.

<sup>3</sup> Average of 12 monthly figures each of which is total of number of workers in covered employment in pay period of each type (weekly, semimonthly, etc.) ending nearest 15th of month.

<sup>4</sup> Total wages in covered employment for all pay periods ending in year.

<sup>5</sup> And wages of \$100 in a calendar quarter. Prior to 1946, 4 in 20 weeks, or 4 in 1 day and wages of \$3,000 in a calendar quarter.

<sup>6</sup> Or wages of \$5,000 in a calendar quarter of the current or preceding calendar year.

<sup>7</sup> And wages of \$78 in a calendar quarter. <sup>8</sup> Or 25 in 1 week, effective April 1, 1945.

<sup>9</sup> Wages of at least \$50 to each of at least 4 workers during each of 3 calendar quarters.

<sup>10</sup> But 8 in 20 weeks for employers located outside the corporate limits of a city, village, or borough of 10,000 or more population.

<sup>11</sup> Or wages of \$500 in a calendar year. <sup>12</sup> Or, effective January 1, 1946, wages of \$10,000 in a calendar year.

<sup>13</sup> And wages of \$225 in a calendar quarter. <sup>14</sup> Prior to 1946, 8 in 20 weeks.

<sup>15</sup> Or wages of \$450 in a calendar quarter. <sup>16</sup> And wages of \$500 in same calendar quarter.

<sup>17</sup> And wages of \$140 in a calendar quarter.

<sup>18</sup> Or wages of \$6,000 in preceding calendar year. Includes employers with wages of \$10,000 in a calendar quarter toward which not more than \$1,000 per employee need be counted after July 1, 1945.

<sup>19</sup> And wages of \$500 in a calendar year. Prior to April 1, 1945, 1 in 20 weeks and wages of \$150 in a calendar quarter.

<sup>20</sup> Changed from 8 in 20 weeks, effective July 1, 1945.

<sup>1</sup> Benefits for other than total unemployment are not provided by State law in Montana.

<sup>2</sup> Unadjusted for voided benefit checks.

<sup>3</sup> Liable State is one to which a claim has been forwarded by agent State for disposition.

<sup>4</sup> Advances for unemployment insurance administration certified to State agencies during fiscal year, including amounts reimbursed to War Manpower Commission and Department of Labor for services and facilities provided to State agencies by U. S. Employment Service. Excludes amounts for services and facilities furnished to USES by State agencies, as well as unencumbered balances reallocated to State agencies. Totals include, but State figures exclude, expenses for postage.

<sup>5</sup> Due to the return of employment service to the States on November 16, 1946, includes amounts reimbursed to the Department of Labor for services and facilities provided to State agencies by USES for period July 1-November 15, 1946.

<sup>6</sup> Claims filed for biweekly instead of weekly periods.

<sup>1</sup> Sum of balances in State clearing account and benefit-payment account, and in State unemployment trust fund account in U. S. Treasury. State unemployment trust fund accounts include interest credited.

<sup>2</sup> Contributions, penalties, and interest from employers and contributions from employees. Adjusted for refunds of contributions and for dishonored contribution checks. Current contribution rates (percent of taxable wages) are: For employers, 2.7 percent except in Michigan, where rate was 3.0 percent; for employees, 1.0 percent in Alabama, California, and New Jersey, and 0.5 percent in Rhode Island. Experience rating, operative in 42 States in 1944 and 45 States in 1945 and 1946 modifies above rates.

<sup>3</sup> Adjusted for voided benefit checks.

**No. 288.—RAILROAD RETIREMENT—MONTHLY BENEFITS BY CLASS—NUMBER AWARDED, TERMINATED, AND IN CURRENT-PAYMENT STATUS: 1939 TO 1947**

Awards are reported on basis of an accounting-month ending on approximately the 24th, and terminations are reported through dates staggered from the 3d to the 27th. Benefits in current-payment status include benefits awarded through that date less benefits terminated or withheld. Terminations are by death, commutation or completion of payments, or by loss of entitlement for any of the reasons described in the act. Benefits withheld are not directly shown in table. Benefits are withheld for investigation or adjustment, or for such reasons as return to service or recovery from disability of retirement annuitant, employment of widow, child, or parent, or failure of child 16 or over to attend school where feasible, etc. Withheld benefits, but not terminated benefits, are eventually reinstated to current-payment rolls]

### No. 291.—RAILROAD RETIREMENT—NUMBER OF EMPLOYEES, BY AMOUNT OF TAXABLE COMPENSATION: 1945

[Includes employees covered under Railroad Retirement and Railroad Unemployment Insurance Acts for whom compensation was reported by subject employers. Some of these employees also had wages taxable under Federal Insurance Contributions Act and are therefore included in preceding tables on old-age and survivors insurance. Earnings in this table include wages and salaries, commissions, back pay, and payments for time lost as an employee, reported by subject employers, however, the excess over \$300 in any one calendar month for an employee is excluded.]

<sup>1</sup> Partly estimated, total not as large as sum of State figures because of adjustment for 2 States. See footnote 5.

<sup>2</sup> Excludes some cases and local funds not administered by State agency.

<sup>3</sup> Estimated.

<sup>4</sup> Excludes cases receiving assistance in kind only and, for a few counties, cases receiving cash payments.

<sup>5</sup> Includes unknown number of cases receiving medical care, hospitalization, or burial only.

<sup>6</sup> Represents program administered without Federal participation.

<sup>7</sup> Excludes estimated duplication between programs; 2,045 cases were aided by county commissioners and 4,106 cases under program administered by State Board of Welfare.

<sup>1</sup> Through June 30, 1940, data relate entirely to employees retired voluntarily or involuntarily under various age and length of service requirements and to employees with at least 5 years of service who became totally disabled for the position occupied prior to eligibility for retirement. Beginning Jan. 1, 1940, employees may elect a joint and survivor annuity; number of survivor annuities in force as of June 30 increased from 26 in 1941 to 371 in 1947. Beginning Jan. 24, 1942, employees with at least 5 years service who separate voluntarily or involuntarily prior to eligibility for retirement may obtain deferred annuity at age 62; such annuitants increased from 6 as of June 30, 1942, to 12,192 as of June 30, 1947.

<sup>2</sup> Through Jan. 23, 1942, data relate to refunds of amounts to employees' credit in fund paid to employees not eligible for an annuity or, if eligible, elected to take a refund. Beginning Jan. 24, 1942, data relate to refunds for service prior to Jan. 24, 1942, for employees separated on or after that date with at least 5 years service and refunds to employees separated on or after that date with less than 5 years service.

<sup>3</sup> Data relate to refunds of amounts to employees' credit paid to designated or other beneficiaries of employees who died while in service or after separation.

<sup>4</sup> Beginning Sept. 1, 1934, data relate primarily to refunds of balance of amount to annuitants' credit at time of death paid to designated or other beneficiaries of annuitants. Includes refunds to disability annuitants whose entitlement to an annuity was terminated.

# 11. Income and Expenditures

[Data in this section relate to continental United States]

## No. 306.—NATIONAL INCOME BY DISTRIBUTIVE SHARES: 1929 to 1947

[National income is aggregate earnings of labor and property which arise from current production of goods and services by the Nation's economy. Thus, it measures total factor costs of goods and services produced by the economy. Nation's economy refers to labor and property supplied by residents of the Nation. Earnings are recorded in forms in which they accrue to residents of the Nation, inclusive of taxes on those earnings]

[In millions of dollars]

FIGURE 3.—PER CAPITA INCOME PAYMENTS TO INDIVIDUALS: 1940

[See table 201]

## No. 308.—INCOME PAYMENTS TO INDIVIDUALS, BY STATES: 1929 TO 1946

["Income payments to individuals" is a measure of income received by residents of each State from business establishments and governmental agencies. It comprises income received by individuals in form of (1) wages and salaries, after deduction of employees' contributions to social security, railroad retirement, railroad unemployment insurance, and government retirement programs; (2) proprietors' incomes, representing net income of unincorporated establishments, including farms, before owners' withdrawals; (3) property income, consisting of dividends, interest, and net rents and royalties; and (4) "other" income, which includes public assistance and other direct relief, labor income items such as work relief, government retirement payments, veterans' pensions and benefits, workmen's compensation, and social insurance benefits; mustering-out payments to discharged servicemen; family-allowance payments and voluntary allotments of pay to dependents of military personnel; enlisted men's cash terminal leave payments; and State government bonuses to veterans of World War II. Income payments are distributed among States on a where-received basis (with exception of wages and salaries, as noted below). Only payments made to residents are included in estimates for continental United States and individual States. Per capita income payments are derived by division of total income payments by total population excluding Federal civilian and military personnel stationed outside continental United States. In five instances, however, income was transferred from place of recipients' employment to place of residence before computation of per capita income. These are New York, New Jersey, District of Columbia, Maryland, and Virginia. In this connection, it should be noted that the wage-and-salary component of total income payments is allocated by States on basis of State of employment, rather than of residence. For all States, except the five listed above, it is assumed that State of employment is identical with State of residence.]

No. 309.—GROSS NATIONAL PRODUCT OR EXPENDITURE: 1929 TO 1947

[Gross national product represents total value of currently produced goods and services flowing to Government, to consumers, and for purposes of gross capital formation to business. Differs from national income by including business taxes, charges to depreciation, and certain other business reserves. These are elements of value of total production, but do not constitute income accruing to individuals]

[Millions of dollars]

State and local.....	7,911	7,763	7,781	7,643	7,378	7,546	8,155	9,983	12,302

<sup>1</sup> Includes construction expenditures for crude petroleum and natural gas drilling.  
<sup>2</sup> Classification of purchases of goods and services into war and nonwar conforms, in general, to Daily Treasury Statement classification of general and special account expenditures. War purchases include also that part of capital formation of government enterprises which is attributable to their war activities. Government contributions to National Service Life Insurance Fund are classified as war; all other government contributions for social insurance, as nonwar.  
<sup>3</sup> Consists of sales abroad and domestic sales of surplus consumption goods and materials.

## No. 310.—PERSONAL CONSUMPTION EXPENDITURES: 1939 to 1947

[Represents market value of purchases of goods and services by individuals and nonprofit institutions and value of food, clothing, housing, and financial services received by them as income in kind. Includes rental value of owner-occupied houses, but not purchases of dwellings which are classified as capital goods. Includes expenditures by Federal civilian and military personnel temporarily abroad]

[Millions of dollars]

<sup>1</sup> Family size based on equivalent persons, with 52 weeks of family membership considered equivalent to 1 person; 26 weeks equivalent to 0.5 person, etc.

<sup>2</sup> Earner defined as a family member that worked for pay (as wage or salary worker or on his own account) at any time during year.

<sup>3</sup> Personal taxes (income, poll and personal property) have been deducted from money income. Total money income may be obtained by combining amounts shown for both items. Inheritances and large gifts are not considered current income; inheritances and gift taxes excluded from personal taxes.

<sup>4</sup> Includes expenditures for alcoholic beverages.

<sup>5</sup> Includes rents for tenant-occupied dwellings and for lodging away from home and current operation expenses of home owners. Excludes principal payments on mortgages on owned homes.

<sup>6</sup> Value of bonds purchased less those cashed.

<sup>7</sup> Represents differences between income and expenditures plus net war bond purchases and insurance premium payments. Includes amounts deducted for social security, retirement plans, etc., not available separately.

### No. 314.—DISTRIBUTION OF FAMILIES AND SINGLE CONSUMERS BY MONEY INCOME LEVEL: 1942

[Covers all civilian consumers except those living in institutions. Families defined as economic units of two or more persons sharing common or pooled income and living under common roof. Single consumers defined as men or women maintaining independent living quarters or living as lodgers or servants in private homes, rooming houses, or hotels. Term spending unit used to cover both groups. Civilian money income includes net money income of all civilians except those living in institutions; excludes all imputed (nonmoney) items, and all income paid to members of armed forces. Estimates on calendar year basis]

<sup>1</sup> Estimated population used for all spending units was 129,100,000, of which 121,230,000 were in family units and 7,860,000 were single consumers.

<sup>2</sup> Includes only individual income taxes, poll taxes, and certain minor personal property taxes. Sales taxes, excise taxes, and all indirect taxes on consumption are included under expenditures for goods and services.

<sup>3</sup> Savings defined as net change in assets and liabilities of spending unit during year, exclusive of gains or losses from revaluation of assets.

<sup>4</sup> Money contributions to church, Red Cross, and other institutions and funds. <sup>5</sup> Money expenditures only.

**No. 816.—PERCENT DISTRIBUTION OF URBAN AND RURAL-NONFARM FAMILIES AND INDIVIDUALS, BY TOTAL MONEY INCOME LEVEL: 1944, 1945, AND 1946**

[Based on samples of urban and rural-nonfarm population residing in households only. Excludes persons residing in quasi households (hotels, large rooming houses, etc.). "Family" not used here with same meaning as in 1940 census. It refers to a group of two or more related persons residing in same household. "Individual" is used to refer to a person living alone or with persons not related to him]

No. 817.—PERCENT DISTRIBUTION OF URBAN AND RURAL-NONFARM PRIMARY FAMILIES AND INDIVIDUALS, BY CIVILIAN MONEY WAGE OR SALARY LEVEL, BY RECEIPT OF OTHER INCOME: 1939, 1944, AND 1946

[Based on samples of urban and rural-nonfarm population residing in households only. Excludes persons residing in quasi households (hotels, large rooming houses, etc.). "Primary family" refers to head of a household and all persons related to him. A "primary individual" refers to a household head who has no relatives living with him. These terms not used in 1940 census. Wage or salary income includes all money received in compensation for work or services performed as employees, including commissions, tips, piece-rate payments, bonuses, etc., as well as receipts commonly referred to as wages or salaries. Excludes value of income in kind, such as living quarters, meals, clothing, etc. A primary family was considered to have other income if any person 14 years of age and over in the family had \$50 or more of income from sources other than money wages or salaries]

**No. 820.—PERCENT DISTRIBUTION OF FAMILIES AND INDIVIDUALS BY TOTAL MONEY INCOME LEVEL, BY URBAN AND RURAL AREAS: 1944 AND 1945**

[Based on samples of urban and rural-nonfarm population residing in households only. Excludes persons residing in quasi households (hotels, large rooming houses, etc.). "Family" not used here with same meaning as in 1940 census. It refers to a group of two or more related persons residing in same household. "Individual" is used to refer to a person living alone or with persons not related to him]

**No. 822.—WAGE OR SALARY WORKERS (EXCEPT ON PUBLIC EMERGENCY WORK) IN MARCH 1940, BY WAGE OR SALARY INCOME AND RECEIPT OF OTHER INCOME IN 1939, BY COLOR AND SEX**

[Wage or salary income includes all money received in 1939 in compensation for work or services performed as employees, including commissions, tips, piece-rate payments, bonuses, etc., as well as receipts commonly referred to as wages or salaries. Excludes value of income in kind, such as living quarters, meals, clothing, etc. Persons were classified as with or without other income on basis of answers to inquiry as to whether \$50 or more of income was received from sources other than money wages or salaries in 1939. Includes persons employed as wage or salary workers (except on public emergency work) during census week, and persons seeking work last employed as wage or salary workers. Statistics based on sample B, see p. 1]

## 12. Prices

The indexes issued by the Bureau of Labor Statistics have been, since the beginning of the century, the major source of price statistics in summarized form. This agency prepares a comprehensive weekly and monthly index of wholesale prices, a daily index based on spot market prices of 28 commodities; indexes of the cost of food at retail in 56 large cities; and indexes of consumers' prices for moderate-income families in 34 large cities.

The **wholesale price index** measures average changes in commodity prices of about 850 commodities at the primary market level—usually the level at which the commodity is first sold commercially in substantial volume. The prices are ordinarily those charged by representative manufacturers or producers to the types of distributors or industrial consumers who are characteristic buyers of the product. Wherever feasible the prices are f. o. b. point of production or sale. In the case of farm products and some foods, prices quoted in organized commodity markets are used.

Commodities are priced in terms of a given specification at stated terms of trade. Most of the commodities are represented by a single quotation. In computing the index the price of each article is weighted by the quantities marketed during a representative period—since 1934, the period 1929–1931. Indexes are computed for 10 major commodity groups, 49 subgroups and 5 economic groups.

Beginning with 1921, in computing indexes for commodity groups, articles falling under more than one group are included under each classification. For example, articles produced on the farm which reach the consumer practically unchanged in form, such as potatoes, milk, and eggs, are included among both farm products and foods. Duplication also occurs between the metals and metal products and building materials groups. However, in computing the index for all commodities, such articles are counted only once.

The **consumers' price index** measures average changes in retail prices of selected goods, rent, and services, weighted by quantities bought in 1934–36 by families of wage earners and moderate-income workers in large cities. It does not measure changes in the total amount families spend for living or relative differences in prices or living costs between cities. Indexes for the major groups other than food have been compiled from price data collected in 34 cities since September 15, 1940; and in a smaller number of cities in earlier years. Since March 1943, food indexes have been based upon changes in food prices in 56 cities. The list of items priced for the indexes includes approximately 192 goods and services. For many goods a number of different grades and qualities are priced so that over 270 different articles or qualities of articles are included in the index. Sales taxes are reflected wherever applicable, but income taxes, social security deductions, and bond deductions are not included. Beginning July 1947, indexes were computed monthly for 10 cities and once every 3 months for 24 additional cities according to a staggered schedule, 8 each month; national averages were computed monthly from food indexes for 56 cities, fuel indexes for 34 cities and indexes for other groups for the 18 cities surveyed.

From 1913 to 1925, the weights used are based on a study of the family expenditures in 1917–19 of wage earners and workers in large cities. From 1925 to 1935, the weights of the individual goods and services priced are based on the 1917–19 study, and the group indexes are based on the estimated distribution of family expenditures in the same period. From 1935, the weights are based on a study of family expenditures in 1934–36. The items priced since 1935 represent about 70 percent of the expenditures of families whose incomes averaged \$1,524.

The **retail-food-cost indexes** presented in this section for periods from January 1935 to March 1943 are based on the distribution of expenditures as shown by the 1934-36 study of expenditures of wage earners' and lower-salaried workers' families. In March 1943, the weights for this index were again revised to take account of changes in food purchases due to wartime shortages and rationing. In January 1946, these wartime weight adjustments were eliminated and certain other revisions made in the calculating procedures. The indexes are computed from prices of 54 foods for the period from January 1935 to March 1943, 61 foods for the period March 1943 to June 1947, and 50 foods thereafter. Aggregate costs of these foods in each of 56 cities (51 cities prior to March 1943), weighted to represent total purchases, have been combined for the United States with the use of population weights. Indexes for all periods prior to January 1935 are converted from indexes computed for corresponding periods on the 1923-25 base.

The Bureau of Agricultural Economics prepares currently **indexes of prices received for farm products and of prices paid by farmers**. (In addition to table 323 in this section, see tables 694 and 695.) The index of prices received for farm products included in this section is a revised series replacing the earlier series which has been in use for the past decade. Data cover prices paid to producers for 45 major farm products. Quantity weights applied to the individual commodities have been adjusted to marketings of the most recent prewar years, 1935-39. For other significant changes in the revised index, see source.

In comparing the movement of the **indexes of consumers' prices and of the prices paid by farmers** for commodities bought for family living (table 695), it should be noted that the consumers' price index includes rents and other services and the farm index does not, and that the list of commodities included in the two indexes and their geographic coverage differs because farm family buying differs considerably from that of city families, and farm and city workers are located in different parts of the country.

A number of **privately compiled indexes of wholesale and retail prices** provide some groupings not found in the official indexes. For example, the National Industrial Conference Board prepared current indexes for both a prewar and a wartime budget. Special purpose indexes have not been included in this section.

The user of price indexes is reminded that the margin of error in price statistics due to unrecorded changes in quality, in discounts, and in undercover charges is greater in war than in peacetime.

Source: Wholesale and retail prices: Department of Labor, Bureau of Labor Statistics; Handbook of Labor Statistics, 1947, and Monthly Labor Review. A pamphlet "Wholesale Prices" is published annually or semi-annually; retail food price pamphlets also are published periodically. Prices received by farmers: Department of Agriculture, Bureau of Agricultural Economics; published currently in "Agricultural Prices."

No. 324.—WHOLESALE PRICES,—INDEXES, BY MAJOR COMMODITY GROUPS: 1890 TO 1947

[1926=100. See general note, p. 292. For indexes for all commodities combined for prior years, see table 329. For index numbers (based on 1910-14 as 100) showing price changes in farm products and foods compared with all other commodities combined, see table 695, p. 642]

PERIOD	All commodities	Farm products	Foods	Hides and leather products	Textile products	Fuel and lighting	Metals and metal products	Building materials	Chemicals and allied products <sup>1</sup>	House furnishing goods	Miscellaneous

No. 826.—WHOLESALE PRICES—INDEXES, ALL COMMODITIES AND BY ECONOMIC CLASSES: 1930 TO 1947

[Figures in column heads indicate current number of quotations. Indexes of National Bureau of Economic Research are weighted arithmetic means for 680 price series, weights being based upon average value of production in 1927 and 1931. For method of computing Department of Labor index, see general note, p. 292. For Department of Labor publications in which data appear, see source note, table 325]

YEAR	DEPARTMENT OF LABOR 1929=100				NATIONAL BUREAU OF ECONOMIC RESEARCH 1929=100

<sup>1</sup> Perishable and semidurable.  
<sup>2</sup> Sum of number of quotations for producers' and consumers' goods and for durable and nondurable goods is greater than number of all commodities owing to duplication of certain price series in classifications. For example, identical price quotations on flour are used in both producers' goods and consumers' goods.

No. 827.—INDEXES OF SPOT MARKET PRICES OF 28 COMMODITIES: 1939 TO 1947

[August 1939=100. Figures in column heads represent number of commodities. Index is computed daily; represents unweighted geometric average of daily price quotations of 28 commodities, traded on organized exchanges. The index is much more sensitive to changes in market conditions than is monthly or weekly wholesale price index]

PERIOD	General Index	IMPORT AND DOMESTIC		Domestic agricul- tural	FOODSTUFFS AND INDUSTRIAL

## No. 335.—AVERAGE RETAIL PRICES OF PRINCIPAL ARTICLES OF FOOD: 1913 TO 1947

[Prices in cents per pound except for milk (cents per quart), eggs and oranges (cents per dozen), and tomatoes (cents per No. 2 can). Data are averages of prices as reported by retail dealers in 51 large cities prior to 1943 and in 56 cities thereafter. Prices for individual cities combined with use of population weights]

No. 886.—ANNUAL AVERAGE UNIT VALUES OF IMPORTANT ARTICLES IMPORTED:  
1920 TO 1946

[Values required by law to represent values in foreign markets whence exported to United States. "Ton" signifies long ton of 2,240 pounds. Averages obtained by dividing total value of imports of specified article by total quantity. Where, as in some commodities considerable price variations may exist between different grades, methods of packing, etc., and proportions of grades, etc., may vary from year to year, such averages may show actual price movements only roughly]

YEAR	Cheese, per pound	FISH, CURED, PER BARREL (200 POUNDS)		HIDES AND SKINS, PER POUND		Wheat, per bushel	Bana- nas, per bunch	Cocoa, per pound	Coffee, per pound	Tea, per pound

## 13. Elections

The conduct of elections in the United States for Federal, State, and local offices and on State and local issues, is regulated by State laws or, in some cities and a few counties, by local charters. An important exception is that the United States Constitution prescribes the basis of representation in Congress and the manner of electing the President of the United States and grants to Congress the right to regulate the times, places, and manner of electing Federal officers. Almost all of the more than 155 thousand governmental units in the United States conduct elections at various intervals—annual, biennial, quadrennial, or longer—for different types of offices and other purposes. No regular and complete system exists for reporting either the number of elections held or the numbers of votes cast for the multitude of candidates, except for Federal offices, and in most States, for State offices. Few States require central reporting on local elections. The numbers of governments holding elections and the numbers of voters participating vary between Presidential and the intervening Congressional election years, and between even-numbered and odd-numbered years.

The tables in this section give summary data, by State, on elections to Federal offices, and indicate the principal State offices filled by popular election in 1946 and 1947. The number of registered voters in 1942 in each city of 25,000 inhabitants or more is given in the Cities Supplement to the Statistical Abstract.

# No. 841.—APPORTIONMENT OF CONGRESSIONAL REPRESENTATION, BY STATES, FROM ADOPTION OF CONSTITUTION TO 1940

[Until 1940, population for apportionment purposes excluded Indians not taxed and, until 1870, two-fifths of slaves. In 1940, all Indians were held subject to Federal taxation. Until 1850, apportionment ratios chosen arbitrarily; 1850 to 1900, ratios were apportionment population of U. S. divided by number of Representatives, from 1910 on, apportionments computed from priority lists, not from ratios. No apportionment in 1920. For discussion of apportionment methods, see S. Doc. No. 304, 76th Cong., 3d sess., "A Survey of Methods of Apportionment in Congress," by Edward V. Huntington]

<sup>1</sup> Number of Representatives not to exceed 1 for each 30,000 inhabitants.

<sup>2</sup> See headnote.

<sup>3</sup> Membership increased from 233 to 234 by act of July 30, 1852 (10 Stat. L. 25). See note 6.

<sup>4</sup> Membership increased from 233 to 241 by act of Mar. 4, 1862 (12 Stat. L. 353). See note 6.

<sup>5</sup> Membership originally fixed at 283 but increased to 292 by act of May 30, 1872 (17 Stat. L. 192). One Member assigned to Colorado after apportionment.

<sup>6</sup> Assigned after apportionment.

<sup>7</sup> Included in apportionment act in anticipation of Statehood.

<sup>8</sup> Included in the 20 Members originally assigned to Massachusetts but credited to Maine after its admission as a State, Mar. 15, 1820 (3 Stat. L. 555).

<sup>1</sup> In some districts one or the other of the major parties had no candidates.

<sup>2</sup> No representatives were elected from districts, but more than one was elected from the State at large in Arizona, New Mexico, and North Dakota. In these States each total is the sum of votes cast for that candidate of each party receiving the highest vote.

<sup>3</sup> In California a person may be the candidate of one or more parties for the same office, so that party votes for candidates are not segregable. The party vote shown is computed by assigning to a party the total of votes for candidates who are members of that party.

<sup>4</sup> Democratic-Farmer-Labor party.

<sup>5</sup> Included in "other" are 416,247 American Labor, 161,209 Liberal, and 4,457 Good Government votes cast for Democratic candidates, and 435 Jeffersonian votes cast for a Republican candidate.

<sup>6</sup> Included in "other" are 240,394 American Labor, 47,138 Liberal, 708 Veterans-Farmer votes cast for Democratic candidates; 7,267 American Labor, 571 Veteran Victory, 9,761 Liberal votes cast for Republican candidates. Included among Democratic votes are 27,341 Democratic votes cast for the American Labor candidate.

<sup>7</sup> Included in "other" are 86 independent votes cast for a Democratic candidate.

## 14. National Government Finances

The Government's proposed budget for the ensuing fiscal year is transmitted to the Congress by the President in January, and contains the President's recommendations for appropriations for the maintenance of the various departments and establishments. The Treasury Department publishes a "Digest of Appropriations" each year, which summarizes appropriation legislation enacted by the Congress, and also publishes yearly the "Combined Statement of Receipts, Expenditures and Balances," which is an abstract of the books of the Treasury relating to all of the receipt and appropriation accounts of the Government.

The day-to-day financial operations of the Federal Government are reflected in the "Daily Statement of the United States Treasury," which covers all of the receipts and expenditures of the Government, including those arising under public debt operations, and also exhibits a "Statement of the Public Debt," as of the end of the month, on the first working day of the next month, and certain other special statements on the 15th day of each month. The "Treasury Bulletin," a monthly publication, contains analytical material on fiscal operations and related Treasury activities. The "Annual Report of the Secretary of the Treasury" is a convenient summary of yearly data relating to somewhat broader fields, and, in addition, contains texts of most of the public documents relating to fiscal policy and operations. The "Annual Report of the Commissioner of Internal Revenue" gives a detailed account of tax collections by kind of tax and by geographic area.

Two other special aspects of Federal finances are dealt with in the "Circulation Statement of United States Money" (monthly) and "Prices and Yields of Public Marketable Securities . . ." (monthly), both issued by the Treasury Department. See table 413-415, and 496, pp. 405-408, and 465.

Data from income tax returns are compiled by the Bureau of Internal Revenue of the Treasury Department in accordance with Section 63 of the Internal Revenue Code, which requires the preparation and publication annually of statistics reasonably available with respect to the operation of the income tax laws. The annual report, *Statistics of Income*, Part 1, is compiled from data reported on individual income tax returns, taxable fiduciary income tax returns, Federal estate tax returns, and gift tax returns. *Statistics of Income*, Part 2, also published annually, presents data from corporation income and declared value excess-profits tax returns, corporation excess-profits tax returns, and personal holding company returns. Data from these reports appear on pages 331-364.

### ACCOUNTS THROUGH WHICH TREASURY OPERATIONS ARE EFFECTED

All receipts of the Government are covered into the General Fund of the Treasury, from which all expenditures are made. No money may be drawn from the Treasury except in accordance with appropriations made by law.

Receipts and expenditures are classified in the Treasury's records according to the class of accounts through which operations are effected. Transactions are segregated in order to exhibit separately those effected through general and special accounts, as contrasted with those effected through trust accounts. A brief description of the items handled through these accounts is as follows:

**1. General accounts.**—The principal categories of general account receipts are income taxes, miscellaneous internal revenue, employment taxes, customs, and miscellaneous receipts, such as proceeds from the sale of surplus property.

There are five classes of appropriations payable through the general accounts of the Treasury, namely: (a) annual appropriations, which are available for incurring obligations only during a specified fiscal year; (b) multiple-year appropriations, which are available for incurring obligations for a definite period in excess of one fiscal year; (c) continuing (no year) appropriations, which are available for incurring obligations

until the appropriation is exhausted or until the object for which appropriated has been accomplished; (d) permanent-specific appropriations, which are fixed amounts provided for each of a series of years by permanent legislation, without annual action of Congress; and (e) permanent-indefinite appropriations, which are indefinite amounts (so much as may be necessary) provided by permanent legislation without annual action of Congress, such as the indefinite appropriation to cover interest on the public debt.

**2. Special accounts.**—Receipts in these accounts are generally funds received under special authorization of law which may be expended only for the particular purposes specified therein, and not for general purposes. The larger items have been those receipts for the reclamation fund and receipts under the Mineral Leasing Act, the national forest funds, war contributions, and deposits for defense aid under lend-lease legislation.

**3. Trust accounts.**—Trust account receipts are those received for the benefit of individuals or groups of individuals and are to be used for the purposes specified in the trust, and are not, therefore, available for general expenditures. An example of a trust account is the Federal old-age and survivors insurance trust fund, to which amounts equivalent to the receipts from the taxes on employment levied for the support of old-age benefits are automatically appropriated.

#### BASIS OF TABLES

A number of different bases are used in compiling data relating to Federal finances, as explained below, and the basis used is noted at the head of each table.

Most tables at present dealing with Federal fiscal affairs are compiled on the basis of the Daily Treasury Statement. This statement is compiled from the latest daily financial reports received from Government depositaries and Treasury offices holding Government funds, and, because of the promptness with which the information is obtained and made public, it has come into general use as reflecting the Government's finances and the condition of the Treasury from day to day. Statements for a given period compiled from the records of the agents handling Government funds may differ from the Daily Treasury Statement because of the timing difference. The Daily Treasury Statement for a given period includes items for a previous period received too late for inclusion in the Statement for that period, and does not include, of course, items not received in time for publication in the current period.

Other tables are on bases reflecting the accounts or statistics of the various Treasury offices compiling them for the definite period under review. Such other bases are the following:

**Public debt accounts.**—Tables on this basis reflect the audited accounts of the Bureau of the Public Debt for the actual transactions of the period under review.

**Warrants issued.**—By law, warrants evidence the formal covering of receipts into the Treasury. The term when relating to expenditures merely refers to the advance of funds to disbursing officers for expenditure, and tables when compiled on this basis show expenditures considerably in advance of actual disbursement by disbursing officers.

**Checks issued.**—This term relates to expenditure statements made up on the basis of checks drawn by disbursing officers.

**Collection basis.**—Statements showing receipts on this basis are compiled from reports received by the various administrative offices from collecting officers in the field, such as actual collections recorded on their books by collectors of internal revenue and collectors of customs but without regard to the time of deposit of such collections to the credit of the Treasurer.

Further details with respect to Treasury accounting bases and procedures are shown on pages 265–267 of the Annual Report of the Secretary of the Treasury for the fiscal year 1947.

<sup>1</sup> Includes tonnage tax prior to 1932. Beginning 1932, tonnage tax is included in other receipts.

<sup>2</sup> On basis of warrants issued 1789 through 1930; thereafter, on basis of checks issued.

<sup>3</sup> Average for period Mar. 4, 1789, through Dec. 31, 1800.

<sup>4</sup> Averages are for entire period though there were no amounts under these items for certain years.

<sup>5</sup> Years ended Dec. 31, 1801, to 1842; average for 1841-50 is for period Jan. 1, 1841, through June 30, 1850.

<sup>6</sup> Less than \$500.

<sup>7</sup> Average for 1863-65.

<sup>8</sup> Average for 1881 and 1884.

<sup>9</sup> One year only, 1895.

<sup>10</sup> One year only, 1910.

<sup>11</sup> Average for 1914 and 1915.

<sup>12</sup> Average for 1917-20.

<sup>13</sup> One year only, 1922.

<sup>14</sup> After deduction of net appropriations to Federal old-age and survivors insurance trust fund.

<sup>15</sup> Civil expenditures under War and Navy Departments at Washington are included in "Civil and miscellaneous" prior to 1916; for 1916 and thereafter, under the War and Navy Departments, respectively. War Department includes expenditures for rivers and harbors and Panama Canal.

<sup>16</sup> On basis of warrants issued from 1789 through 1930; thereafter on basis of checks issued.

<sup>17</sup> Includes only Army and Navy pensions for service prior to World War I, and fees for examining surgeons in Pension Bureau. Excludes payments made by War Risk Insurance Bureau and Veterans' Bureau to veterans of World War I and salaries under Bureau of Pensions, which are included in civil and miscellaneous expenditures.

<sup>18</sup> On basis of warrants issued prior to 1922. Excludes amounts transferred to civil service retirement and disability fund.

<sup>19</sup> See notes on corresponding periods, p. 321.

<sup>20</sup> See note 4, p. 321.

<sup>21</sup> Average for 1912, 1913, 1915.

<sup>22</sup> Average for 1916, 1918-20.

<sup>23</sup> Average for 1918-20.

<sup>24</sup> Excludes interest accounts which are included in trust fund expenditures.

<sup>25</sup> Excess of credits (deduct).

<sup>26</sup> Includes Government corporation (wholly owned), etc.

<sup>1</sup> Deduct.

<sup>2</sup> Expenditures during fiscal year 1946 were included under Navy Department.

<sup>3</sup> Less than \$500.

<sup>4</sup> Additional expenditures attributable to national defense and related activities, payable from funds which have supplemented regular appropriations of the civil establishment, are included under general expenditures. Also, with transition from war to peace, certain war-related expenditures formerly classified as war and defense activities in Daily Statements of United States Treasury, principally Coast Guard, which was part of Navy, and U. S. Employment Service, whose functions were exercised by War Manpower Commission during war years, are shown as general expenditures commencing July 1, 1946.

<sup>5</sup> Additional expenditures included in corresponding captions under general expenditures.

<sup>6</sup> Sales and redemptions in market of obligations of Government corporations and agencies are shown under trust accounts.

<sup>7</sup> Under Labor-Federal Security Appropriation Act, 1947, salaries for Bureau of Old-Age and Survivors Insurance are payable directly from Federal old-age and survivors insurance trust fund. Prior to July 1, 1946, such payments were included in general expenditures under "Federal Security Agency: Social Security Administration: administrative expenses," a corresponding amount being included as a deduction from appropriations to Federal old-age and survivors insurance trust fund.

# No. 853.—INCOME TAX RETURNS, INDIVIDUAL AND TAXABLE FIDUCIARY—SUMMARY: 1913 TO 1945

[Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, unaudited except to insure proper execution. Under revenue laws, individuals are required to file returns as follows: (1) Single or married, for 1913-16, those with net income of \$2,000 or over; (2) single, or married and not living with husband or wife, for 1917-24, \$1,000 or over; 1925-31, \$1,500 or over; 1932-39, \$1,000 or over; for 1940, those with gross income of \$200 or over, for 1941, \$750 or over; and for 1942 and 1943, \$500 or over regardless of amount of net income; (3) married and living with husband or wife, filing a joint return, for 1917-23, those with net income of \$2,000 or over; 1924, \$2,500 or over; 1925-31, \$3,500 or over; 1932-39, \$2,500 or over; for 1940, those with gross income of \$2,000 or over; for 1941, \$1,500 or over; for 1942, \$1,200 or over; and for 1943, if gross income exceeds \$624, regardless of amount of net income; also for 1943, a return is required of any person liable for tax for 1942, regardless of amount of gross income for 1943; (4) every individual with gross income of \$5,000 or over for 1921-39, and as stated above for 1940-43. For 1944 and 1945, every citizen or resident having gross income of \$500 or more is required to file a return. For refund purposes, returns are also required with respect to gross incomes under \$500 from which taxes have been withheld. Data for returns showing no net income, filed in accordance with these latter provisions are not included in statistics shown. Fiduciaries are required to file returns on same basis as single individuals except that a return is required for every estate or trust of which any beneficiary is a nonresident alien, and for 1928-45, a return is required for every trust having a net income of \$100 or over. Partnership net profit or net loss is reported on individual returns of copartners according to their shares]

[All money figures in thousands of dollars]

1944.....	47,011,959	42,446,837	4,565,122	117,370,359	<sup>4</sup> 16,347,479
1945 (preliminary).....	49,964,351	42,764,082	7,100,469	121,157,725	<sup>4</sup> 17,235,983

<sup>1</sup> Net income for 1913-43 is total income less statutory deductions, but before deduction of exemption or credits allowable in computing amount subject to tax. For 1944 and 1945, *adjusted gross income* (defined as gross income minus allowable trade and business deductions, expenses of travel and lodging in connection with employment, reimbursed expenses in connection with employment, deductions attributable to rents and royalties, certain deductions of life tenants and income beneficiaries of property held in trust, and allowable losses from sales of property) is shown instead of net income.

<sup>2</sup> Includes war excess-profits tax of \$101,250,000 on individuals and \$103,888,000 on partnerships.

<sup>3</sup> Tax after 25 percent reduction provided by Revenue Act of 1924.

<sup>4</sup> Excludes amount of alternative tax on returns reporting deficit due to net long-term capital loss, which tax amounted to \$615,000 for 1938; \$300,000 for 1939; \$473,000 for 1940; and \$2,326,000 for 1941.

<sup>5</sup> Includes defense tax 1940, \$128,350,000; 1941, \$1,150,000, not shown separately. Defense tax, applicable only to taxable years beginning in 1940, is 10 percent of total income tax before deducting any credit, but not in excess of 10 percent of amount by which net income exceeds such income tax.

<sup>6</sup> Tax for 1942 and 1943 computed on net income for respective year without regard to adjustments provided by Current Tax Payment Act of 1943. Tax for 1942 (as in prior years) is before deduction of credits for tax paid at source and tax paid to a foreign country or possession of United States, while amount of tax for 1943-45 is after deduction of such credits. Total income and victory tax resulting from merging of 1942 and 1943 tax liabilities, as provided by Current Tax Payment Act of 1943, reported on 1943 returns with net income, is \$17,114,112,000. This amount excludes \$31,800,000 tax reported on returns with no net income.

Average tax per return.....	\$151	\$244	\$335	\$348	\$345	\$343	\$1,546

<sup>1</sup> For 1941-43, represents total income adjusted by subtracting therefrom net losses from rents and royalties, from business and profession, from partnerships, and from sales or exchanges of property; for 1944-45, see note 1, table 353.

<sup>2</sup> Salaries and wages include annuities, pensions, and retirement pay not reported in schedule for annuities and pensions, but for 1944-45 exclude wages of less than \$100 per return from which no tax is withheld, reported on Form W-2 (see note 12).

<sup>3</sup> Excludes those received through partnerships and fiduciaries; for 1941-43, excludes those reported on Form 1040A; for 1944-45, excludes those reported on Form W-2. (See note 12.)

<sup>4</sup> Excludes that reported on Form 1040A for 1941-43 and on Form W-2 for 1944-45 (see note 12). Partially tax-exempt interest consists of amounts received directly, or through partnerships and fiduciaries, representing interest on certain Government obligations issued prior to Mar. 1, 1941, and dividends on Federal savings and loan association shares issued prior to Mar. 28, 1942. For 1941, includes taxable interest on Government obligations reported on nontaxable returns. Taxable interest, Government and other, excludes that received through partnerships and fiduciaries, except that on fiduciary returns; taxable interest on Government obligations includes that received through partnerships and fiduciaries. For 1941, taxable Government interest is only that reported on taxable returns.

<sup>5</sup> Represents only taxable portion of amounts received. Amounts received to extent of 3 percent of cost are reported annually, until aggregate of amounts received and excluded from income in this and prior years equals cost. Thereafter, entire amounts received are taxable and must be included in income. For 1941-43, excludes annuities reported on Form 1040A (see note 12); for 1944-45, annuities, etc., from which tax is withheld may be reported as salaries and wages.

<sup>6</sup> Net profit from rents and royalties is excess of gross rents over depreciation, repairs, interest, taxes, and other rent expenses and excess of gross royalties over depletion and other royalty expenses. Conversely, net loss from these sources is excess of expenses over gross receipts. For 1941, excludes rents and royalties reported on Form 1040A (see note 12).

<sup>7</sup> Net profit from business is excess of gross receipts over business expenses and, for 1944-45, net operating loss deduction due to a net operating loss from business, partnership, and common trust funds for two preceding years. Conversely, net loss from business is excess of business expenses and, for 1944-45, net operating loss deduction over gross receipts from business.

<sup>8</sup> Excludes partially tax-exempt interest on Government obligations, dividends on Federal savings and loan association shares issued prior to Mar. 28, 1942, and net gain or loss from sales of capital assets. In computing partnership profit or loss, charitable contributions are not deductible nor is net operating loss deduction allowed.

<sup>9</sup> Capital assets consist of all property held by taxpayer other than (1) stock in trade or other property held primarily for sale to customers, or (2) kinds of property specified in note 11. Net gain or loss reported is a combination of current year capital gains and losses to be taken into account (including those from partnerships or common trust funds in which taxpayer participates) and capital loss carry-over, except that, for 1941, a net short-term capital loss is not allowable in current year, and for 1942-45, allowable net loss is limited to amount of such loss, or to net income (adjusted gross income if taxes under Supplement T in 1944-45) computed without regard to gains and losses from sales of capital assets, or to \$1,000, whichever is smallest. For details as to portion of gains and losses taken into account, description of capital loss carry-over, and special treatment of certain gains and losses, see source.

<sup>10</sup> Sales of (1) property used in trade or business of a character which is subject to allowance for depreciation, (2) Government obligations issued on or after Mar. 1, 1941, on a discount basis and payable, without interest, within 1 year from issue, and (3) for 1942-45, also includes real property used in trade or business.

<sup>11</sup> Excludes partially tax-exempt interest on Government obligations and dividends on Federal savings and loan association shares issued prior to Mar. 28, 1942. Such income is reported in partially tax-exempt interest.

<sup>12</sup> Includes all taxable income not accounted for elsewhere in this table; also includes for 1941-43, dividends, interest, annuities, and (for 1941 only) rents and royalties reported on Form 1040A; and for 1944-45, wages not subject to withholding, dividends, and interest, not exceeding in total \$100 per return reported on Form W-2.

<sup>13</sup> Less than \$500,000.

<sup>1</sup> See note 1, table 353.<sup>2</sup> Surtax exemption is \$500 for taxpayer, \$500 for taxpayer's spouse if not dependent upon another person, and \$500 for each dependent with respect to whom a surtax exemption may be claimed. Such dependents must have received from taxpayer more than half their support for year and must have had less than \$500 gross income during year. Dependents include only close relatives which are specified by law.<sup>3</sup> Includes a negligible number of returns in excess of \$1,500.<sup>4</sup> Less than 0.005 percent.

## No. 360.—INCOME TAX RETURNS, CORPORATION—SUMMARY: 1916 TO 1945

[Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, prior to audit adjustments and, for 1940-45, prior to changes resulting from carry-backs, relief granted under section 722 of Internal Revenue Code, recomputation of amortization of emergency facilities, or renegotiation of war contracts, after returns were filed. (Changes in profits and taxes due to renegotiation of war contracts after returns were filed are shown in Statistics of Income, Part 2, for 1942-45.) All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, and charitable organizations not operating for profit. Under Revenue Act of 1934, privilege of filing a consolidated return for a group of affiliated corporations was limited to common carriers by railroad and their related leasing and holding companies. Revenue Act of 1936 extended this privilege to street, suburban, and interurban electric railway corporations. These changes result in marked differences between returns for 1934 through 1941, and those for 1933 and prior years, in net-income or deficit classification and in size of total assets, as well as in distribution by industries. Beginning 1942, consolidated-return privilege again extended, in general, to all corporations. Corporations are classified industrially on one business activity which accounts for largest percentage of total receipts. Therefore, industrial groups do not reflect pure industry classifications. As a result of application of Standard Industrial Classification, number of major and minor industrial groups for 1933 and subsequent years has been increased over that for 1937 and prior years. Changes in contents of groups are listed in Statistics of Income for 1938, Part 2, subsequent changes appear in later volumes]

[All money figures in thousands of dollars]

1944 <sup>1</sup>	446,796	288,904	123,563	34,329	27,123,741	819,260	14,884,050	4,353,620	10,530,430
1945 <sup>1</sup> (prel.)	454,462	303,021	118,106	33,335	22,165,385	1,026,250	10,793,111	4,181,694	6,611,417

<sup>1</sup> Returns of inactive corporations prior to 1927 are included in those reporting no net income.

<sup>2</sup> For 1922-32, and for 1940-45, net income tabulated is amount before deduction due to net operating loss of prior years. (For amounts of such deductions, see table 365, p. 351.) For 1935 and prior years, net income or deficit is amount reported for income tax computation. For 1936-45, net income or deficit is amount reported for declared value excess-profits tax computation, except that, for 1944 and 1945, amount shown includes Government interest subject to surtax only and continues to include excess of net long-term capital gain over net short-term capital loss, even though such excess was made exempt from declared value excess-profits tax beginning 1944. Beginning 1936, net income or deficit includes dividends received on stock of domestic corporations subject to taxation under effective tax law and interest received on certain Government obligations subject to excess-profits tax. For 1936 and later years, contributions or gifts are deductible in arriving at net income and are limited to 5 percent of net income before deduction.

<sup>3</sup> Tax credit for taxes paid to foreign countries, allowable for 1918 and subsequent years, has not been deducted from amounts of income tax as tabulated.

<sup>4</sup> War-profits and excess-profits taxes provided by Revenue Acts of 1917, 1918, and 1921 were in effect 1917-21, amount shown for 1922 was reported on returns with fiscal years beginning in 1921, and (declared value) excess-profits tax was in effect for 1933 and subsequent years. Figures for 1940-45 also include excess profits tax under Second Revenue Act of 1940, shown separately in table 361, amounts of such tax being after credit for debt retirement and net postwar refund (1942-44), 10 percent credit (1945), and relief adjustments claimed on returns when filed.

<sup>5</sup> For 1936-38, includes surtax on undistributed profits according to provision of Revenue Act of 1936. Amount included for 1938 is that reported on fiscal year returns with taxable year beginning in 1937.

<sup>6</sup> Includes income and declared value excess-profits defense taxes. Amount included for 1941 is from returns with fiscal years beginning in 1940.

<sup>7</sup> Beginning 1942, instead of deductions for reserve earnings, deferred dividends, and interest paid, which were previously allowable to life insurance companies in arriving at net income, there is allowable a "reserve and other policy liability credit" against net income. As a consequence, there is an increase in both number of returns reporting net income and in amount of net income reported.

<sup>1</sup> To improve historical comparability, figures for 1938 through 1944 are adjusted by transferring certain minor groups from classification in which shown in tables 364 and 366 to the classification in which shown here for 1937 (figures in roman). Figures for 1937 in italics show adjusted amounts which would have resulted if industrial classification of 1938 and subsequent years had been in effect.

<sup>2</sup> Total tax for 1942 includes \$18,723,000 excess profits tax not distributed by industrial groups.

<sup>1</sup> To improve historical comparability, figures for 1938 through 1944 are adjusted by transferring certain minor groups from classification in which shown in tables 364 and 366 to the classification in which shown here for 1937 (figures in roman). Figures for 1937 in italics show adjusted amounts which would have resulted if industrial classification of 1938 and subsequent years had been in effect.

<sup>2</sup> Bone, celluloid, and ivory products are included in "Manufacturing—All other," for 1938 and subsequent years.

<sup>3</sup> See note 7, table 360.

<sup>1</sup> For items included in "Total compiled receipts" see table 366

<sup>2</sup> Gross sales, less returns and allowances, where inventories are an income-determining factor. For "Cost of goods sold," see "Compiled deductions."

<sup>3</sup> Where inventories are not an income-determining factor. Figures for years prior to 1932 represent gross profits from operations other than trade and manufacturing

<sup>4</sup> For 1931-33 consists of wholly tax-exempt interest on obligations of States, Territories, or political subdivisions thereof, or the District of Columbia, securities issued under the Federal Farm Loan Act or such act as amended, and obligations of the United States or its possessions, for 1934 through 1944 includes in addition to the wholly tax-exempt interest, that which is partially tax-exempt. Interest on Treasury notes issued on or after Dec. 1, 1940, and obligations issued on or after Mar. 1, 1941, by the United States or any agency or instrumentality thereof, is wholly taxable and is included in "Other receipts" for 1941-44.

<sup>5</sup> Included in "Other deductions" prior to 1933.

<sup>6</sup> Beginning 1936 "Dividends from domestic corporations" are taxable income tabulated with "Other receipts."

<sup>7</sup> Includes contributions or gifts (limited to 5 percent of net income before deduction of contributions or gifts).

<sup>8</sup> See note 13, table 366

<sup>9</sup> Compiled receipts less compiled deductions.

<sup>10</sup> See note 2, table 360; and note 4, table 370.

<sup>11</sup> Deducted by corporations reporting net income

<sup>12</sup> In addition to income tax, includes declared value excess-profits tax for 1933 and subsequent years; surtax on undistributed profits, 1936 through 1938, the amount for 1938 being that reported on returns with fiscal year beginning in 1937; for 1940-44, excess profits tax under provisions of Second Revenue Act of 1940; and also for 1940 and 1941, defense tax. Defense tax for 1941 is that reported on returns with fiscal years beginning in 1940.

<sup>13</sup> Deficit.

<sup>14</sup> Includes amortization of emergency facilities for 1940 and later years.

<sup>10</sup> Capital gain or loss is amount of gain or loss arising from sale or exchange of capital assets, defined to consist of property other than (1) stock in trade, (2) other property held primarily for sale to customers, (3) depreciable and real property used in taxpayer's trade or business, and (4) certain short-term Government obligations issued on a discount basis. Such gain or loss is classed as "short-term" if assets were held six months or less, "long-term" if period held was over six months. A net loss from this source is not deductible for current year but may be carried over and applied against capital gains in five succeeding taxable years. (See Statistics of Income, Part 2, for special treatment accorded gain or loss arising from sale or exchange of business property held for more than six months.)

<sup>11</sup> Net gain or loss, sales other than capital assets, consists generally of gain or loss arising from sale or exchange of depreciable and real property used in trade or business and certain short-term Government obligations issued on a discount basis. Exceptions to this rule result from special treatment of certain gains and losses mentioned in note 10.

<sup>12</sup> Includes taxes which are reported in "Cost."

<sup>13</sup> Excludes (1) Federal income tax and Federal excess-profits taxes; (2) estate, inheritance, legacy, succession, and gift taxes; (3) income taxes paid to a foreign country or possession of U. S. if any portion is claimed as a tax credit; (4) taxes assessed against local benefits; (5) Federal taxes paid on tax-free covenant bonds; and (6) taxes reported in "Cost of goods sold" and "Cost of operations."

<sup>14</sup> Limited to 5 percent of net income as computed without benefit of this deduction.

<sup>15</sup> Deduction due to net operating loss carry-over from two preceding taxable years.

<sup>16</sup> Compiled net loss or deficit.

<sup>1</sup> Excludes returns of inactive corporations.  
<sup>2</sup> Excludes nontaxable income other than tax-exempt interest on Government obligations.  
<sup>3</sup> Gross sales less returns and allowances where inventories are an income-determining factor. For "Cost of goods sold," see "Compiled deductions."  
<sup>4</sup> Gross receipts from operations where inventories are not an income-determining factor. For "Cost of operations" see "Compiled deductions."  
<sup>5</sup> Interest on Treasury notes issued on or after Dec. 1, 1940, and obligations issued on or after Mar. 1, 1941, by U. S. or any agency or instrumentality thereof.

<sup>10</sup> Capital gain or loss is the amount of gain or loss arising from the sale or exchange of capital assets, defined to consist of property other than (1) stock in trade, (2) other property held primarily for sale to customers, (3) depreciable and real property used in the taxpayer's trade or business, and (4) certain short-term Government obligations issued on a discount basis. Such gain or loss is classed as "short-term" if the assets were held six months or less, "long-term" if the period held was over six months. A net loss from this source is not deductible for the current year but may be carried over and applied against capital gains in the five succeeding taxable years. (See Statistics of Income, Part 2, for special treatment accorded the gain or loss arising from the sale or exchange of business property held for more than six months.)

<sup>11</sup> Net gain or loss, sales other than capital assets, consists generally of gain or loss arising from the sale or exchange of depreciable and real property used in trade or business and certain short-term Government obligations issued on a discount basis. Exceptions to this rule result from special treatment of certain gains and losses, mentioned in note 10.

## No. 867.—GROSS INCOME OF CORPORATIONS, BY INDUSTRIAL GROUPS: 1937 TO 1944

[In millions of dollars. Gross income is less than total compiled receipts by amount of wholly tax-exempt interest on Government obligations for 1940 and prior years, and by sum of wholly tax-exempt interest and interest subject to surtax only, for 1941-44. For items comprising "total compiled receipts," see table 365. See also headnote, table 360]

<sup>1</sup> Excludes returns with fragmentary balance sheet data.

<sup>2</sup> Adjustments are made in tabulating data as follows: (1) Reserves for depreciation, depletion, amortization, and bad debts, when reported under liabilities are used to reduce corresponding asset account, and "Total assets" and "Total liabilities" are decreased by amount of such reserves; and (2) a deficit in surplus, reported under assets, is transferred to liabilities, and "Total assets" and "Total liabilities" are decreased by amount of deficit.

<sup>3</sup> Cash in till and deposits in banks.

<sup>4</sup> Less reserve for bad debts. Includes loans and discounts of banks.

<sup>5</sup> Consists of obligations of United States or any agency or instrumentality thereof; obligations of States, Territories, and political subdivisions thereof, District of Columbia, and United States possessions.

<sup>6</sup> For balance sheets in which common and preferred stock are not reported separately, combined amount is tabulated as "Common stock."

<sup>7</sup> Beginning 1937, excludes "Surplus reserves."

<sup>8</sup> Consists of sum of positive amounts of "Paid-in or capital surplus," "Earned surplus and undivided profits," and "Surplus reserves."

<sup>9</sup> Consists of negative amounts for "Earned surplus and undivided profits."

<sup>1</sup> For 1940-43, return is required of every citizen or resident of U. S. who transferred by gift during calendar year to any one donee, property exceeding \$4,000 in value or who, regardless of value, made a gift of future interest in property or a gift in trust, for 1943, return is required for transfer of property by gift, including gifts in trust, exceeding \$3,000, or for gift of future interest in property, regardless of value. A nonresident alien is similarly required to file return if gift consists of property situated in United States.

<sup>2</sup> There is allowed exclusion of first \$4,000 of gifts made to any one donee during any calendar year 1940-42, except gifts in trust or of future interest in property, for 1943, there is allowed exclusion of first \$3,000 of gifts made to any one donee during calendar year except gifts of future interest in property.

<sup>3</sup> Specific exemption of \$40,000 for 1940-42 or of \$30,000 for 1943 may be taken in 1 year or spread over a period of years at option of donor. The specific exemption allowed each year is \$40,000 (for 1940-42) or \$30,000 (for 1943) less the sum of amounts claimed and allowed in prior years. <sup>4</sup> Includes defense tax.

## No. 372.—ESTATE TAX RETURNS, FEDERAL—SUMMARY: 1929 TO 1944

(All money figures in thousands of dollars. An estate tax return is required to be filed (1) for estate of every citizen and resident alien who died (a) in period Sept. 9, 1916, through 10:34 a. m., Feb. 26, 1926, or in period 5 p. m., June 6, 1932, through Aug. 20, 1935, the value of whose gross estate exceeds \$50,000; (b) in period 10:25 a. m., Feb. 26, 1926, through 4:59 p. m., June 6, 1932, the value of whose gross estate exceeds \$100,000; (c) in period Aug. 31, 1935 through Oct. 21, 1942, the value of whose gross estate exceeds \$40,000; and (d) on or after Oct. 22, 1942, the value of whose gross estate exceeds \$20,000; and (2) for estate of every nonresident alien who died (a) prior to Oct. 22, 1942, any part of whose estate is situated in U. S., at date of death, and (b) on or after Oct. 22, 1942, only if gross estate situated in U. S., at date of death exceeds \$2,000. The estate of an individual who died after 5 p. m., June 6, 1932, is subject to 2 Federal estate taxes—basic tax and additional tax. Basic tax is computed at rates provided by Revenue Act of 1926, which rates are embodied in Internal Revenue Code as basic estate tax. Additional tax is excess of tentative tax computed at rates provided by act in force at date of death, over basic tax.)

<sup>1</sup> Excludes returns for estates of nonresident citizens who died prior to May 11, 1934.

<sup>2</sup> Includes returns for estates of nonresident citizens who died prior to May 11, 1934.

<sup>3</sup> Net taxable estate for 1933 and subsequent years is net estate for additional tax plus regular net estate for returns filed under the 1926 and prior acts. Tax shown is total net estate tax liability—the sum of net basic tax and net additional tax—and includes defense tax (10 percent of net tax) effective only for estates of individuals who died in period June 26, 1940 through Sept. 20, 1941.

<sup>1</sup> See note 1, table 372.<sup>2</sup> Net estate classes are based on amount of net estate for additional tax plus specific exemption. (See note 5.)<sup>3</sup> Federal Government obligations and State and municipal bonds are classified on basis of taxability of interest thereon for Federal income tax purposes; however, entire principal amount is taxable for Federal estate tax.<sup>4</sup> Less than \$500.<sup>5</sup> The specific exemption tabulated for estates of (a) individuals subject to additional tax is \$60,000 under 1942 act, \$40,000 under 1941, 1940, and 1935 acts; \$80,000 under 1924 and 1929 acts; and (b) individuals subject to earlier acts is \$100,000 under 1926 act; and \$80,000 under 1904 and prior acts.<sup>6</sup> Represents excess of total amount of funeral and administrative expenses, debts of decedents, mortgages and liens, and support of dependents, over value of property includible in gross estate subject to claims.<sup>7</sup> Excess of gross estate over allowable deductions, exclusive of specific exemption.<sup>8</sup> Net estate after deducting specific exemption of \$100,000, except for returns filed under 1924 or prior acts for which specific exemption is \$80,000.<sup>9</sup> Applies only to estates of individuals who died subsequent to June 6, 1932.<sup>10</sup> Credits for (1) estate, inheritance, legacy, or succession taxes paid to States, etc., and (2) gift taxes paid to the Federal Government.

1 Figures for 1800-50 are as of Jan. 1.  
2 Revised in accordance with Bureau of Census estimated population for continental United States as of July 1 of each year beginning 1850.  
3 Excludes bonds issued to Pacific railways and Navy pension fund.  
4 Includes old demand notes; U. S. notes (gold reserve deducted since 1900); postal currency and fractional currency less amounts officially estimated to have been destroyed; and also deposits held by Treasury for various purposes. Excludes gold, silver and currency certificates, and Treasury notes of 1890 for redemption of which an exact equivalent of the respective kinds of money or bullion was held in the Treasury.  
5 Less than \$500,000. 6 Includes old Treasury (war) saving securities for 1920 and 1925.

No. 376.—NET DEBT IN THE UNITED STATES: 1916 TO 1946

[Net public and private debt outstanding is a comprehensive aggregate of indebtedness of borrowers after elimination of certain duplicating governmental and corporate debt. This measure of indebtedness provides a more significant indication of trends in debt structure than does gross debt, since effects of nominal changes in financial practices and organization are largely removed. To obtain net figures, gross or total debt is adjusted for specific types of duplications pertaining to the following sectors of the economy: (1) Federal Government and its corporations and agencies generally; (2) State and local governments treated as a single entity; and (3) within the corporate area, those affiliated but legally distinct corporations which operate under a single management, treated here as a unit. In the noncorporate private area, data are gross throughout with no adjustments for duplications. Gross debt, as defined in this study, consists of all classes of legal indebtedness except the following: (1) Deposit liability of banks and the amount of bank notes in circulation; (2) value of outstanding policies and annuities of life insurance carriers; (3) short-term debts among individuals and unincorporated nonfinancial business firms; and (4) nominal debt of corporations, such as bonds which are authorized but unissued or outstanding but reacquired. The net debt concept for each of the four sectors can be summarized as follows: Federal Government net debt is that owed to all other sectors of the economy except the Federal Government proper and its corporations and agencies; State and local government net debt is that owed to all other economic entities except State and local governments; corporate net debt is that owed to all other entities (including corporations) except to corporate members of an affiliated system; and private noncorporate net (or gross) debt is summation of all forms of legal indebtedness except that among individuals and unincorporated nonfinancial business firms. Data represent balances of debts outstanding at end of calendar years, except data for State and local governments which are for June 30 of each year]

[In billions of dollars]

# No. 882.—INTEREST-BEARING GOVERNMENTAL SECURITIES—ESTIMATED OWNERSHIP OUTSTANDING, BY ISSUER: 1939 TO 1947

[Figures represent par values with following exceptions: (1) Holdings of commercial and mutual savings banks of securities of Federal instrumentalities not guaranteed by U. S. and of State and local governments, Territories, and possessions are book values, (2) holdings of these securities by individuals are residuals, and so deviate from par values in those cases where figures for commercial and mutual savings banks are book values, (3) in the case of data which include U. S. savings bonds, Series A-D, E, and F, figures for these bonds represent current redemption values]

[Par value. In billions of dollars]

No. 888.—INTEREST-BEARING SECURITIES ISSUED BY ALL GOVERNMENTAL UNITS IN THE UNITED STATES—ESTIMATED AMOUNTS OUTSTANDING, BY TAX STATUS AND ISSUER: 1913 TO 1947

[U. S. Govt. data on basis of public debt accounts prior to 1920; beginning 1920, on basis of Daily Treasury Statement. "Total amount outstanding" of securities of the several issuers differs from gross indebtedness of these issuers in that former excludes noninterest-bearing debt. "Total privately held securities" differs from net indebtedness of borrowers in several additional respects. Former derived by deducting from total amount of interest-bearing securities outstanding the amount of such securities held by Federal agencies, Federal Reserve Banks, and by public sinking, trust, and investment funds. Net indebtedness derived by deducting from gross indebtedness an amount equivalent to total volume of sinking fund assets of respective borrowers, with no allowance for any other public assets. For exceptions to par value, see table 382]

[Par value. In millions of dollars]

## 15. State and Local Government Finances and Employment

Statistics on finances of States and the larger cities presented in this section were procured largely by trained representatives of the Bureau of the Census and by local agents directly from information available in the fiscal offices of the States and the cities, with the assistance and cooperation of public officials. Statistics on finances of other units were obtained from State sources of central collection and by mail canvass.

In order to obtain maximum uniformity and comparability in reporting data for various units, statistics were examined and classified in accordance with standard classifications employed by the Bureau of the Census in presenting governmental statistics. Consequently, statistics as presented in Bureau of the Census reports sometimes appear in a manner different from that shown in the records of the governmental unit itself. Full definitions of the concepts used by the Bureau of the Census in reporting financial information on government and a description of the methods used in presenting the data are given in the source volumes.

Data on employees and pay rolls are from quarterly Census reports based on a mail canvass of governments selected to show trends by type of unit and by population group. Special studies, such as those on retirement systems (see tables 302-304, pp. 273, 274) are prepared either from the financial and other data collected for annual reports or from special surveys.

The Census of Governments, formerly known as Wealth, Debt, and Taxation, is conducted decennially for years ending in "2" and is designed to obtain and report the principal financial data concerning all governmental units of every type in the United States. Data from the 1942 Census are shown in this edition of the Abstract. Although some of the smaller governmental units did not report in the Census, State and national totals for the various types of units were estimated from the relatively large number of units for which data were obtained. In addition to the summary report on Governmental Finances in the United States, separate reports were published on the finances of States, cities having populations over 25,000, counties, cities having populations less than 25,000, townships and New England towns, and school districts.

The term "general government," as used in this section, covers all governmental transactions other than those of trust and sinking funds and publicly-owned enterprises. Taxes collected for sinking or trust funds, however, are reported as general revenues, and then as contributions from general government to trust or sinking funds. Revenue excludes borrowings; expenditure includes provision for debt retirement.

The data in this section relate to the fiscal years of the respective governmental units unless otherwise specified. A summary of the governmental units, by States and by types of government, is shown in table 386; their fiscal years are summarized in table 387. Predominately the State government fiscal years covered are those ending on June 30, the other States closing their fiscal years in earlier months; the local government fiscal years covered are those ending in the calendar year except for the few that end in the succeeding January.

<sup>1</sup> Sources: Revenue, U. S. Treasury Department, Combined Statement of Receipts, Expenditures, and Balances of the U. S. Government, Fiscal Year Ended June 30, 1942, pp. 25-31; other data, special compilation by Bureau of Accounts, U. S. Treasury Department. Adjustments made in Federal data to conform to Bureau of Census classifications for reporting State and local government finances.

<sup>2</sup> Represents only those school districts classified by Census Bureau as independent units of government. School figures for other local governments are included with figures for those governments.

<sup>3</sup> Each of these Federal-State-local totals and State-and-local totals is less than the sum of amounts shown separately for the several components, because totals exclude duplicating intergovernmental fiscal aid.

<sup>4</sup> Included in "Earnings and miscellaneous."

<sup>5</sup> Omits \$94 million for debt retirement reported by U. S. Treasury because payment is only nominally an expenditure and is not a charge against revenue.

<sup>6</sup> Included in "Other" public safety.

<sup>7</sup> Includes \$21,111 million for war activities.

<sup>8</sup> Less than \$0.5 million.

<sup>9</sup> For cities having populations over 100,000 only. Data for other local governments not available.

<sup>10</sup> Total is less than sum of "State" and "Local" because of exclusion of debts incurred by States for loans to local governments, which duplicate local government obligations held by States.

Source: Department of Commerce, Bureau of the Census; Revised Summary of State and Local Government Finances in 1942, and reports of 1942 Census of Governments.

<sup>1</sup> Derived from Treasury Department annual, Combined Statement of Receipts, Expenditures, and Balances of the U. S. Government, supplemented with respect to tax collection detail by data published in Annual Report of Secretary of Treasury. Data were arranged in accordance with Bureau of Census uniform classification of State and local government finances.

<sup>2</sup> Based on estimates, in part.

<sup>3</sup> Comprises special districts and townships, including towns in New England States, New Jersey, and New York.

<sup>4</sup> Includes excess profits tax and unjust enrichment tax in addition to normal tax and surtax.

<sup>5</sup> Less than \$500,000.

<sup>6</sup> Includes collections of railroad unemployment insurance contributions which are credited directly to Railroad Retirement Board. Such amounts are not reported as receipts of U. S. Treasury.

<sup>7</sup> Small amounts received by Federal Government from State and local governments are included in "charges and miscellaneous."

<sup>1</sup> Total is less than sum of "State" and "Local" because of exclusion of debts incurred by States for loans to local governments, which duplicate local government obligations held by States.

Source: Department of Commerce, Bureau of the Census; Revised Summary of State and Local Government Finances in 1942.

No. 395.—GENERAL AND ENTERPRISE DEBT OF STATE AND LOCAL GOVERNMENTS: 1946

[Data are for ends of fiscal years: (a) closed during 12-month period ended on June 30, 1946, for States, for cities having populations less than 25,000, and for townships, school districts, and special districts; and (b) closed during calendar year 1945 for counties and for cities having populations over 25,000. Includes data both for general debt and for enterprise debt]

[In millions of dollars]

PURPOSE AND TERM	Total <sup>1</sup>	State <sup>2</sup>	LOCAL					
			Total	County	City	Town- ship	School district	Special district
TOTAL								
Total gross debt.....	16, 288	2, 366	13, 957	1, 531	8, 207	178	1, 283	2, 668
Long-term debt.....	15, 795	2, 344	13, 484	1, 496	8, 166	166	1, 220	2, 436
Short-term debt.....	493	22	473	35	131	12	63	232
Sinking-fund assets.....	2, 150	594	1, 589	138	1, 305	10	62	74
Net long-term debt.....	13, 645	1, 750	11, 895	1, 358	6, 861	156	1, 158	2, 362
GENERAL GOVERNMENT								
Total gross debt.....	10, 386	2, 148	8, 247	1, 508	4, 488	167	1, 283	801
Long-term debt.....	10, 116	2, 126	7, 997	1, 473	4, 357	155	1, 220	792
Short-term debt.....	270	22	250	35	131	12	63	9
Sinking-fund assets.....	1, 422	574	855	137	613	10	62	33
Net long-term debt.....	8, 694	1, 552	7, 142	1, 336	3, 744	145	1, 158	759
ENTERPRISES								
Total gross debt.....	5, 902	218	5, 710	23	3, 809	11	-----	1, 867
Long-term debt.....	5, 679	218	5, 487	23	3, 809	11	-----	1, 644
Short-term debt.....	223	-----	223	-----	-----	-----	-----	223
Sinking-fund assets.....	728	20	734	1	692	-----	-----	41
Net long-term debt.....	4, 951	198	4, 753	22	3, 117	11	-----	1, 608

<sup>1</sup> Totals are less than sums of State and local figures for gross debt and long- and short-term debt because of exclusion of duplicating State debt for reloan to local governments. Similarly, totals of sinking-fund assets are less than sums of State and local assets because of exclusion of assets representing duplicating State debt for reloans to local governments.

<sup>2</sup> See table 400 for slightly revised data.

<sup>1</sup> New borrowings are for general-government purposes only, consisting of long-term debt incurred during fiscal year other than by funding or refunding, plus any excess of issuance over redemption of short-term debt.

<sup>2</sup> Includes direct redemption and payments into sinking funds for retirement of general debt, not debt incurred for enterprise purposes.

<sup>1</sup> Includes items not shown separately.<sup>2</sup> Taxes on unincorporated business when measured by net income are classified with "corporation income."<sup>3</sup> Includes estimated amounts (totaling \$15,825,000) for missing or incomplete items.<sup>4</sup> Corporation income taxes, except for such taxes on banks in Alabama and Arizona, are tabulated with individual income taxes in amounts for 7 States (Alabama, Arizona, Arkansas, Georgia, Missouri, New Mexico, and Oklahoma). Estimated corporation income taxes reported in the combined figures reported by 5 States are deducted from reported individual income taxes and added to total estimated corporation income taxes. No estimates of Missouri and New Mexico were made.<sup>5</sup> Not entirely complete; apparently only relatively small amounts are omitted.<sup>6</sup> Not complete. <sup>7</sup> Back taxes. <sup>8</sup> Contains licenses for same business.<sup>9</sup> Includes production and import taxes on distilled spirits (\$4,802,000 and \$1,024,000, respectively).<sup>10</sup> Includes \$2,599,000 from banks and finance companies and \$12,269,000 from Soldiers Bonus excise tax and additional surtax on corporations.<sup>11</sup> Not available.

# No. 402.—DEBT OF STATE GOVERNMENTS OUTSTANDING AT END OF FISCAL YEAR, BY STATES: 1947

[Data are for State fiscal years ending on June 30 of the specified year, except for 7 States with earlier closing dates (in the same calendar year—May 31 for Pennsylvania, March 31 for New York and Washington; in the previous calendar year—December 31 for Ohio, September 30 for Alabama and Wyoming, August 31 for Texas). Total amounts shown in this table, therefore, do not agree with State total amounts shown in table 392, which are as of June 30, 1947 for all 48 States combined. For the seven States having fiscal years ending prior to June 30, gross debt as of June 30, 1947 was as follows (preliminary figures, in millions): Alabama \$58.8, New York \$537.6, Ohio, \$9.2, Pennsylvania \$120.8, Texas \$20.8, Washington \$10.3, and Wyoming \$2.3]

[In thousands of dollars]

**No. 403.—AGGREGATE BALANCES IN STATE GENERAL, HIGHWAY, AND POSTWAR-RESERVE FUNDS AT END OF FISCAL YEAR, BY STATES: 1943 TO 1946**

[There is a lack of comparability between States, because (1) States vary as to inclusiveness of these funds and (2) nature of balance reported differs among States. Statistics show amounts and trends from year to year for each State and the 48 States as a whole]

[Amounts in thousands of dollars]

STATE	AMOUNT				PERCENT CHANGE

<sup>1</sup> For general-government purposes only. Consists of long-term debt incurred during fiscal year other than by funding or refunding, plus any excess of issuance over redemption of short-term debt.

<sup>2</sup> Includes expenditure for other public safety, correction, libraries, recreation, and miscellaneous.

<sup>3</sup> Includes \$9,709,000 for 4 colleges constituting College of City of New York.

<sup>4</sup> Includes an amount for Wayne University.

<sup>5</sup> Excludes \$214,000 paid from accumulated sinking-fund assets.

<sup>6</sup> Assessed valuation includes valuation of exempt homesteads, and levy includes amount for which the city is reimbursed by the State for loss of property tax revenue. This latter amount is excluded from property tax collections and is included in State aid received.

## 16. Banking and Finance

### MONEY AND BANKING

**Banking and monetary system.**—Collection of banking and monetary statistics in the United States has been conditioned by the development of our banking and monetary system. Banks in this country are organized under the laws of both the States and the Federal government. "National" banks organized under Federal law, passed in 1863, are supervised by the Comptroller of the Currency, and State-chartered banks are supervised by officials of the respective States. The Federal Reserve System was established in 1914 to exercise central banking functions, some of which are shared with the United States Treasury. The Reserve System includes national banks and such State banks as voluntarily join the System. The Federal Deposit Insurance Corporation, established on January 1, 1934, insures each deposit account up to \$5,000 in banks which are members of the Federal Reserve System and in such nonmember banks as join the insurance fund.

**Condition of banks.**—Statistics showing the condition of banks are collected by the various agencies responsible for the supervision of banks. Subdivision of the field among these agencies and the increasing adoption of practically uniform report schedules has made it possible for these agencies to compile the data with little duplication.

The Comptroller of the Currency, who has charge of the supervision of national banks, has collected condition reports since 1864 from these banks from three to six times annually and has tabulated and published summaries of these reports, showing the principal assets and liabilities, that is, total loans, United States Government securities, other securities, reserves, bankers' balances, interbank deposits, other demand deposits, and time deposits. National bank statistics are published in detail in the Abstract of Reports of National Banks (usually three times a year). The call report data are also published in the annual reports of the Comptroller although the detailed breakdown of assets and liabilities is slightly different than in the abstracts.

After the Federal Reserve System was established in 1914, State bank members of the Federal Reserve System began to submit to the Federal Reserve banks their statements of condition at the same time and in substantially the same form as national banks. These have been consolidated by the Federal Reserve Board with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the Federal Reserve System, and are published in detail by the Board of Governors of the Federal Reserve System in the Member Bank Call Report (usually three times a year) and in summary form in the Federal Reserve Bulletin. Banking and Monetary Statistics, which was published in 1943 by the Board of Governors of the Federal Reserve System, makes available in one volume and on a uniform basis statistics of banking, monetary, and other financial developments. The statistics generally cover the period beginning with 1914.

Since the establishment of the Federal Deposit Insurance Corporation in 1934, insured banks not members of the Federal Reserve System have been reporting their condition for the end of June and December in the same manner as member banks, and consolidation of all these reports gives totals for all insured banks, which cover all but a small part of the commercial banking in the country. Beginning with June 30, 1947, a revised all-bank series is being tabulated twice a year by the Federal Deposit Insurance Corporation, replacing the three series previously compiled by the three Federal banking supervisory agencies. Data for noninsured banks are obtained largely through the cooperation of State banking officials. A monthly series, based

on the new all-bank series, is prepared and published by the Board of Governors of the Federal Reserve System.

Statistics of the Postal Savings System, which is under the management of the Post Office Department and which performs certain banking functions, are available monthly in the Federal Reserve Bulletin and annually in the Report of Operations of the Postal Savings System.

**Currency.**—Currency includes coin and paper money issued by the Government and by banks. It represents a relatively small part of the total media of exchange in the United States, for most of it is held in the form of bank deposits and most money payments are made by check. All currency is now issued by the Federal Reserve Banks and the Treasury.

“Currency in circulation” or “money in circulation” (official Treasury Circulation Statement) refers to all coin and paper money outside the Treasury and Federal Reserve banks, with the exception of gold and silver coin known to have been exported and, beginning with January 31, 1934, all gold coin. It includes all coin and paper money held by the public in the United States whether in current active use or held idle—also some currency which strictly speaking, is not a part of the money supply in the hands of the public, that is, cash in vaults of commercial and savings banks, currency lost or destroyed, and currency carried abroad by travelers and not appearing in the official gold and silver export figures. The Federal Reserve Board derives a monthly figure for “currency outside banks” by subtracting from the Treasury “circulation” figure an amount representing vault cash held by commercial and mutual savings banks, and this figure more nearly approximates true circulation. Historical data on the stock of money and money in circulation may be found in the Annual Report of the Secretary of the Treasury.

**Government credit agencies.**—Except for the Federal land banks, Federal intermediate credit banks, and a few other agencies, including the war emergency organizations, most of the credit agencies of the United States Government were created in 1932–34 to meet specific financial problems precipitated by the depression. At the present time, there are over 35 active agencies, including the Reconstruction Finance Corporation, various agricultural lending institutions, insurance agencies, and home mortgage and housing agencies.

Statistics on the principal items of assets and liabilities of Government credit agencies are published quarterly in the Daily Statement of the United States Treasury. Quarterly statements showing the assets and liabilities of Government corporations and sources and uses of funds for these agencies are published in the monthly Treasury Bulletin. Series of yearly, quarterly, and monthly statistics relating to operations of Government credit agencies are available also in the annual and other reports of individual agencies and the annual reports of the Secretary of the Treasury.

**Private credit agencies other than banks.**—In addition to commercial banks, savings banks, and Government credit agencies, there are a considerable number of other types of credit agencies in the United States. The most important of these are savings and loan associations, insurance companies, finance companies dealing primarily in installment sales financing, credit unions, and personal loan companies. Statistics of savings and loan associations are collected by the Home Loan Bank Board. Statistics on loans, investments, cash, etc., of life insurance companies are collected and published principally by the Spectator Company, which also publishes statistics on other types of insurance. Federal credit unions are under the supervision of the Federal Deposit Insurance Corporation and statistics on them are compiled and published by that organization. These data are combined with information on credit unions other than Federal by the Bureau of Labor Statistics and published in the Monthly Labor Review. (See table 458.) Consumer credit statistics are published currently in the Federal Reserve Bulletin.

## SECURITIES MARKETS AND CORPORATIONS

**New issues and retirement of securities.**—Current statistical information on new issues of securities has been provided for many years by the Journal of Commerce (since 1906), the Commercial and Financial Chronicle (since 1919) (see table 502), and the Standard and Poor's Corporation (since 1924). The statistics of the Commercial and Financial Chronicle, the most detailed and most widely used of these series, include, in addition to domestic and foreign corporate issues and State and local government securities, the issues of independent agencies of the United States Government, and the issues of foreign governments and their subdivisions. The series is deficient in information on the uses of the proceeds of new issues, showing totals only for refunding and all other purposes.

A more comprehensive series of new issues with detailed information on the intended uses of net proceeds has been compiled by the Securities and Exchange Commission on a monthly basis beginning with January 1934. (See table 503.) This series is published monthly in the Statistical Bulletin of the Securities and Exchange Commission, the Federal Reserve Bulletin, and the Survey of Current Business.

In addition, the Commission has been compiling statistics since 1933 on the volume of retirements of corporate securities and changes in security holdings of institutional groups and the public by type of issue. It is planned to make these data public in the next year.

**Individuals' saving.**—The Securities and Exchange Commission releases quarterly detailed estimates of individuals' saving showing the increase in their assets less the increase in their liabilities, exclusive of gains or losses from revaluation of assets. In addition to total saving, these figures show the components contributing to it, such as changes in securities, cash, insurance, consumers' indebtedness, etc. A continuous series starting with 1940 is published quarterly in a special release and in the Commission's Statistical Bulletin. (See table 435.) Revised annual estimates prior to 1940 are currently being prepared together with a write-up of the sources and methods. The Home Loan Bank Board compiles statistics on changes in selected types of individual long-term savings. (See table 437.)

**Distribution of family liquid assets and saving by income groups.**—The Board of Governors of the Federal Reserve System releases annual data covering the distribution of liquid assets and positive, negative, and net saving of families, by income groups. These estimates are based on the Board's Survey of Consumer Finances, a nation-wide interview survey of private households. The components of liquid assets are checking accounts, savings accounts, and all U. S. Government securities. Currency is excluded. The survey measures saving by obtaining detailed information on changes in the various asset and liability items that make up each family's balance sheet. (See footnote 2 to table 436 for details.)

**Trading in securities.**—(See tables 490–492.) Monthly figures on the total value and volume of securities sold on each of the national securities exchanges have been published since October 1934 by the Securities and Exchange Commission. These figures, reported in connection with the fees paid under Section 31 of the Securities Exchange Act of 1934, include all sales effected on exchanges except, since March 1944, United States Government issues. They cover odd lots as well as round lots. The Commission also publishes figures on the total daily volume of trading in stocks on the New York Stock Exchange and the New York Curb Exchange.

Prior to 1934, the only available statistical data on the volume of trading in securities were the daily figures on the number of shares and the principal amount of bonds reported sold on the New York Stock Exchange and on most of the other securities exchanges. "Reported" volume of stock sales on the New York Stock Exchange represents sales in round lots reported on the ticker and does not include certain types of round-lot transactions such as stopped sales, private sales, split openings, cross transactions, and errors of omission which ordinarily amount to from five to ten percent of total round-lot sales on the Exchange.

**Security price averages.**—(See tables 494 and 495.) A number of indices of security prices are published regularly. Among the most widely known are the Dow-Jones averages, which provide a continuous series of common stock prices on a daily basis since 1897. This series is now based on 65 common stocks divided into 30 industrial, 20 railroad, and 15 public utility stocks. Probably the most comprehensive and detailed are the indices of the Standard and Poor's Corporation available since 1918, which are based on the Wednesday closing price of approximately 400 stocks divided into about 70 industrial groups. Standard and Poor's Corporation also publishes a daily average of 90 stocks. Another stock price index available on a daily basis is the New York Herald Tribune average of 100 stocks.

**Liquid asset holdings of individuals and businesses.**—The Board of Governors of the Federal Reserve System prepares annual estimates of the amount of currency, demand deposits, time deposits, and U. S. Government securities held by individuals and businesses. Separate estimates are shown for financial and nonfinancial corporations, unincorporated businesses, other individuals, and trust fund holdings. The series, published in the Federal Reserve Bulletin, gives semi-annual figures from December 1939 to December 1946 and annual figures thereafter. (See table 501.)

**Current assets and liabilities of United States corporations.**—The Securities and Exchange Commission publishes a quarterly series on the net working capital position of all United States corporations, exclusive of banks and insurance companies, showing the principal components of current assets and current liabilities. (See table 500.)

Abbreviated balance sheet as well as income account data for all United States corporations are available in Statistics of Income, Part 2, an annual report of the Bureau of Internal Revenue (see tables 360–370, pp. 339–362). The Securities and Exchange Commission quarterly estimates, based on sample data, supply this information currently whereas about three years elapse before the final data are available from Statistics of Income.

Among other reports of the Securities and Exchange Commission are the quarterly series on Plant and Equipment Expenditures of United States Business, prepared jointly with the Department of Commerce; the Survey of American Listed Corporations; and an annual series, Resources and Liabilities of Brokers and Dealers, started in 1946.

<sup>1</sup> Under orders of Secretary of Treasury of Dec. 28, 1933, and Jan. 11 and 15, 1934, all gold coin domestically owned (with minor exceptions) was required to be delivered to Treasurer of U. S., and under Gold Reserve Act of 1934 (Jan. 30) withdrawn from circulation and formed into bars. Gold coin (\$287,000,000) shown on Treasury records as then outstanding was dropped from statement as of Jan. 31, 1934.

<sup>1</sup> Totals involve duplication to extent that United States notes, Federal Reserve notes, Federal Reserve Bank notes, and national bank notes, all included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 excluded, since they are complete duplications of equal amounts of gold or silver held as security therefor and included in totals.

<sup>2</sup> By proclamation of the president dated Jan. 31, 1934, weight of gold dollar reduced from 25.8 to 155 $\frac{1}{2}$  grains of gold, 0.9 fine. Hence, value of gold based on \$35 per fine ounce beginning June 1934, theretofore, based on \$20.67 per fine ounce.

<sup>3</sup> Includes fractional paper currency in circulation prior to 1878.

<sup>4</sup> Silver bullion in Treasury.

<sup>5</sup> Includes silver bullion as follows: As of June 30: 1934, \$1,560,000; 1935, \$313,309,000; 1936, \$706,211,000; 1937, \$835,196,000; 1938, \$1,037,163,000; 1939, \$1,230,586,000; 1940, \$1,553,162,000; 1941, \$1,435,909,000; 1942, \$1,508,544,000; 1943, \$1,519,746,000; 1944, \$1,520,134,000; 1945, \$1,520,295,000; 1946, \$1,909,099,000; 1947, \$1,923,913,000. As of Dec. 31: 1946, \$1,911,167,000; 1947, \$1,937,618,000.

# No. 415.—MONEY IN CIRCULATION, MONEY HELD IN TREASURY AND IN FEDERAL RESERVE SYSTEM, AND TOTAL STOCK: 1800 TO 1947

[All figures except per capita in thousands of dollars. In conformity with revisions in form of circulation statement in 1922 and 1927, figures for 1913 on have been compiled to include in holdings of Federal Reserve Banks and agents, and, hence, in stock of money, gold bullion and foreign gold coin held by Federal Reserve Banks and agents. Figures were also revised to include in holdings of Federal Reserve Banks and agents, and, hence, exclude from circulation, all forms of money held by them whether as reserve against Federal Reserve notes or otherwise. See also headnote, table 414. Per capita figures for 1800-40 based on Bureau of Census population figures for continental U. S. on census dates. Per capita figures for 1860-1947 revised in accordance with Bureau of Census estimated population for continental U. S. as of July 1 and Dec. 31]

<sup>1</sup> Gold and silver certificates and Treasury notes of 1890 excluded before combining money outside Treasury with money in Treasury in order to avoid duplication, since gold and silver held in Treasury as security against these currencies are included. See also notes 1 and 2, table 414.

<sup>2</sup> Both items include also reserve against Treasury notes of 1890.

<sup>3</sup> See note 1, table 413.

<sup>4</sup> Includes total stock of silver dollars and subsidiary silver.

<sup>5</sup> Gold certificates. Amount excluded from total since gold held as security against gold certificates is included in column, "In trust against gold and silver certificates."

Source: Treasury Department; Annual Report of the Secretary, Circulation Statement of United States Money published monthly.

# No. 416.—ALL ACTIVE BANKS—PRINCIPAL ASSETS AND LIABILITIES, BY CLASS OF BANKS: 1840 TO 1946

[Includes banks in Alaska, Hawaii, Puerto Rico, Philippine Islands (through 1941), and beginning with 1935, those in Virgin Islands and with 1938, those in Canal Zone, Guam (except 1942-44), and American Samoa. Data for banks other than national for earlier years are not as of June 30 and are incomplete, especially through 1885. Figures for mutual savings banks include some stock savings banks for years prior to 1910 and also a few in several more recent years. Private banks are not included prior to 1890; statistics for private banks, except for 1934 and 1935, cover only banks under State supervision and those voluntarily reporting; for 1934 and 1935 they include also private banks which submitted reports to the Comptroller of the Currency under provisions of the Banking Act of 1933]

[Money figures in millions of dollars]

<sup>1</sup> Acceptances of other banks and bills of exchange or drafts sold with endorsements are excluded for national and State banks beginning with 1920 and for other banks beginning with 1929.

<sup>2</sup> Securities borrowed excluded for national banks beginning with 1903 and for other banks beginning with 1929. Not reported separately for prior years.

<sup>3</sup> Includes lawful reserve, exchanges for clearing house, and all cash items except for 1936 to 1946, for which years cash items not in process of collection are excluded.

<sup>4</sup> Reciprocal interbank demand balances with banks in the U. S. are reported net, beginning 1942.

<sup>5</sup> Includes capital notes and debentures for banks other than national for 1934 to 1946.

<sup>6</sup> Interest, taxes, and other expenses accrued and unpaid are excluded for national banks beginning with 1920 and for other banks beginning with 1929.

<sup>7</sup> Figures for national banks represent national bank circulation only; comparatively small amounts of State bank notes outstanding for 1870 to 1910, for which national banks converted from State banks or merged with State banks assumed liability, are not included in the figures for national banks or for all banks.

<sup>8</sup> Capital only.

<sup>9</sup> Figures for State banks, except number of banks and capital, estimated.

<sup>10</sup> Includes capital only for banks other than national.

<sup>11</sup> Licensed banks; i. e., those operating on an unrestricted basis.

<sup>12</sup> U. S. Government securities only.

<sup>13</sup> Includes State bank circulation outstanding.

<sup>14</sup> Includes loan and trust companies, and with some exceptions (see headnote), stock savings banks.

<sup>15</sup> Figures given under capital for 1934 and 1935 include capital stock of one stock savings bank (see headnote).

### No. 419.—ALL REPORTING BANKS IN THE UNITED STATES—NUMBER, LOANS, INVESTMENTS, AND DEPOSITS: 1933 TO 1947

(Money figures in millions of dollars. In general, data cover all banks in continental United States, comprising national banks, State commercial banks, trust companies, mutual and stock savings banks, and such private, Morris Plan, and industrial banks as were under supervision of, or reported to State banking departments. Banks are classified as members of Federal Reserve System and nonmembers. For further details see Banking and Monetary Statistics, published by Board of Governors of Federal Reserve System)

<sup>1</sup> Both direct and guaranteed obligations.

<sup>2</sup> Prior to Dec. 31, 1935, excludes balances with private banks to extent that such balances were reported in "Other assets." Prior to Dec. 31, 1933, excludes time balances with domestic banks which then amounted to \$62,000,000 and which, prior to that time, were reported in "Other assets." Beginning June 30, 1942, excludes reciprocal bank balances which then aggregated \$800,000,000.

<sup>3</sup> Beginning with 1940, includes U. S. Treasurer's time deposits, open account.

<sup>4</sup> Demand deposits other than interbank and U. S. Government, less cash items re-ported as in process of collection and, prior to Dec. 31, 1933, less cash items reported on hand but not in process of collection.

<sup>5</sup> Postal savings of State Member Banks included in time deposits.

<sup>6</sup> Central reserve city banks only.

<sup>1</sup> For rates for 1914 to 1921, see Statistical Abstract 1928, table 249; for 1922 to 1932, Statistical Abstract 1933, table 232; for 1933 and 1934, Statistical Abstract 1942, table 268. For rates on industrial advances authorized by sec. 13b of Federal Reserve Act, which are not shown in this table, see source.

<sup>2</sup> Rediscounts of notes, drafts, and bills eligible for discount under Federal Reserve Act, and advances secured by such paper, by direct obligations of U. S., by certain obligations guaranteed as to principal and interest by U. S., and by obligations of Federal intermediate credit banks maturing within 6 months.

<sup>3</sup> 1 percent on advances secured by Government obligations.

<sup>4</sup> ½ percent on advances secured by Government obligations maturing or callable in 1 year or less. This preferential rate eliminated in April and May 1946.

<sup>5</sup> Advances secured to satisfaction of Federal Reserve Bank.

<sup>6</sup> Rate of 2½ percent to other lenders (than banks) in effect until Apr. 11, 1942.

<sup>7</sup> Separate rate to banks eliminated.

### No. 432.—SAVINGS BANKS—NUMBER OF DEPOSITORS AND AMOUNT OF SAVINGS DEPOSITS, CONTINENTAL UNITED STATES: 1820 TO 1910

[Data for later years as of June 30 or about June 30. In earlier years reports were of various dates. Prior to 1900 data include both mutual and stock savings banks; beginning 1900 they are for mutual savings banks only, which in that year had about 90 percent of savings deposits in all savings banks. For figures for later years and also savings deposits in all classes of banks, see table 433.]

[Depositors in thousands, deposits in millions of dollars]

YEAR	Depositors	Savings deposits	YEAR	Depositors	Savings deposits	YEAR	Depositors	Savings deposits
1820	9	1.1	1890	4,259	1,524.8	1901	5,612	2,260.3

<sup>1</sup> Includes deposits evidenced by savings passbooks, time certificates of deposit payable in 30 days or over time deposits, open account, postal savings redeposited in banks, and, for some States, Christmas savings and similar accounts.

<sup>2</sup> Includes State, stock savings, and private banks and trust companies.

<sup>3</sup> Combined data for other than national banks included in total.

<sup>4</sup> For data for 1910 and earlier years from reports of the Comptroller of Currency, see table 432.

<sup>5</sup> Not available.

<sup>6</sup> Figures include depositors for State-chartered banks in States which did not previously report depositors as follows (figures in parentheses are the number of depositors for the first year the given States reported): Beginning 1928, Ohio and Idaho (2,376,000 depositors); beginning 1931, Missouri (623,000 depositors); beginning 1932, Colorado (50,000 depositors); and beginning 1934, Indiana (286,000 depositors).

<sup>7</sup> Represents the number of savings passbook accounts.

<sup>1</sup> Does not include net purchases by brokers and dealers or by other individuals financed by bank loans.

<sup>2</sup> Includes Armed Forces Leave bonds.

<sup>3</sup> Less than \$50 million.

<sup>4</sup> Mortgage debt to institutions on one-to-four family nonfarm dwellings.

<sup>5</sup> Largely attributable to purchases of automobiles and other durable consumers' goods, although including some debt arising from purchases of consumption goods. Other segments of individuals' debt have been allocated to assets to which they pertain, viz., saving in savings and loan associations, insurance and securities.

<sup>6</sup> Construction of one-to-four nonfarm dwellings less net acquisition of properties by non-individuals. Also includes small amount of construction by non-profit institutions.

<sup>7</sup> Consumer expenditures on durable goods as estimated by Department of Commerce.

Source: Securities and Exchange Commission; data are published quarterly in a special release and in the Statistical Bulletin.

## No. 486.—PERCENT DISTRIBUTION OF FAMILY LIQUID ASSETS AND SAVING, BY INCOME GROUPS: 1946

[National estimate based on sample interview survey of 2,720 families, defined as all (one or more) persons living in same household and related by blood, marriage, or adoption. Universe covered is population of U. S. residing in private households during interview period, which was January through March 1947. Following groups are excluded: (1) Members of armed forces living at military reservations; (2) residents of hospitals and in religious, educational, and penal institutions; and (3) floating population, that is, people living in hotels, large boarding houses, and tourist camps.]

ANNUAL 1946 MONEY INCOME BEFORE TAXES	Liquid assets <sup>1</sup>	Positive saving <sup>2</sup>	Negative saving <sup>2</sup>	Net saving <sup>2</sup>
All income groups.....	100	100	100	100
Under \$1,000.....	4	1	17	-6
\$1,000-\$1,999.....	9	1	17	1
\$2,000-\$2,999.....	15	12	26	7
\$3,000-\$3,999.....	15	18	17	16
\$4,000-\$4,999.....	13	13	14	12
\$5,000-\$7,499.....	16	16	6	19
\$7,500 and over.....	28	34	8	48

<sup>1</sup> Liquid assets include all U. S. Government securities, checking accounts, and savings accounts held at time of survey in early 1947. Currency is excluded.

<sup>2</sup> Positive saving comprises the saving of all family units with money incomes in excess of expenditures, negative saving comprises the dissaving of all family units with expenditures in excess of money incomes, and net saving (plus or minus) is positive saving less negative saving for all family units combined. The survey does not undertake to measure directly consumer expenditures and taxes but measures the saving of each family by obtaining detailed information on the changes in the various asset and liability items that make up each unit's balance sheet of saving. The saving of each unit during the year is computed by subtracting algebraically the total change in its liabilities (plus or minus) from the total change in its assets (plus or minus). Positive saving results from a larger increase in assets than in liabilities or a larger decrease in liabilities than in assets. The reverse is true for negative saving. The more important asset and liability items for which information is obtained are changes in liquid asset holdings, changes in consumer indebtedness, net sales or purchases of stocks and bonds, payments of life insurance premiums, payments to retirement funds, net sales and purchases of houses, payments on house mortgages, house improvements, and investment or withdrawal of investment in unincorporated businesses. Capital gains or losses are excluded from saving.

<sup>1</sup> Federal deposit insurance became operative Jan. 1, 1934.

<sup>2</sup> Comprises banks suspended before banking holiday, licensed banks suspended or placed on restricted basis following banking holiday, unlicensed banks placed in liquidation or receivership, and unlicensed banks granted licenses after June 30, 1933. At close of banking holiday (Mar. 15, 1933) 1,400 national banks with deposits (on Dec. 31, 1932) of \$1,942,574,000, and 225 State member banks with deposits of \$925,777,000 had not been licensed to reopen. On Apr. 12, 1933, the earliest date following the banking holiday for which corresponding data are available regarding nonmember banks, there were in the United States 1,108 unlicensed national banks with deposits of \$1,818,541,000, 152 unlicensed State member banks with deposits of \$842,982,000, and 2,838 unlicensed nonmember banks with deposits of \$1,317,607,000. By the end of June 1933 supervisory authorities had completed their examination of all or nearly all the banks not granted licenses immediately following the banking holiday and had authorized such of the banks to reopen as could qualify for licenses. On June 30, 1933, there remained 955 unlicensed national banks with deposits of \$1,028,347,000, 114 State member banks with deposits of \$239,268,000, and 1,983 nonmember banks with deposits of \$1,063,994,000 to be rehabilitated and reopened or to be placed in liquidation of receivership. All such banks are treated as suspensions.

<sup>1</sup> Exclusive of interbank loans.

<sup>2</sup> Carried at amortized cost or par, whichever is lower.

<sup>3</sup> Net amount after deducting impairment or deficit.

<sup>4</sup> Adjusted for debentures held by banks of issue and by other Federal intermediate credit banks.

<sup>5</sup> Total is less than sum of figures for individual banks because of interbank transactions.

<sup>1</sup> Exclusive of repayments, unallocated, pending advices, as of Dec. 31, 1947.

<sup>2</sup> Includes loans to receivers, liquidating agents, and conservators, loans through mortgage loan companies to aid closed banks, a loan to a livestock credit corporation for purpose of liquidating a closed National bank, and loans on assets of closed banks under sec. 5e of the RFC Act, as amended.

<sup>3</sup> Excludes loans through banks to business enterprises.

<sup>4</sup> Includes \$193,618,000 representing refinancing of previous loans by the Corporation to these banks.

<sup>5</sup> Excludes loans through mortgage loan companies to aid closed banks and to business enterprises.

<sup>6</sup> Includes loans to business enterprises through banks and mortgage loan companies.

<sup>7</sup> In addition, participating banks had disbursed \$748,183,000 (exclusive of disbursements in connection with transfer of authorizations from Smaller War Plants Corporation) on immediate and deferred participations as of Dec. 31, 1947.

<sup>8</sup> In addition, participating banks had disbursed \$316,832,000 on immediate and deferred participations as of Dec. 31, 1947.

<sup>9</sup> Includes \$17,159,000 representing repayments and other reductions by States and political subdivisions; and \$282,826,000 representing cancellation of the Corporation's notes, pursuant to the provisions of the act approved Feb. 24, 1938, equivalent to the balance of the amounts disbursed.

<sup>10</sup> Of this amount \$3,054,064,000 represents cancellation of the Corporation's notes, pursuant to the provisions of the act approved Feb. 24, 1938, equivalent to the balance of the amount disbursed for allocations to other governmental agencies and for relief by direction of Congress and the interest paid thereon.

## No. 478.—BANK CLEARINGS FOR LEADING CITIES: 1930 TO 1947

(In millions of dollars. Cities listed in order of importance according to clearings in 1947. No figures given for Los Angeles, which ranked eighth in 1929 but has not reported clearings for any subsequent year. Comparability of figures for different years is affected by tendency toward consolidation of banks, eliminating former clearings between 2 or more banks. Debits to individual account (table 479) are a better measure of volume of payment. For figures for earlier years for all cities reporting to New York Clearing House Association, 1883 to 1929, and for figures for 146 identical cities, 1929 to 1936, see table 263, Statistical Abstract, 1937)

No. 479.—BANK DEBITS TO DEPOSIT ACCOUNTS (EXCEPT INTERBANK)—  
VOLUME REPORTED BY BANKS IN LEADING CENTERS, 1928 TO 1947, AND BY  
MONTHS, 1945, 1946, AND 1947

[All figures in millions of dollars. Figures represent debits or charges on books of reporting member and non-member banks to deposit accounts of individuals, firms, and corporations, and of United States, State, county, and municipal governments, including debits to savings accounts, payments from trust accounts, and certificates of deposit paid. Excludes debits to accounts of other banks or in settlement of clearinghouse balances, payment of cashiers' checks, charges to expense and miscellaneous accounts, corrections, and similar charges]

<sup>1</sup> This series, together with New York City, constitutes national series for which bank debits figures available beginning with 1919.

<sup>2</sup> Annual figures for 1928 to 1935 include from 121 to 131 centers and for 1936 to 1941 and 1942 (old series) include 133 centers. Figures for 1942 (new series) to November 1947 include 193 centers, and for December 1947 include 192 centers, one city having been dropped when the reporting bank was absorbed by a reporting bank in another city.

<sup>3</sup> No figures available for March.

1943.....	531	184,457	2,854,701	673,083	1,703,797	1,816,034	659,365	603,153	1,538,988

<sup>1</sup> Number reporting beginning 1920.

<sup>2</sup> Total premium receipts prior to 1910.

<sup>3</sup> Figures for 1906 to 1930 include adjustment expenses excluded thereafter.

<sup>4</sup> Including taxes.

<sup>5</sup> Figures through 1930 include data for companies which transact life insurance in addition to accident and health insurance. Income and disbursement items include business of accident and health branches only of these life insurance companies, where companies were able to segregate data, while capital, assets, and net surplus include total amounts of these items for such companies, excluding, however, data for a few very large companies for which accident and health business is only a small proportion of the total business. Capital, assets, and net surplus are therefore overstated and in part duplicated in figures for life insurance companies in other tables. Figures for 1935 to 1946 relate to casualty, surety, and miscellaneous insurance companies only.

<sup>6</sup> Includes stock casualty, surety, and miscellaneous insurance companies, shown separately above, mutual companies, reciprocals, and Lloyds; number of companies and income and disbursement items also include accident and health departments of life insurance companies. No comparable data after 1943.

### No. 487.—FIRE LOSSES, TOTAL AND PER CAPITA, CONTINENTAL UNITED STATES: 1876 TO 1946

[Amounts, except per capita, in thousands of dollars. Prior to 1916 figures are as compiled by the New York Journal of Commerce and include losses of \$10,000 or over in the principal cities of the United States, adding 16 percent for small and unreported losses. These figures are not comparable with those shown for later years (the 1916 Journal of Commerce figure being \$214,531,000 as against \$258,378,000) which cover all fires reported to the Actuarial Bureau Committee, adding 25 percent for unreported and uninsured losses prior to 1936 and 30 percent thereafter. Estimated fire losses are based on paid losses]
